## Basic Play

Fight your way through 18 stages divided into 6 levels, then defeat the evil Count Dracula awaiting you at the top of the castle. You will lose a life if your time or health runs out, or if you fall into a hole.

1 Equipped weapon

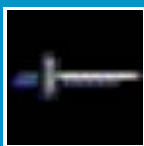

2 Heart count

Each time you use a weapon, you will lose one or more hearts.

3 Lives remaining

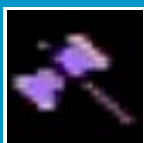

4 Your health

5 Boss's health

### Dagger

Its attack power is low, but it can be thrown over long distances. It will disappear when it hits an enemy.

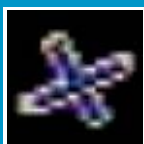

### Axe

Its attack power is high, but it's a little slow and it flies in an arc.

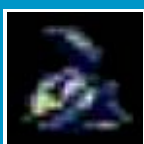

### Holy water

This will explode on the ground when thrown and burn enemies as they walk through the flames.

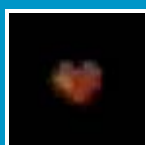

### Boomerang

This powerful weapon will return to you after it is thrown.

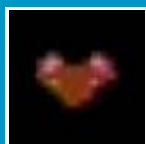

### Watch

Use this to stop enemies in their tracks. It will cost you five hearts for each use.

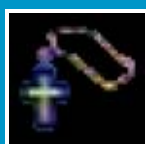

### Small heart

This will give you one heart.

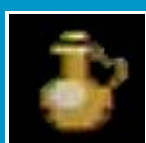

### Large heart

This will give you five hearts.

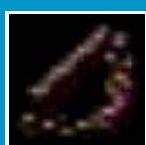

### Cross

This will destroy all on-screen enemies when you pick it up.

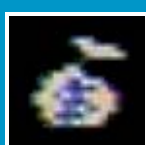

### Involuntability potion

This will make you invulnerable for a few seconds.

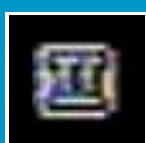

### Morning star

This will turn your whip into a chain. Pick up another one to increase its length.

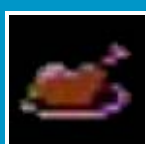

### Money bag

This will increase your score. Red bags are worth 100 points, blue bags 400 and white bags 700.

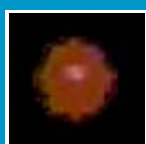

### Double and triple shot

These items increase the number of consecutive attacks you can make with your weapon.

### Pork chop

This will restore some of your health.

### Magic crystal

This will fully restore your health.

Lose all your lives and it will be game over. Select CONTINUE on the game over screen to resume your game from the beginning of the last level you reached, or select END to quit your game and return to the title screen.
