ON HOT TIPS LIKE THIS FOR
SUPER MARIO BROS. 3!**

Earn a ton of 1-ups in the abandoned Fortress of World 7 in Super Mario Bros. 3.

1. Find and activate the Switch Block. Then collect as many Coins as you can and enter the bottom door when the magic wears off.
2. Step inside the room with the checkerboard floor. Then go back to the room with the Switch Block.
3. Activate the Switch Block and collect the Coins again. Repeat the process until you've collected enough Coins to earn 99 1-ups!

WANNA KNOW HOW TO NEVER GET LOST?

HERE'S HOW!

Only Nintendo Power and the Strategy Guides give you such excellent video mapping. The Nintendo technicians piece together game screens to show you the tactics and action courses — all in color, of course — to guide you through the game. That's video mapping. And you can't get it this good anywhere else!

I GET IT STRAIGHT FROM THE PROS!

PAUSE

RESUME

Every issue of Nintendo Power and each Strategy Guide comes to you packed with tips to help you master your game — just like this one from Blaster Master.™

The sinister stage rulers in Blaster Master can be tough, but there is a way to beat some of these monstrous mutants with a single Grenade!

When the Grenade hits the target, pause the game. The Grenade will remain active! Resume the game after a few seconds and the enemy will go down in defeat!

This trick will put an end to the creatures at the end of Stages 2, 4, 6 and 7.

CAUTION

Nintendo recommends against using a rear projection television with your NES as image retention on the screen may occur.

WARNING

DO NOT USE WITH FRONT OR REAR PROJECTION TV

Do not use a front or rear projection television with your Nintendo Entertainment System[®] (“NES”) and NES games. Your projection television screen may be permanently damaged if video games with stationary scenes or patterns are played on your projection television. Similar damage may occur if you place a video game on hold or pause. If you use your projection television with NES games, Nintendo will not be liable for any damage. This situation is not caused by a defect in the NES or NES games; other fixed or repetitive images may cause similar damage to a projection television. Please contact your TV manufacturer for further information.

READ BEFORE USING YOUR NES

A very small portion of the population may experience epileptic seizures when viewing certain kinds of flashing lights or patterns that are commonly present in our daily environment. These persons may experience seizures while watching some kinds of television pictures or playing certain video games. Players who have not had any previous seizures may nonetheless have an undetected epileptic condition. We suggest that you consult your physician if you have an epileptic condition or if you experience any of the following symptoms while playing video games: altered vision, muscle twitching, other involuntary movements, loss of awareness of your surroundings, mental confusion, and/or convulsions.
