NEW RELEASE

# THE MICROBEE 256TC

## A BREAKTHROUGH IN AUSTRALIAN INFORMATICS

***The product of extensive creative effort by the Microbee R&D team. The Microbee 256TC sets new standards for educational and home computers. In fact, we believe we have invented a whole new class of technological tools: The Telecomputer - hence our name -Microbee 256TC.***

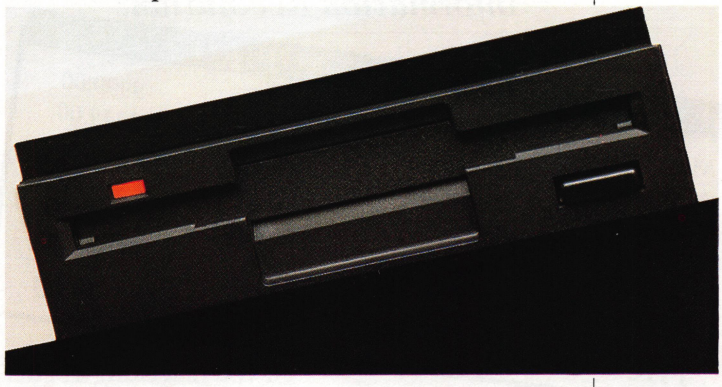

In the Microbee tradition, the Microbee 256TC comes equipped with state of the art improvements, such as 256K internal memory, 800K 3.5 inch disk drive. Fully featured ergonomic keyboard, compact transportable construction, built-in word processing, communications, software and full utility support programs. The new 256TC is compatible with all Microbee software collections.

### *A new class of very personal computer for Education and Communication. The Microbee 256TC is in a class of its own.*

Since the release of the Microbee in 1982 , owners have had access to continuous upgrades to new technology and continuously evolving software development. Microbee was the first computer in the world to incorporate word processing software as standard in built-in memory and then to incorporate Telecommunications in built-in memory. There are now more Microbees operating in Australia fitted with Telcom (Microbee's own telecommunications software package) than there are Telexs! In 1985 videotext capability was added as standard and Microbee is a most popular machine on Viatel, the very exciting and successful videotext service from Telecom.

### *Informatics - The combination of computer automation with information technology*

Microbee owners are again leading the way into Informatics. More recent developments such as Austpac, Minerva and Telememo are

easily accessed using the latest generation Microbee. In fact, Microbees are used in so many Australian schools for applications such as Electronic Mail, interschool communications and software interchanges, that Telecom Australia tell us ' Microbee systems is the biggest user of Telememo at the present time'.

Now Microbee Systems Limited are proud to announce the latest releases from Microbee. This most exciting breakthrough is the ingenious new Microbee 256TC.

As easy to use as the telephone, the 256TC features powerful, built-in software ready for you to select at a single keystroke. The result of years of intensive product development, the Microbee 256TC utilises Microbee Gamma technology and incorporates all the major advances made since the first Microbees were announced. The result is a new class of computer with powerful graphic capabilities, fast easily mastered user interface and proven software tools. The Microbee 256TC is your information window to the world!

# THE EDUCATION SOLUTION

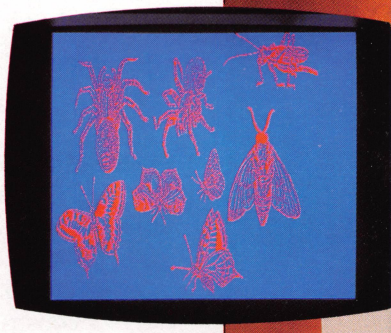

***The Microbee 256TC is the product of over $1,000,000 of Australian research and development. Designed in Australia by Australians for the World market, the Microbee 256TC is a totally new concept in the Education Information Revolution.***

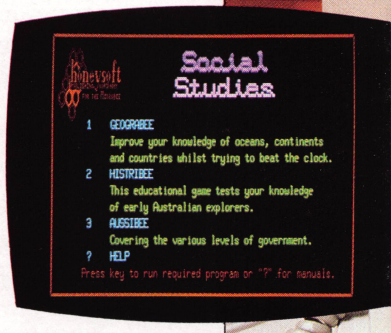

| PACKAGE 1 COMPRISES: | |
|---|---|
| Microbee 256TC single drive | $999.00 |
| M-15 High resolution monitor 15kHz | $249.00 |
| 256TC manuals and software including Simply Write (Wordprocessor), Viatel (VideoText), Telecom (Communications) and Learning Can Be Fun. | $200.00 |
| TOTAL PACKAGE VALUE | $1,488.00 |
| **PACKAGE PRICE ONLY** | **$1,299.00** |

If you're seeking a better education for your family and yourself, the Microbee 256TC Education Solution is for you! Using the education approved Microbee software you can ensure that all your family can keep up with the times and ahead of the rest. Microbees are approved by education authorities and are widely used throughout Australian schools so Microbee knows what is in demand for todays educators. Easily expanded by adding peripherals such as printer, modem and colour monitor, the Microbee 256TC grows as your computing needs grow.

## *Now Learning can be Stimulating and Fun*

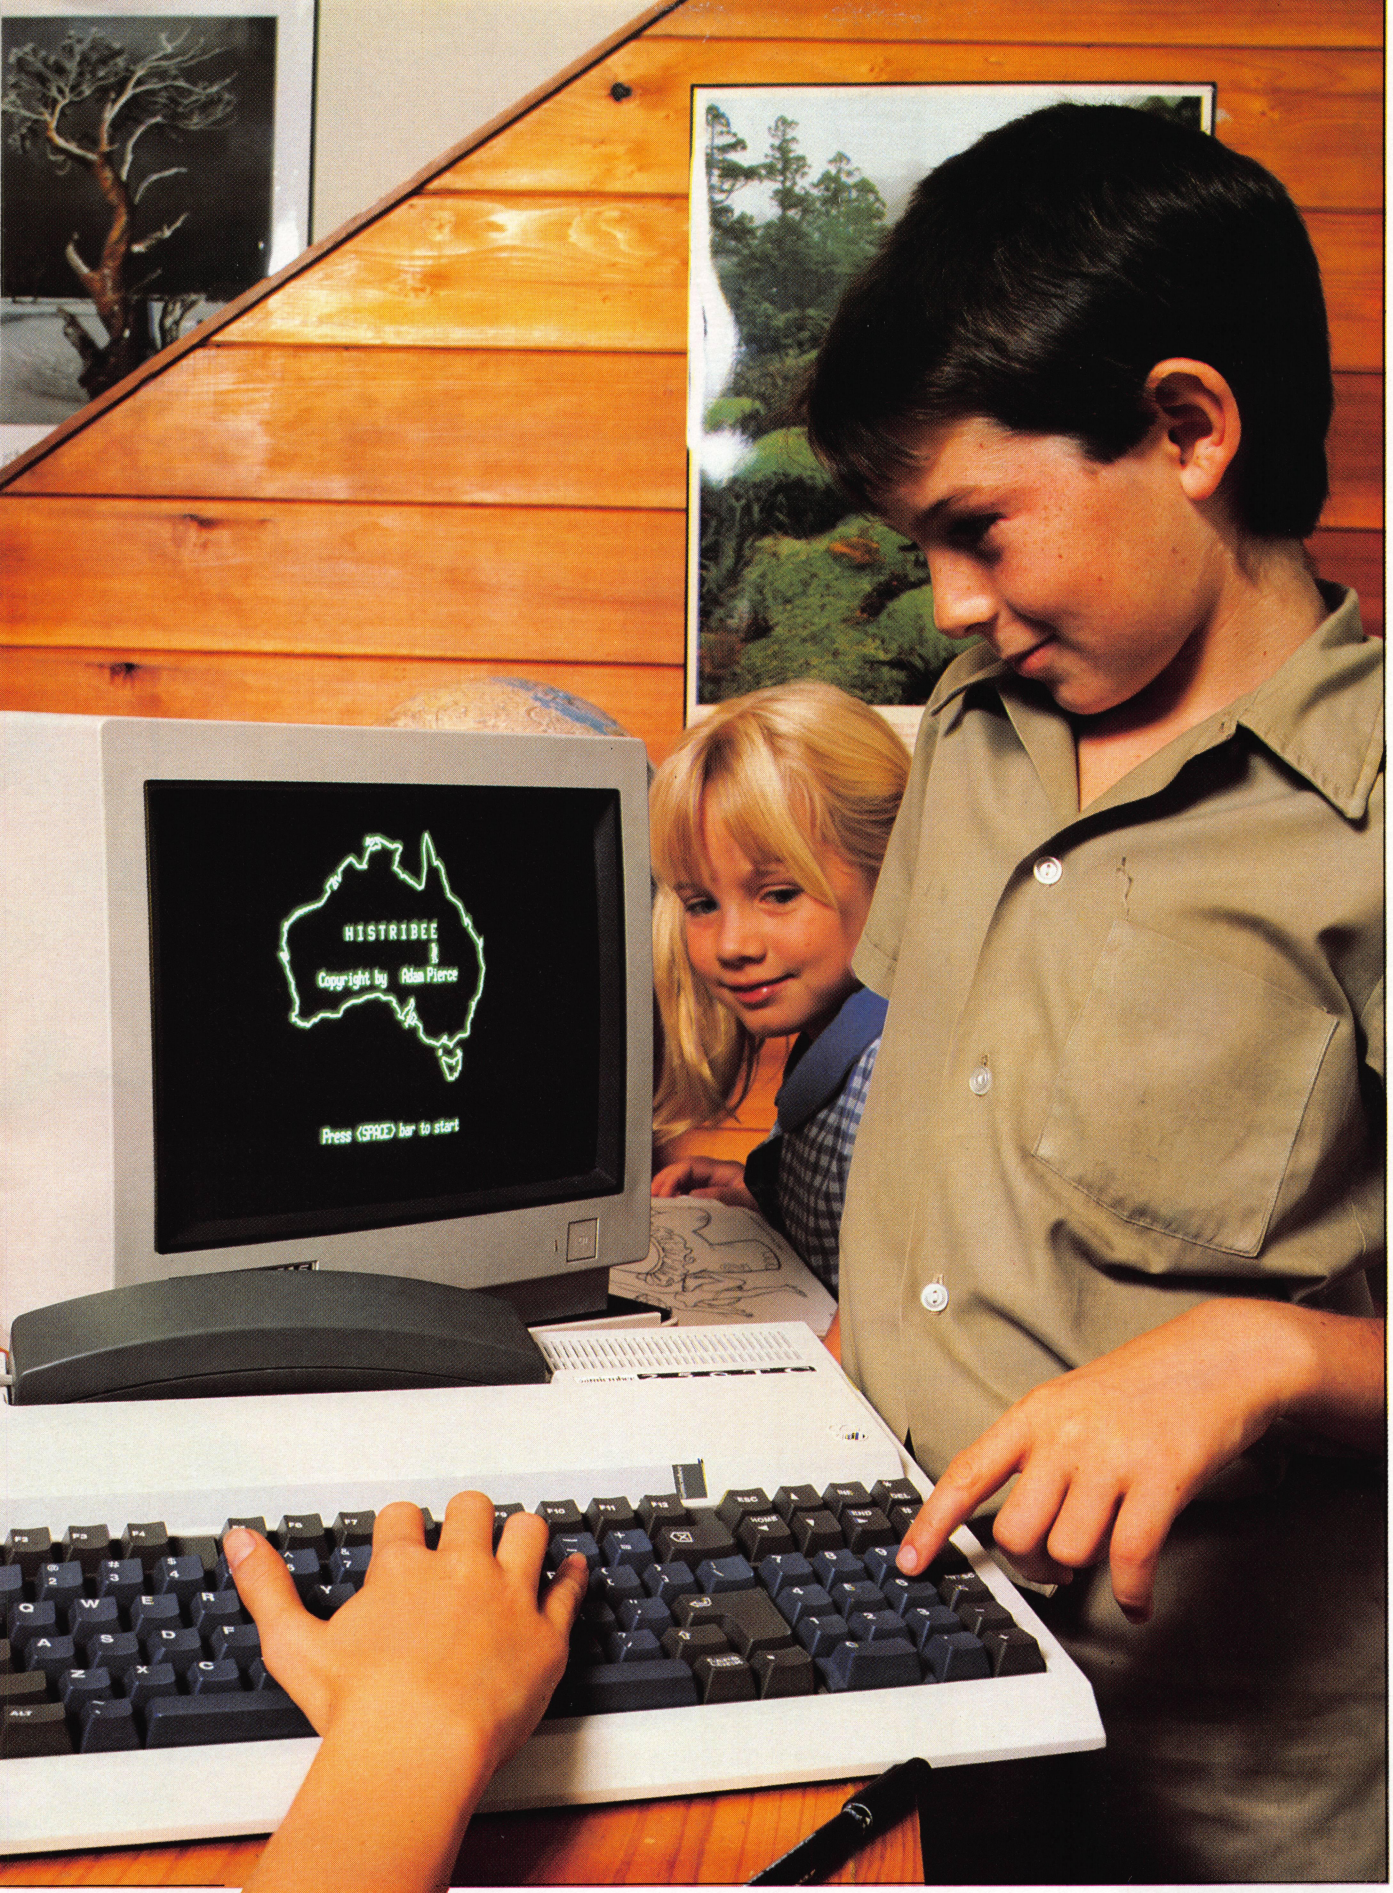

When the homework is over, the Microbee 256TC shows its other personality as a family entertainment computer, utilising well designed, educationally stimulating games guaranteed to fascinate the whole family. Add the Microbee Automodem for a complete information terminal at home - your 'Information Window to the World'. Connect to the school computer via the operational Automodem and you can send in assignments or make data base searches over the telephone or even use the home banking on Viatel! The Microbee 256TC is ready to help you meet the challenges of 'the information age.'

Features of the 256TC include:

- Fast, easy user friendly software interface with single key 'simple symbol' selection.
- Compact design with built-in 800K 3.5" disk drive standard.
- Built-in realtime clock for timing, keeping track of appointments, scheduling activities .
- Full featured, ergonomic, Australian designed keyboard with function keys and number pad, designed in response to user feedback to meet the demands of the information age.
- Fast operation with easy to use proven software.
- Superb, sharp, high resolution graphics (colour and monochrome standard) fully programmable to 80 column standard with 40 column selectable option (VIDEOTEXT).
- Standard interfaces for connecting to printers, monitors, modems and other computers.
- 256K of high speed memory running industry standard software.
- Communications as easy to use as the 'phone!
- Built-in networking and connect capabilities to other computers.
- Modular expandable upgradeable technology.
- Programmable 8 bit I/O port, RS232 port, built-in sound.

# THE HOME OFFICE SOLUTION

## *For your Family's Education, Careers and personal business*

The Microbee 256TC 'Home Office Solution' is the ideal hardware/software configuration for your office or study at home. The 256TC doubles as a wordprocessor so you won't need the old typewriter. This new class of computer can also be used by your children for homework since Microbees are widely used in schools throughout Australia and a vast range of education approved software is available.

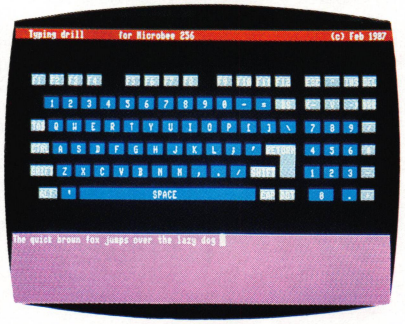

Near Letter Quality Printer Fast, general purpose dot-matrix printer. The DP100 is bi-directional, with a choice of fonts and printing modes including near letter quality, proportional spacing, bit-image graphics. Takes paper up to 254mm wide, either friction or tractor feed.

Standard Centronics-type parallel interface. The 256TC is so flexible that when the homework is finished, Dad can put together some projected budgets (using spreadsheets) for the office and then Mum can catalogue the members of her local club (using a database) or complete her own letters and writing or external study projects. The 256TC is a very versatile home family office in a computer! You can do it from home Add Microbee Automodem and you have a full Informatics Ready workstation. Using Viatel you can carry out home banking, check share prices, try a little Telebetting on the TAB, search remote Databases for key facts and even send Telexs.

Of course you can readily expand the Microbee 256TC by adding other peripherals or selecting from industry standard software to meet your needs.

## PACKAGE 2 COMPRISES:

| | |
|---|---|
| Microbee 256TC single drive | $999.00 |
| M-15 High resolution monitor 15kHz | $249.00 |
| DP-100 Near letter quality, dot matrix printer and parallel cable. | $499.00 |
| 256TC Manuals and software including Typing Drill, Learning Can Be Fun - Words, Learning Can Be Fun - Numbers, Microbee Demonstration disk, Simply write (Wordprocessor), Viatel (VideoText), CP/M (operating system), Telcom (Telecommunications) | $299.00 |
| TOTAL VALUE | $2,146.00 |
| PACKAGE PRICE ONLY | $1,899.00 |

## *Microbee - Australia's own Educational and Personal Computer*

Microbee is a unique computer because it is designed and manufactured in Australia. Microbee is supported through Microbee owned Technology Centres in Sydney, Melbourne, Perth, Adelaide and Brisbane.

The Microbee has been approved for use in Australian schools by the New South Wales, Western Australian, Victorian and Queensland Education Departments and also recommended by the Australian Schools Commission. Microbee is also working extensively in the field of communications. Again, Microbee is unique because every computer is sold 'Viatel ready' and fitted with easy-to-use communications software.

# A WINNER
## EVERY WAY YOU LOOK AT IT

In a class of its own from the powerful built-in 3.5" disk drive to the beautifully sculptured keyboard, the new Microbee 256TC has it all - power, performance, speed and flexibility - all built into a robust, aesthetic, ergonomic case.

***Designed in Australia for the World market, a Winner in every way you look at it.***

### *SPECIFICATIONS MICROBEE 256TC:*

*Central Processing Unit: Z80 with a 3.37 Mhz operating speed.*
*RAM: 256K of 'Dynamic memory'*
*ROM: 16K of built-in systems and network software.*
*Video display unit: Memory mapped 2K screen RAM. 2K colour RAM. 2K attribute RAM. 4K dual font ROM. Formats 40x24 Videotext. 64x16 BASIC. 80x24 Applications software. Flashing (Character on/off) Inverse.*
*Video: Monochrome standard 1 volt peak to peak composite video with negative synch.*
*Colour: RGB standard IBM format with positive or negative synch.*
*Graphics: 16K Programmable Character Generator of 131,072 pixels.*
*Keyboard: Full sized 92 Keys including numeric pad, 12 function keys and direction keys.*
*Drive: Single 3.5" double density 800K formatted drive.*
*Serial RS232 port: Can be used to connect modems, printers and to network with other computers.*
*Parallel Port: 8 bit I/O fully programmable with strobe pulse for centronic printers.*
*Sound: Built-in loudspeaker with volume control.*
*Real Time Clock: Using internal Nickel Cadmium rechargeable battery .*
*Power Supply: 10-12 volts at1.5A. Standby current 800mA, peak current during a disk access 1200 ma. For monochrome use the Microbee M-15 monitor supplies the power. For use with other monochrome or colour monitors a Microbee plug pack 110.012 is required.*

# THE EXECUTIVE SOLUTION

***Microbee 256TC, the all new, Australian designed, complete Executive Computer for your home and office. Send and receive your own Telex messages, use Viatel and communicate with other systems.***

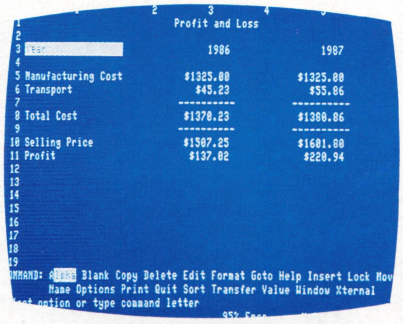

*Telecom approved No. C86/37/1499*

The Microbee computer has come a long way since it was first released as a build-it-yourself kit back in February, 1982. The new Microbee 256TC represents the latest break-through in the continuing story of - 'Microbee, the evolutionary Australian computer'. Establish Electronic Mail using Telememo and save a fortune on telephone bills! Because the versatile Microbees are extensively used in schools, the all new Microbee 256TC also serves as a homework station and home office wordprocessor. In fact, this package is the complete family computer that will fill your family computing needs for today and into the future.

Our New Microbee Automodem is a Low cost, software controlled direct connect modem which features autodialing and auto-answering. Dual 300/300 and 1200/75 bps data rates. The Automodem complete with a pushbutton phone, which can be unplugged for dedicated auto-answer applications and plugs straight into a standard phone socket. Telecom authorised.

| PACKAGE 3 COMPRISES: | |
|---|---|
| Microbee 256TC dual drives | $1,299.00 |
| 7030 High resolution RGB colour monitor | $899.00 |
| Power supply 1.5A (for colour monitor) | $25.00 |
| DP-100 Near letter quality dot matrix printer | $499.00 |
| Parallel printer cable included. | |
| Microbee Automodem 300+1200/75 bps | $299.00 |
| RS232C Serial Cable M-M included | |
| 256TC Manuals and software including Typing Drill, Learning Can Be Fun - Words, Learning Can Be Fun - Numbers, Microbee Demonstration disk, Simply write (Wordprocessor), Viatel (VideoText), CP/M (operating system), Telcom (Telecommunications) | $299.00 |
| TOTAL VALUE | $3,320.00 |
| PACKAGE PRICE ONLY | $2,999.00 |

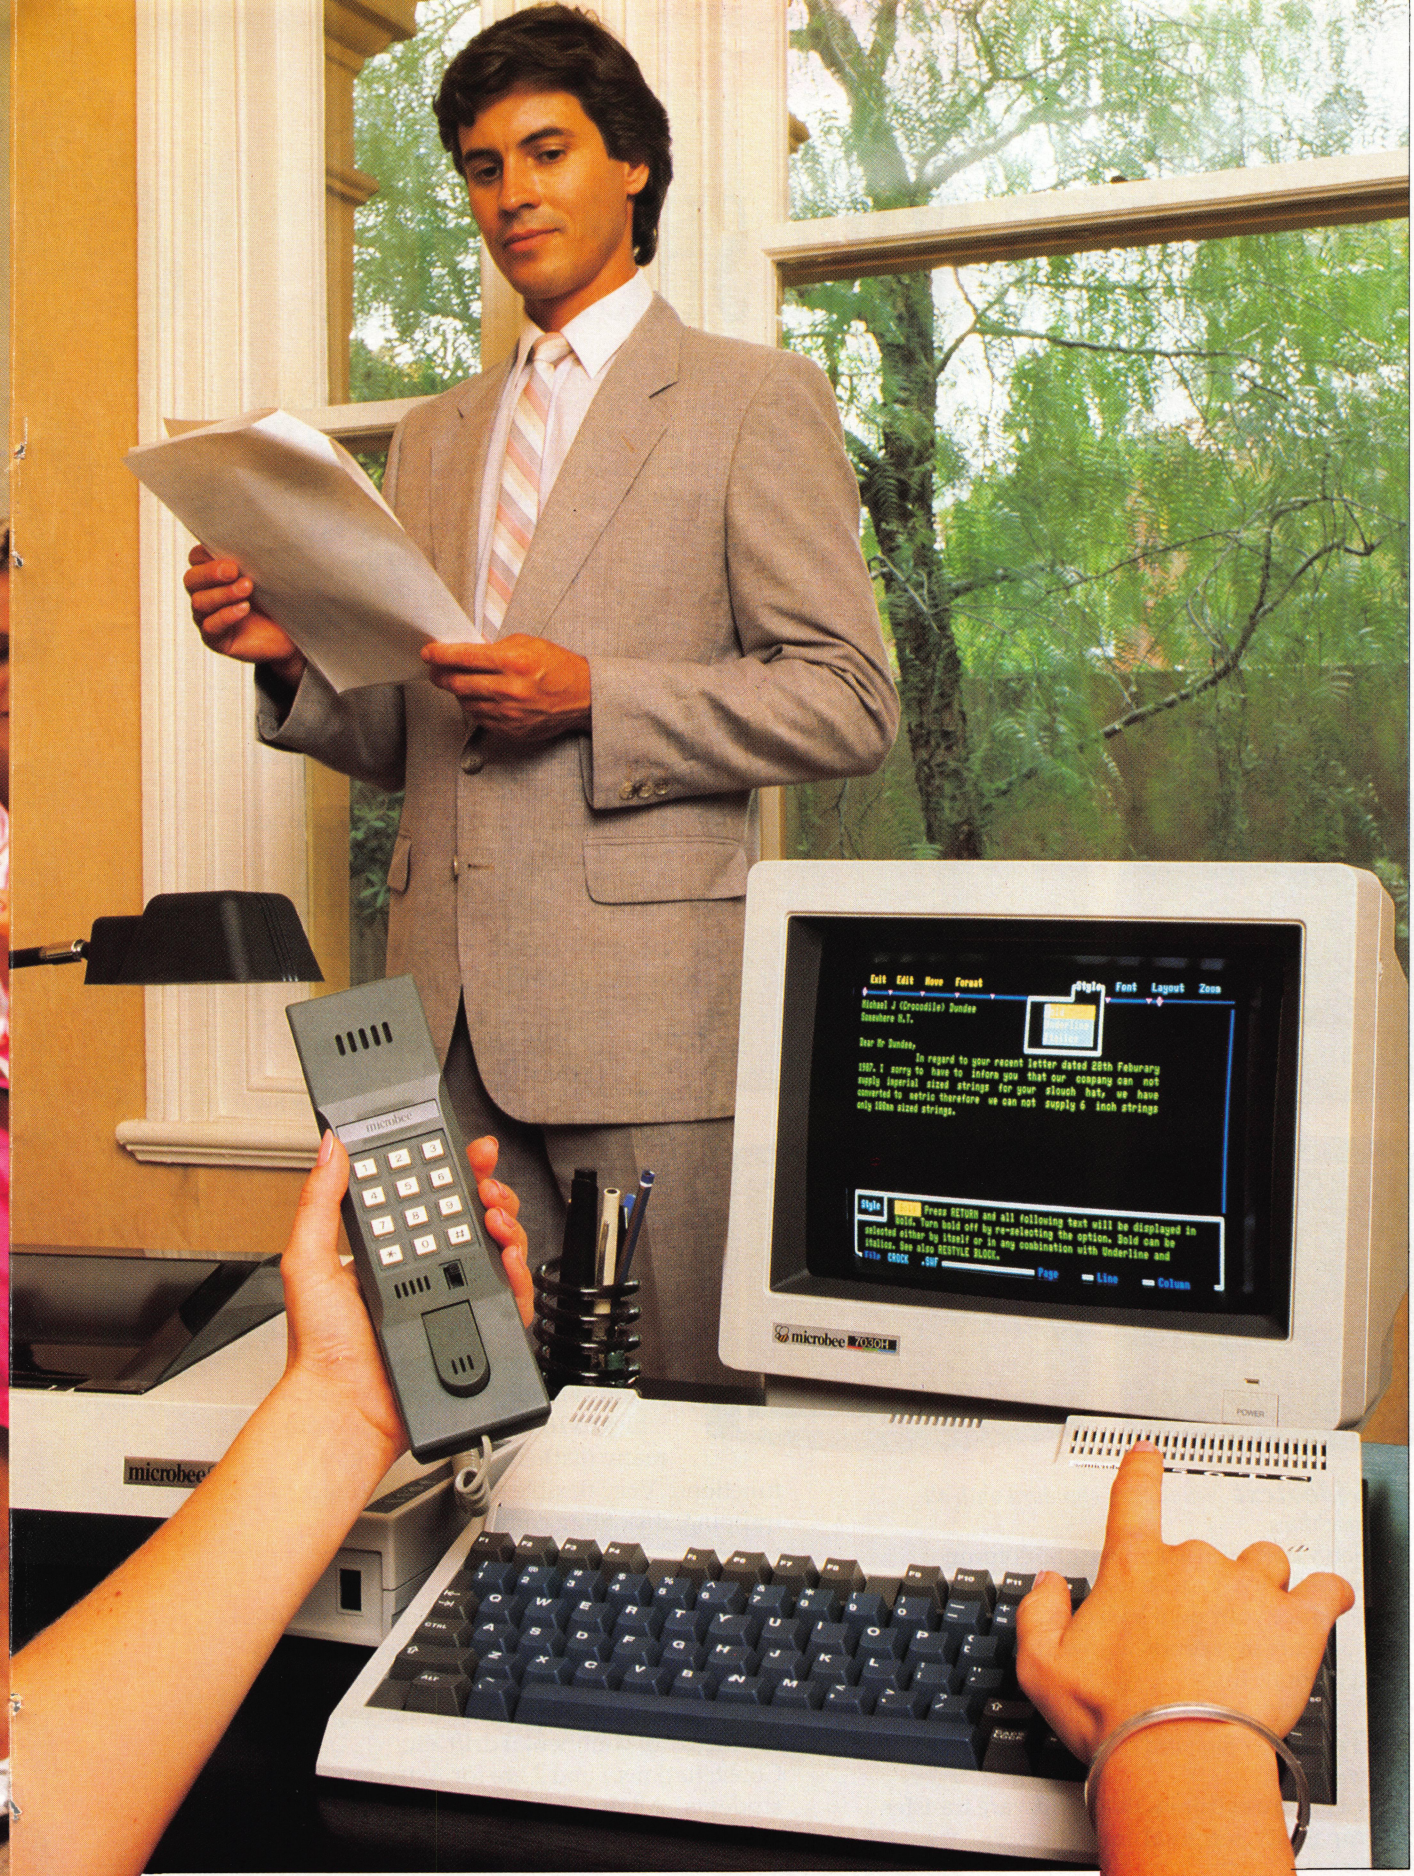

## *A Natural for Business*

Naturally, this 'Top of the Range' Microbee 256TC is suitable for educational use so your children can enrich their education utilising proven software in rich, full colour, high resolution graphics. Learning can be fun with colour and sound so the Microbee 256TC doubles as a home entertainment machine for all to use.

## *A Computer and Terminal too*

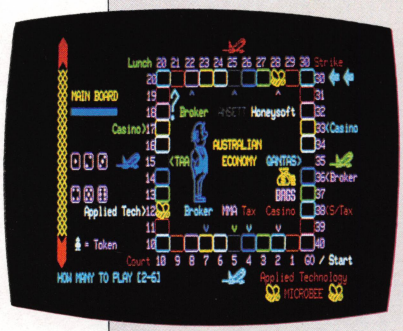

The compact and sturdy Microbee 256TC also doubles as a personal work station for use when connected to other computers. Standard software supplied enables the 256TC to emulate VT100 and VT52 DEC terminals as well as ADM3A and Televideo 912 terminals. You receive a complete computer as well as a terminal - for the price of one.

Dear Mr Dundee,
In regard to your recent letter dated 28th February
1987. I sorry to have to inform you that our company can not
supply imperial sized strings for your slouch hat, we have
converted to metric therefore we can not supply 6 inch strings
only 100mm sized strings.

# THE SOFT SHUFFLE

## *Microbee Software - 256TC approved series*

***Simply Write*** - *Supplied standard with all machines.*
Our new, super-friendly word processor written by Chris Nicol. Features pull-down menus, optional pop-up help screens, WYSIWYG (what you see is what you get) - on screen bold, underline and italics etc. Inbuilt font files (compatible with WordBee, WordStar etc.) handy zoom feature. Simply great!

***Videotext*** - *Supplied standard with all machines.*
See Viatel with Microbee's 80 column availability. Can be used to edit screens and produce your own Videotex. Download new software in seconds with software transfer by telephone lines.

***Telcom*** - *Supplied standard with all machines.*
Get into electronics mail. Software transfer capability, terminal emulation.

***Bee Alien*** - *Optional*
The twin brother of PC Alien, written specially for our Premium and Standard Microbees. Gives you access to files on disks from over 200 different computers - including the Personal Mini, Portable PC and IBM PC etc. Lets you copy files either way, print them out, list the directory, even format a disk for the other computer. Every owner of a disk 'Bee should have one!

***Wordstar Professional Pack*** - *Optional*
Now with CP/M ~MS-DOS transfer. Most widely used word processing program in the world! Now enhanced with the addition of Mailmerge, SpellStar and StarIndex utilities. Already configured to suit Microbee printers. Easy to use, selectable help levels. Excellent value!

***Penny Arcade*** - *Optional*
No less than five fast arcade-type games for the Microbee, all using hi-res graphics and full colour. Scavenger, Emu Joust, Subatomic, Leaping Lunar Limo and Galaxy - hours of challenge!

***Microsoft Basic*** - *Optional*
Most widely used version of Basic for 8-bit computers, throughout the world. Handles floating-point variables to 16 significant digits, with many mathematical and logical functions. Very flexible print formatting, error trapping, disk filing commands.

***Our World*** - *Optional*
Combines four valuable educational programs. Plate Tectonics 1 and 2 are for senior secondary Geology students, written by NSW secondary science teacher William Biddle, and explain the theory of continental drift, etc. Constellations 1 and 2 are for Astronomy students. All programs make extensive use of graphics.

***Electric Paintbrush*** - *Optional*
Microbee's equivalent to the very popular graphics drawing program MacDraw, launched on the Apple Macintosh. Lets you create all manner of exciting graphics pictures on the Microbee screen, using a standard mouse input device. These can then be printed out on the DP-100 printer.

***Turbo Database Toolbox*** - *Optional*
The ideal complement for Turbo Pascal - contains a complete library of Pascal procedures for database creation and management. Includes a free database manager program.

***Turbo Pascal*** - *Optional*
Borland's world famous compiler for the Pascal programming language - and it's fast! Built-in editor, one-step compiling, automatic overlays.

***Turbo Tutor*** - *Optional*
Borland's tutorial package for Turbo Pascal. A complete guide for the novice and advanced programmer.

***Microsoft Multiplan*** - *Optional*
Time proven version of this very popular and widely used spreadsheet program. Copes with worksheets of up to 255 rows 63 columns, provides many calculation functions. Also lets you link different worksheets, so changes automatically "ripple through". Very flexible, can be adapted for many applications.

***Colour Sampler*** - *Optional*
A great way to show off your new colour monitor. Nine different programs, including games, educational - and one which produces a TV-type test pattern screen.

***Visual Programming*** - *Optional*
Learn more about programming in BASIC, by seeing how routines work. Five different programs: Euclid's Algorithm, Select Sorting, Bubble Sorting, Prime Number Generator and Programming Hints.

***Social Studies Oracle*** - *Optional*
A mini data base or encyclopedia, which helps learn social studies. Covers six topics: Bushrangers, Explorers, Aviators, Inventors, 20th-Century People, and Planets and Stars.

***Other titles in this series include:***
Microbee learning can be fun
-With Words
-With Numbers
-More Learning Can Be Fun
Family Names
Gridfire
Hoards of the Deep Realm

*HOMEWORK STATION* ***PRICE $1299.00***
*(or rent for $45.00* a month.)*

*Package Includes: Microbee 256TC single drive M-15 High Resolution monitor 15kHz 256TC manuals and software including Simply Write, Videotext and Telcom.*

## PACKAGE 2

### HOME OFFICE SOLUTION

*MICROBEE 256TC -*
*HOME OFFICE* ***PRICE $1899.00***
*(or rent for $65.00* a month.)*

*Package includes: Microbee 256TC single drive. M-15 High resolution monitor 15kHz DP-100 Near letter quality, dot matrix printer and parallel printer cable, 256TC Manuals and software including Simply Write, Videotext, Telcom, Learnig Can Be Fun- Words and Numbers*

## PACKAGE 3

### EXECUTIVE SOLUTION

*MICROBEE 256 TC-*
*EXECUTIVE TELECOMPUTER* ***PRICE $2999.00***
*(or rent for $100.00* a month.)*
*Package includes: Microbee 256TC dual drives*
*7030 High resolution RGB colour monitor*
*Power supply 1.5A (for colour monitor)*
*DP-100 near letter quality dot matrix printer*
*Parallel printer cable*
*Microbee Automodem 300 + 1200/75 bps*
*RS232 Serial M-M cable*
*256TC Manuals and software including Simply Write, Videotext, Telcom, Typing Drill, Learning Can Be Fun- Words and Numbers.*

### *UPGRADES & TRADE-INS*

You can trade in your old Microbee keyboard or disk unit on the new Microbee 256TC. To simplify the procedure, the old Microbees must be returned direct to the factory at Microbee Gosford with payment and instructions for return freight.

### *TRADE-IN ALLOWANCES*

***1. Any old Microbee keyboard in working order*** ***$100.00***
***2. Any single disk drive unit (CIAB 3.5 or 5.25)*** ***$100.00***
***3. Any dual disk drive unit (3.5 or 5.25K)*** ***$200.00***
***(maximum trade-in per 256TC is 1 keyboard unit and 1 disk drive unit)***

Customers with ESE monitors which have built-in power supply need only buy the Microbee 256TC on its own as the printer, monitor etc. will be fully compatible. The price of the 256TC is $999.00 but a trade-in is possible: for example, send an old Microbee keyboard (16K, 32K, 64K or 128K) to the Upgrade Section at Gosford with payment of $899.00 plus $35.00 for insured return freight.

**Note all rentals are approximate only and quoted for 48 months contract with guaranteed UPGRADE/convert a rent option.*

***ORDERING BY 'PHONE***
For your convenience in ordering by phone, we have set up a toll-free (008) number. You can call this number from anywhere in Australia, for the cost of a local call. To take advantage of this service, call this number: ***008 02 4910***
Alternatively, call your nearest Computer Centre or Dealer.

***ORDERING BY TELEX***
We're happy to receive your order via telex - our machine operates 24 hours a day (even on weekends). Please send your order to this number: ***(AA) 72767***
(Our answer-back code is "APPTEC")

***ORDERING BY VIATEL***
You can send your order to us via our Viatel response frame if you're a subscriber.
For further information on this very convenient way to place your order, look us up on Viatel by accessing page: ****225#***

***ORDERING BY TELEMEMO***
Very shortly, you'll be able to place orders with us via Telecom's Telememo. You won't need to be a Telecom subscriber, either . The service will be accessible by anyone with a Microbee and modem.

Full details of your new Telememo ordering service will be announced shortly. So keep in touch!

# THE EVOLUTIONARY COMPUTER

## *Microbee Prompt Australian Support and Upgrade Service*

The Microbee computer has gone through many changes over the past five years. Microbee is the Evolutionary Computer. It is the only computer on the market where the owner of the oldest unit can upgrade to the newest at reasonable cost. In fact, we consider Microbee to be unique because it is designed and made here in Australia - we can always upgrade/trade-in older machines. The Microbee 256TC is no exception.

### *Microbee Quick Turn-around Service*

Because Microbee is made here in Australia and supported nationally by a network of dedicated dealers and Microbee Technology Centres we have introduced a really unique back-up feature. If your Microbee requires service for any reason, take it to a Microbee Technology Centre or participating dealer and it will be promptly repaired ready for you. Because Microbee is as widly used in Australian schools and homes the computer is widely supported through a network of clubs and user groups. Why not contact the closest one to you?

*Microbee's new Rental Plan- a great way to keep up with the latest technology developments.*

### *The Microbee Philosophy*

Microbee has become Australia's successful, locally designed and manufactured personal computer for a number of reasons. customers tell us this is because of up-to-date technology, cost-effective design features, standard inclusions of key application software, availability of upgrades to new models, support from third party developers and the large installed base of 65,000 Microbees operating in homes and schools Australia wide! Microbee computers grow as your needs change - no need to fear product obsolescence! It is a proven fact that change with time and the Microbee upgrade philosophy ensure that Microbee customers have the continuous opportunity to enhance their computing investment.

Microbee computers are intended to meet an integrated and cost-effective need for real computer applications. It is not just a 'box computer' but a complete solution. With full modular construction, top quality integrated software and proven world class performance. Microbee is indeed a winner.
