DEMON BLUE

DEMON BLUE is the re-incarnation of "Harrison", a mischievous schoolboy who was born in a small town in Northern Scotland. Harrison decided one day that school lessons were just that little bit boring, so he gathered his fishing tackle together and headed for the local pond. Whilst he was sitting on the bank side he saw a big fish jump out in the middle, where the deeper water was. He decided that he would try to catch this fish and then boast to his friends just how clever he had been. Unfortunately he slipped on a wet stone and that was the last that we saw of poor Harrison.

If only he had gone to school that day as he was supposed to, or been able to swim he would have lived to tell the tale, but alas young Harrison now finds himself in a fantasy world with more than a hint of Greek scenery. Hidden energy pots for food and eight scattered keys will help to unlock Harrison's detention and bring him back to earth as an older and wiser person.
