Our full contents listing starts just over the page

Super Metroid is here. It's a massive game, it was a massive hit in Japan and we're giving it massive coverage. Find out why on page 36.

The world of Super Nintendo follows fashions and trends, just like everything else. And, as you will be fully aware, football is very trendy at the moment. It's all to do with the World Cup, of course. But a great many software publishers out there are either releasing new games or updating their existing titles to take advantage of the greatest media event of this year.

So it makes sense for us to gather together all the old football games and add all the latest ones in a massive feature, which will tell you everything you need to know about playing soccer on your SNES. Not only is the feature (see page 26) packed with buying recommendations and info, but it's also fascinating to see how the playability has progressed each year, and how the Japanese view our national sport.

Bought any cheap games lately? If this sounds like a stupid question because there are no cheap games on the SNES, think again. The machine is very established nowadays, and the early games which helped to make it so have been replaced many times over with games which are generally better (but often much worse). So old games are available for much less than you'd think. Turn to page 62 to find out more.

If you own a Game Boy, you'll be aware that the playing style is vastly different to the SNES, but can still be a lot of fun, despite the graphics and sound limitations.

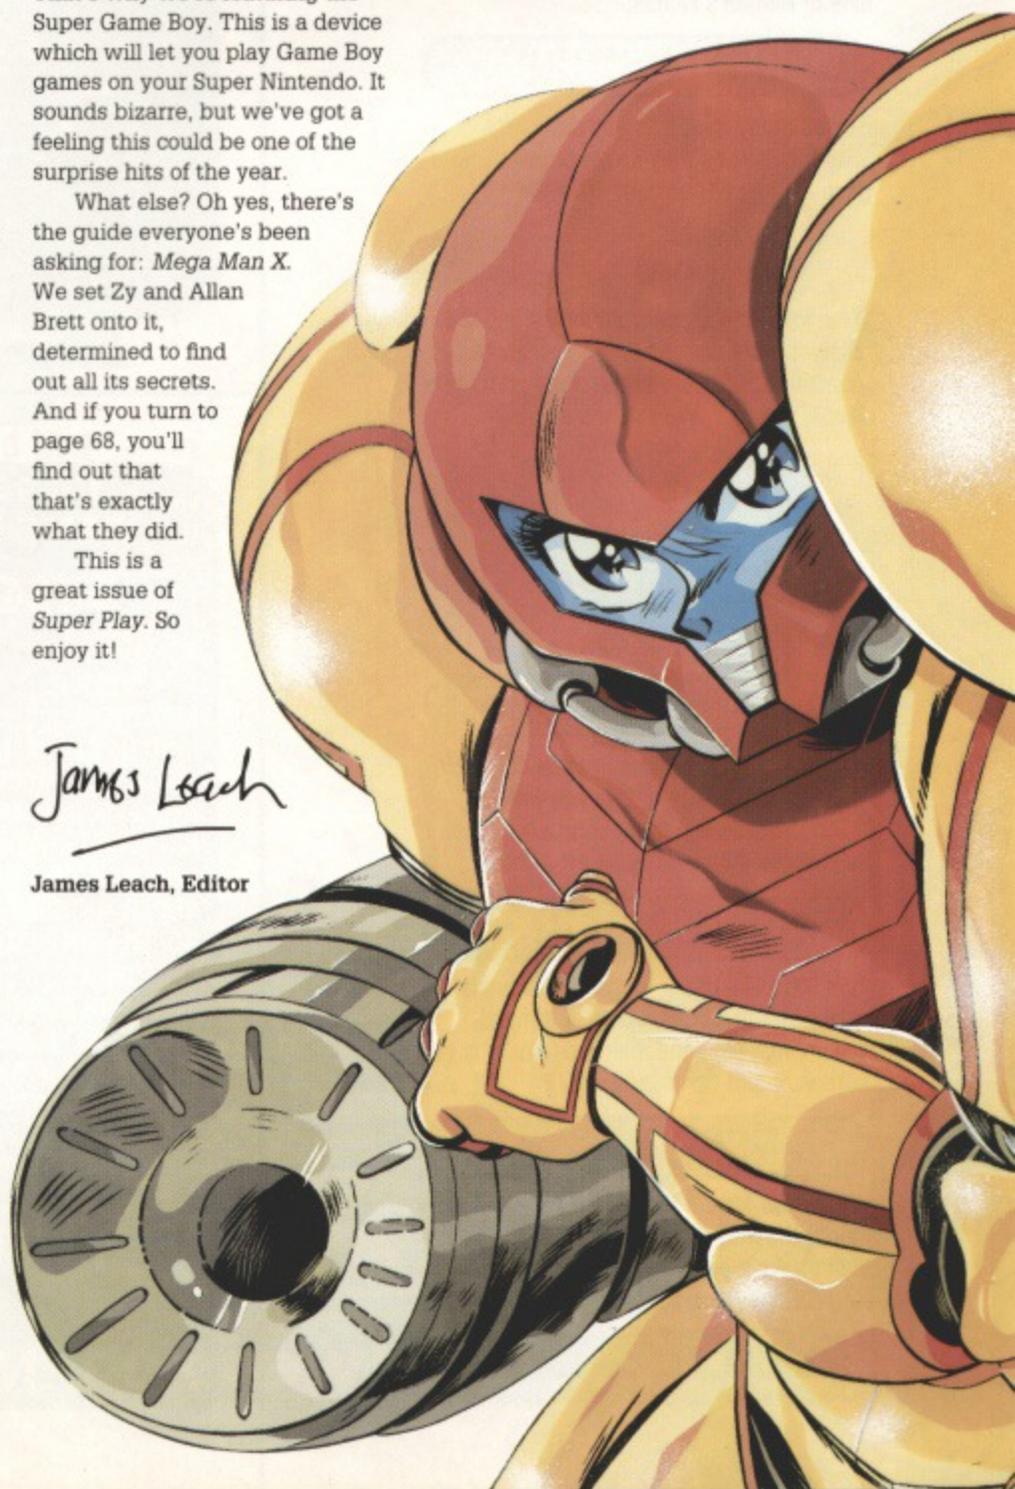

That's why we're featuring the Super Game Boy. This is a device which will let you play Game Boy games on your Super Nintendo. It sounds bizarre, but we've got a feeling this could be one of the surprise hits of the year.

What else? Oh yes, there's the guide everyone's been asking for: *Mega Man X*. We set Zy and Allan Brett onto it, determined to find out all its secrets. And if you turn to page 68, you'll find out that that's exactly what they did.

This is a great issue of *Super Play*. So enjoy it!

NEWS NETWORK SUPER NINTENDO NEWS

In Super Express this month: Nintendo and Williams talk Project Reality; *Pac Attack*, *Eek! The Cat* and *SOS* previewed; news of *Super Street Fighter II X*; and those lovable rogues, Kris and Tel, are back in Blabbermouth.

In a surprising move by both companies, Nintendo has announced a deal with Williams - the manufacturer of *Mortal Kombat* - which could have serious consequences for the future of the Japanese corporation. It could even mean the end of Nintendo's 'family' policy regarding software content.

Arcade supremos Williams (WMS Industries) is the latest to follow Silicon Graphics and Rare by committing itself to undertake development for Project Reality. The company has a respected reputation in the coin-op market, with a splendid track record that includes both *Mortal Kombat* games and *NBA Jam*, as well as classics like *Robotron* and *Smash TV*. Now it has decided that it wants PR technology to be at the heart of its next wave of arcade machines.

The first game for this new wave has already been announced: *Killer Instinct* will be a futuristic 3D beat-'em-up in the *Virtua Fighters* vein. Interested parties will be watching the new arcade machines closely, as they should give an early indication of the Project Reality engine. It's on the software

9

side where the real controversy lies, though. High-profile games publisher Acclaim has a deal which gives them the rights to produce home console conversions of Williams games: but this will expire in March 1995 – then Nintendo will step in and take over the exclusive license to all home versions. This means we can expect not just *Killer Instinct*, but also any potential *MKIII* or *NBA Jam II* sequels, to appear only on Nintendo machines. With Williams' record for creating monster hit games, it's an arrangement that could prove incredibly lucrative.

The deal will have major repercussions throughout the Nintendo organisation, not least in terms of its software philosophy. Currently, words like 'kill' and 'killer' are not allowed to appear on a cartridge. Howard Lincoln, Nintendo of America's chairman, explained that the company was 'in the process of evaluating' its own guidelines. 'It's fair to say you're going to see a much more competitive and flexible Nintendo in the future. We will continue to be a family orientated company, but when the [US games] rating system comes in we will have the license to go a little further'.

It seems that Nintendo is finally ready to

offer a more mature approach – many industry observers believe that it was only a matter of time. With Project Reality, the company plans to step into a more adult arena where software will determine the market leader. The 64-bit superconsole's credibility would be seriously damaged if its games had to be sanitised for 'universal' appeal to all age groups.

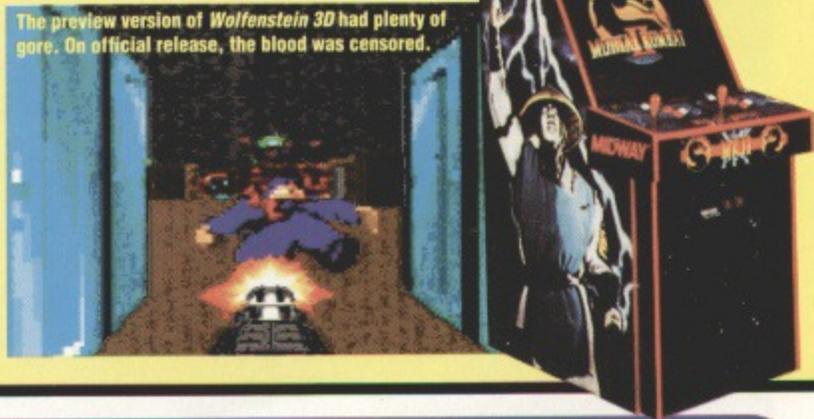

Super Nintendo owners are unlikely to see any immediate changes in policy. The company built its reputation on the Famicom (meaning 'Family Computer'), and will probably remain cautious with existing formats. In the recent American Senate hearings, Nintendo escaped much of the criticism levelled at Sega because of this reputation for wholesome entertainment. Until the US games rating system is established, we'll continue to see carts like *Wolfenstein 3D* and *Mortal Kombat* being censored.

Meanwhile, the rumours of Project Reality continue to thrive unchecked. Square,

the developer of *Secret Of Mana*, is said to be considering a massive *Final Fantasy* game (perhaps even *FFVII*, the next in the series) occupying an unprecedented 126 Mbit cart for the new console. Completely unsubstantiated don't-quote-us-on-that news is that *Legend Of Zelda V* will be for the SNES after all, appearing around Christmas. It's one of those stories you want to believe, that's the problem...

*Quoted from *Computer Trade Weekly*, issue 482.

The preview version of *Wolfenstein 3D* had plenty of gore. On official release, the blood was censored.

AKIRA AMERICAN COLLECTOR CARDS

Exclusively on the cover of *Super Play* next month you will find a set of collector cards, featuring action from the classic anime movie, *Akira*.

These cards are to mark the entrance of Manga Video into the collector card market. Trading cards, as they're known in the US, are big business. In 1992 US collectors spent over \$300 million on cards. And over 50,000 dealers/buyers attended the Chicago 1993 Collector Card Convention.

Super Play's July issue will carry three exclusive *Akira* cards on the cover, each *Tetsuo finds himself blessed with super powers...*

officially licensed by Manga. It's the biggest promotion of its kind ever, and because the cards on the cover of *Super Play* will not be available anywhere else, they're immediately collectable and rare.

Manga will be releasing the *Akira* Full Master Set of 100 cards, as well as the prized Prism Sub Card Set. They'll also be distributing the *Special Collector's Album*, to keep your

... but gets carried away. True hero, Kaneda steps in to help.

collection in mint condition, and maintain its value.

Super Play's advice is to get hold of next month's copy of the mag and hang onto those images. Manga Video's *Akira* trading cards are going to be hot property.

Next month, we'll have more info on the cult you can be in on from the beginning.

SUPER STREET FIGHTER II X

Capcom have subtly confirmed that *Super Street Fighter II* is coming to the SNES this Summer. The news coincides with the arcade debut of the latest *SFII* coin-op, *Super SFII 'X'*.

As you'd expect, *X* gives new moves to the old characters. Now Honda can squash you into the floor, whilst Ken has an aerial throw and a knee grab. Zangief's new move stops fireballs, whilst D Jay and Chun Li have a three-hit air kick. Improvements include Dhalsim's Yoga Flame, which can now be aimed upwards into the air.

There's also a slight change in strategy. When a special move is performed, an energy bar fills up. At full capacity it enables you to perform a Super Move – like Ken's five-hit Dragon Punch, or Zangief's triple back-breaker and spinning power drive.

But where's *Street Fighter III*? Capcom have taken out an advert in the American computer mags which simply reads 'SUPER', in big letters, 'coming this Summer'. Good news if you're hoping for another *SFII* game on your console, but a disappointment for those expecting something new. Christmas sales of *SFII Turbo* weren't as high as many had forecast, so we'll be interested to see just how much excitement this news generates. And the big question remains – will the SNES cartridge contain 'X', or just *Super Street Fighter II*?

Meanwhile, Data East has dealt an almighty Dragon Punch to Capcom in the California Law Courts. Capcom had claimed that *Fighter's History*,

a Data East coin-op beat-'em-up, infringed their copyright by blatantly stealing the 'total concept and feel' of *Street Fighter II*. True gamefans would probably have sided with Capcom in this particular instance – the game features uncannily identical characters and moves – but Judge William Orrick settled the case in Data East's favour, stating that the similarities were 'unprotectable commonplace features... such as its stereotypical fight characters and its reliance on unoriginal fighting techniques derived from the martial arts'. Publishers of other *SFII* clones were watching the case worriedly, but it seems they can breathe a sigh of relief. *Fighter's History 2* is in development.

They've put the speed back in *X* and added some lovely graphical touches.

Grand Master Challenge

How many more *Street Fighter* games will we see, before the interest fades?

Apparently, Cammy gets more fan mail than Chun-Li now. But they're still chums.

FANHUNTER

You'll find no finer fanzines

By Zy Nicholson

This month's postbag was reassuringly packed with superb zines. Best of all, I found some that were incredibly cheap – even free! – and it gave me a warm, gooey feeling inside to find, finally, people who were producing and distributing fanzines for the sheer love of it. Shucks.

Irresponsible Pictures

It all started when the editors – Andy, Russ and Stuart – went to an anime convention and had some scummy, poorly-photocopied little fanzines thrust in their faces. 'We could do that,' they said to each other, 'and what's more, we could make it even scummier!' So they did. *Irresponsible Pictures* is out now, and this first issue is completely free. Providing 'anime and manga coverage for the Oxford area' (phew – for a second there you could hear the good folk of Oxon panicking), the zine contains reviews and artwork in equal measure. They're also after contributions from the readership (but they've bagged the *Battle Angel Alita* review for themselves, damnation) for the next

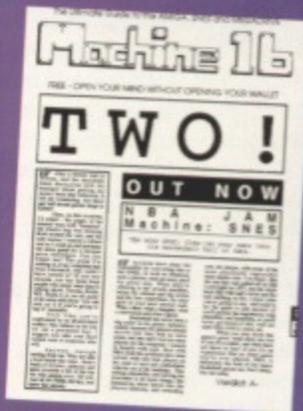

The not-at-all scummy *Irresponsible Pictures*.

issue. If you send an SAE to Andy Chesterman at 3 Wingate Close, Blackbird Leys, Oxford OX4 5BL, you'll get a free first issue, so you can't complain. Recommended.

Machine 16

How do you keep your news and reviews up-to-date? Produce a smaller fanzine on a more regular basis. That's the idea behind *Machine 16*, whose editorial folk hope to keep a new issue coming out every three weeks. The zine itself is actually more of a newsletter, comprising six pages of gossip and reviews for the SNES, Amiga and Mega Drive. It's extremely well-written and laid-out, and there's plenty of scope for reader participation. And it's free! Yes, they're just giving them away, so subpoena them at *Machine 16*, 13 Southbrook Road, Countess Wear, Exeter now and demand to be on their mailing list. It would be thoughtful if you enclosed an SAE to help them along, too.

Small and regular. And tightly packed.

Symbiosis

The first issue hasn't even appeared, but already the editor Tim Kemp has

demonstrated his sound marketing acumen by sending out promotional flyers to all the major magazines. A brazen media hussy he may be, but on the strength of this first sampler it looks like *Symbiosis* will be a winner. Tim seems to be following the software industry trade mags for his news, but he also intends to print playing guides, cheats, reviews, articles and lots of letters covering all Nintendo machines. The problem, as ever, is that he needs people 'out there' to shower him with the fruit of their talents. If you want to get in on a promising fanzine, then take a look at this sampler by sending 10p and a stamp to *Symbiosis*, 36 Globe Place, Norwich, Norfolk, NR2 2SQ. Shamelessly promoted, perhaps, but Kemp's project deserves to do well. Get scribbling now.

Become a symbiont. (You're sacked – Ed)

SNES Gaming

This month's honourable mention goes to *SNES Gaming*, which is rather more soberly constructed, but still manages to impart some of the editor's enthusiasm for his SNES. The 'nuggets' of news, reviews and gaming data aren't that earth-shattering, but this belies a high level of understanding which suggests that Paul Ganley is fairly well-informed (he reads *Edge*, we suspect). Certainly worth a look for 50p and a large SAE to 13 Endrick Drive, Bearsden, Glasgow G61 2EA.

THE THREE MUSKETEERS

May your swash never buckle

Loriciel

Loriciel's next release for the SNES will be *The Three Musketeers*, which, thankfully, draws its inspiration directly from the Dumas classic and not the recent film (nor, indeed, those cheesy '70s interpretations with Michael York and lots of British comedy actors hamming it up). Taking a top false 3D perspective – like *Zombies*, *Kikikaikai* and *The Chaos Engine* – you can explore the towns and palaces of France in the reign of Louis XIV.

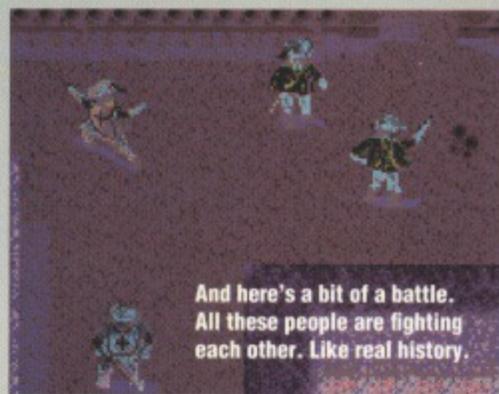

We're pleased to hear that, unlike the other games in this genre, this one will work with a multitap. Four players will be able to control Athos, Porthos, Aramis and D'Artagnan simultaneously, so it really will be all for one and one for all.

You have to fight the villainous Cardinal Richelieu and the scheming Milady in order to protect the honour of the Queen. When fighting with the Cardinal's guard you'll be able to fence with your rapier or use special weapons like flintlock pistols and petard bombs. The game's looking pretty good so far, and we'll bring you more news before it appears this Autumn.

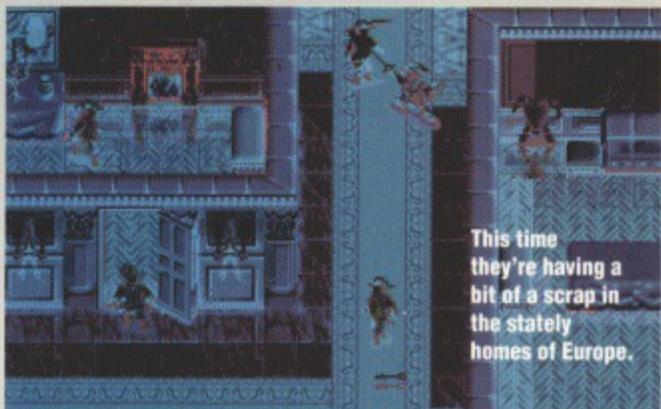

(We also understand that, in typical fashion, the Americans threw up their arms in despair at the name of Loriciel's *Val D'Iserre Championship*. It's to be called *Winter Extreme* in the US.)

Here's a lovely slo-mo of a geezer shooting a gun.

And here's a bit of a battle. All these people are fighting each other. Like real history.

This time they're having a bit of a scrap in the stately homes of Europe.

CATGIRL: NUKU-NUKU

● Cert PG ● 90 mins ● £10.99

● Crusader Video

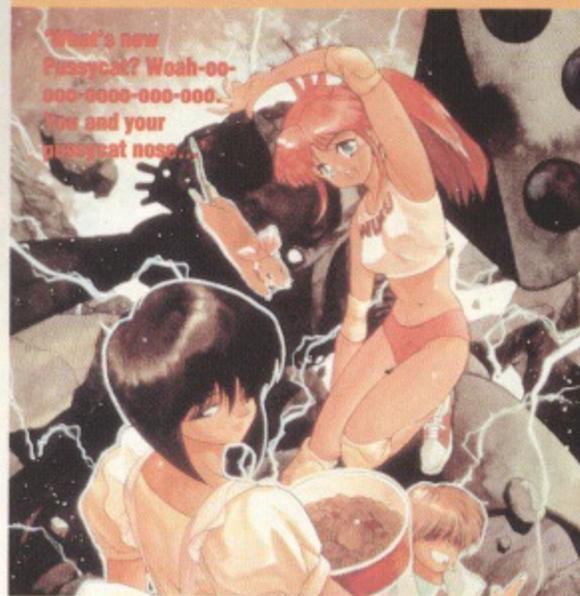

We knew this game as *All-Purpose Cultural Catgirl*, which is a literal translation of the Japanese name. But apart from the name-change, this is the same show. In fact, if you buy this video, you'll get three episodes of *Nuku-Nuku* in one. That's a 90 minute android-fest.

The difference between this film and many of the Manga Video releases is that it doesn't involve the same levels of evilness or violence. The characters, especially Nuku-Nuku herself, are well developed; and the story, for all its far-fetchedness, hangs together well. This doesn't mean you'll understand everything that's going on. But would you really expect to?

Put simply, an android designer cobbles together some teenage android cat-type thing, which gets involved in a parental feud involving mega weaponry. She witnesses large assault-suit battles, and is even menaced by a demon robot octopus. So if you thought this was a simple tale of honest Japanese folk, think again. Anime is never that predictable.

The quality of the drawing is most pleasing, and *Catgirl: Nuku-Nuku* is a worthy addition to your anime collection. There is only one point which might be worth bearing in mind, however; the video is dubbed using British actors with regional accents. Hearing a Scouse robot sounds very strange at first, because you'll be used to American voices, but bear with it. They soon blend into the background.

Overall, *Catgirl: Nuku-Nuku* is highly recommended. Understandability factor: 6 out of 10.

What's new Pussycat? Woah-oo-ooo-ooo-ooo-ooo. You and your pussycat nose...

FINALS FIGHT

You are a promising young cadet. Your government has given you a meagre allowance and dropped you in a strange bureaucratic world full of new smells, sounds and mysterious people. You'll need all your wits and cunning to survive the nightmare ahead. We refer, not to a *Shadowrun* sequel, but to *University*. If higher education makes you think of ivory towers and dreaming spires, where pipe-smoking professors deliver soporific lectures on Cartesian Dualism, then think again. Video games are invading academia.

Middlesex University will be offering a games development degree from September this year. The first of its kind in the UK, this one-year intensive Masters course will be open to students with qualifications in computer programming and design. They'll be taught the

intricacies of sprite handling and multi-layer parallax, and the final group project will be to create a new video game. It's hoped that companies in the games industry will support the course with sponsorship and equipment.

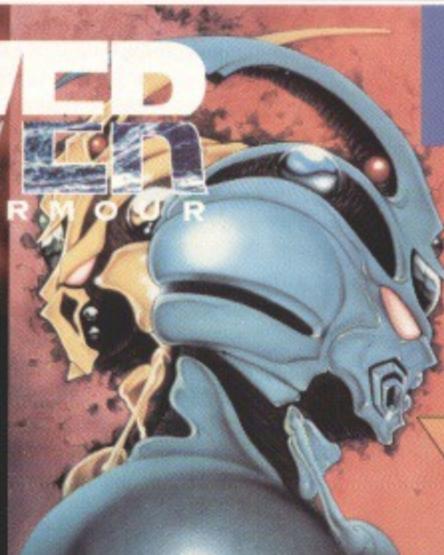

That's exactly what's happened in Canada, where Nintendo of America has provided a computer graphics college with SNES development systems. Mr Minoru Arakawa, president of Nintendo's US operations, explained that 'while studying text books and writing term papers may be important elements to obtaining a degree from a college or university, students on this course will be clutching video game controllers and learning about sprites and polygons to graduate'. Lucky gits. We had to read loads of Chaucer and swot up on languages.

GETTING AN EYEFUL

From miniature wonders of the world to music CDs and suicide advice. *Super Play* brings you all the hottest news (?) from Japan.

Never again should tourist sites of the world quake in fear of an invasion of camera-toting Japanese, for now they've brought the world to their own doorstep. Three miles north-east of Tokyo, Tobu World Square is a model village and park which honours the architecture and monuments of the world - except that everything is 25 times smaller than in real life. The park covers 20 acres and is home to 140,000, 7cm high people.

Statistics alone can't express how big this miniature village is; you can do an awful lot in just one day's visit. Start by visiting New York and the Statue of Liberty, 42nd Street and Harlem's red brick tenements - complete with graffiti. Everything's there but the crime. Then again, you'd need a pretty big gang of the little people to carry out even the most basic of muggings.

Then it's on to Moscow to see the cathedral of St Basil, Paris for the

A CD FOR YOUR SNES?

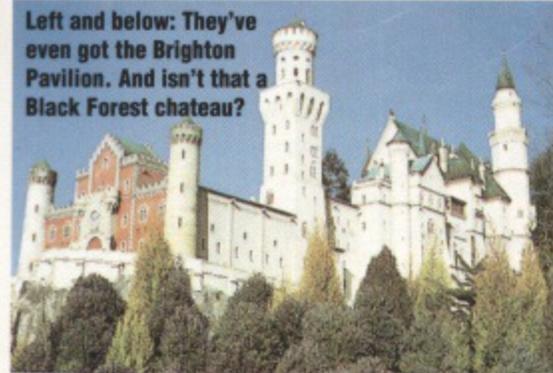

Above: Everything you ever wanted to know about game music? Yikes!

The current infatuation with video game music is going a little too far. MC Mario's rambling raps and the dodgy *Street Fighter II World Warrior* disc are just the tip of the iceberg. Over in Japan, you can now buy a magazine completely dedicated to video game music. *Super Famicom CD Magazine* is absolutely stuffed with everything you never needed to know about in-game music, and even comes with a compact disc of top tunes! A quick browse through it's pages reveals numerous treasures.

The mag begins tamely enough, with reviews of in-game music - the *Final Fantasy* games are the favourite at the moment. Though primarily a Nintendo mag, Neo Geo information sneaks in

Left and below: They've even got the Brighton Pavilion. And isn't that a Black Forest chateau?

Eiffel Tower, Italy for the Colosseum, India for the Taj Mahal, China for the Forbidden City and Egypt for the pyramids. They've even got Big Ben and the Houses of Parliament, red buses and all. Famous Japanese monuments are also featured - best of all is the spectacular Kiyomizu Temple. You've seen all this, but you haven't even begun to explore the park.

You can collect some little white tubes on the way in, which when held to up your eye, create the impression that you're standing next to the real thing, but considering that people are usually photographed with their backs to the wonders of the world, does it really matter if they were there anyway?

Below: Do you know that we asked half a dozen people who wandered into the *Super Play* office what they thought all these buildings were. The only one everyone got right was Big Ben. Actually, that's the only one we knew too. Er...

Left: A rather fit man, shame about his hairy bod. (Thanks Lisa - Ed.) there as well - superlative stuff they reckon. Next there are features telling you how to find the best music in the games; and they even have interviews with game music composers. At last you understand why so many games incorporate a sound test! Then, there's the most tiresome section I've ever seen... a catalogue of every video game music CD ever released. You wouldn't believe how many of them there are! Seminal works

include *Konami Hits Factory*, classical orchestra versions of the *Gradius* sound tracks, and most terrifying of all, a *Street Fighter II* karaoke CD - *Sing Along-a-Ryu*. You'd better pray that it doesn't catch on over here!

Strangely enough, the most recent edition has a section entitled *That's Virtual Idol*. Six sizzling pages are devoted to sexy women in video games. They should really get out to a club, listen to some real music and meet some real girls!

Below: Chun Li looks pretty excited about it all - maybe she's been signed up to release a CD single? Perhaps not. Below left and bottom: Some pages from the mag. Can anyone read Japanese?

SNIPPETS

If it wasn't here in black and white, you wouldn't believe it, but it's all true. Japan, the wealthiest nation per head in the world, has made plans to start eating excrement. Now, we've always enjoyed Japanese food - the occasional ramen and the odd gyoza - but this? Apparently, scientists in Okayama City have already created a meat substitute made from sewage - and it's supposed to be good for you!

Sewage bacteria are harmful when alive, but when dead they are a rich source of protein. To make them edible, the waste is filtered and reduced to a grey-brown mud, which when mixed with soybean, food additives and flavouring, is supposed to taste just like beef. I'll take their word for it - until it passes Japan's very strict food control laws, that is.

If the prospect of eating your own excrement is too much for you, you might want to check out Japan's latest best-seller - *The Complete Manual Of Suicide* - instead. It has sold over 70,000 copies in Japan already, but don't worry about a resultant wave of suicides, since the author, Watara Tsurumi, insists that his book is designed to show just how nasty suicide is. So, next time anyone wings about the violence in video games, merely explain that it's designed to show how horrible violence is. Watertight defence.

The very best way to avoid suicide, however, is to be careful of your stress levels. And you can now chew your trauma's away with stress gum, produced by S B Shokauhin Inc of Tokyo. Chuck in a stick of gum, masticate for about five minutes and the colour will change. If it turns pink, then you're fine and well-balanced. But if it changes to green it means you are suffering from unhealthy stress. The gum reacts to your body's pH level, you see, and although there are currently no plans to market it outside the UK, we can't wait. Oh, by the way, if the gum comes out red, then chances are you have bleeding gums and should seek urgent medical attention.

However, pretty soon Japan won't have any people in its workforce getting stressed, anyway. The Keizai Koho Center in Tokyo has published a report with the shocking revelation that Japan owns twice as many industrial robots as the rest of the world put together. They've got 274,210, the US have 41,304 and we in the UK are bumping along the bottom of the list with a mere 6,418. Most of those are probably Japanese-owned anyway!

FANTASY QUEST

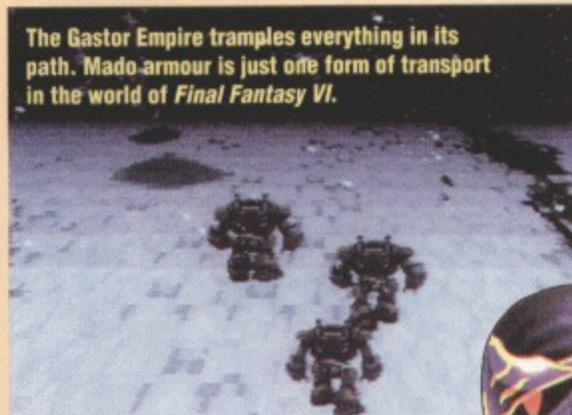

by Nihon Sekai-Yusu

14

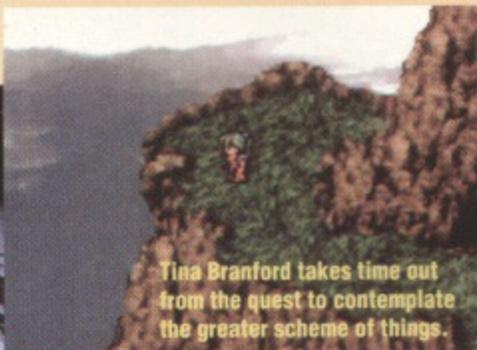

The biggest RPG release of the year finally arrives, while elsewhere, ogres cling together, Kabuki rocks and Japan is invaded by Norse gods.

FINAL FANTASY VI

Square Soft • 24 Mbit + Battery back-up

The Gastor Empire tramples everything in its path. Mado-armor is just one form of transport in the world of *Final Fantasy VI*.

Tina Branford takes time out from the quest to contemplate the greater scheme of things.

Without a doubt this is the most eagerly awaited RPG of 1994, and now the lucky Japanese can play Square Soft's latest blockbuster.

As described in previous editions of *Fantasy Quest*, the plot of *Final Fantasy VI* revolves around the fact that magic has been all but destroyed in the land, only to be replaced by the terrifying force of the Gastor Empire and its vast army of machines. Thankfully, however, there are those who are not happy with the state of things, and so the quest begins. Although magic in the world is almost dead, its culture has lasted over 1,000 years and the power can still be harnessed to be used by good or evil. This power comes in the form of the magic stones, and just as in the other *Final Fantasy* games, there are a number of them to collect, each having their own elemental power.

All the characters in *Final Fantasy IV* are brand new – we showed you the heroine, Tina Branford, and the hero, Lock Cole, a few issues ago, but some of the other newcomers have a much darker side to their nature. For example, Shadow, as his name suggests, is a cold and

Remember Edge, from *FFII*? Well Shadow is much harder.

moody figure. His cold countenance and mechanical way of thinking make him an almost indestructible force to be reckoned with. Adding his powerful guard dog, Interceptor, to this partnership makes for a daunting team.

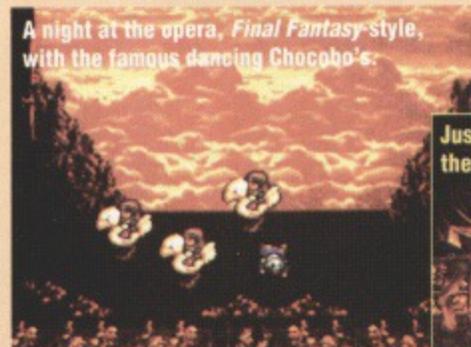

Another new character is Cayenn Garamonde – a samurai who's been displaced from his historical time zone. The resulting culture shock he feels is a constant problem for this warrior, which is only resolved at the game's conclusion.

Another new character, Setzer Gabbiani, is a true mercenary (akin to Han Solo, but with a bit more panache). He owns his own airship – just like Han – and loves gambling.

If you thought that being turned into a Moogle in *Secret Of Mana* was a bit of a pain, then you might not be too keen to learn that in

Mash Figaro, Shadow and Cayenn Garamonde get ready to bash some monsters.

A night at the opera, *Final Fantasy*-style, with the famous dancing Chocobo's.

Just time for a hot dog during the intermission.

FFVI they're back! In fact, the Moogles have been part of the Square Soft world for some time, appearing in *Final Fantasy III* and *V*, as well as *Secret Of Mana*. But in *FFVI* you finally get to play a Moogle yourself. If the thought

of a teddy bear with little bat-wings riding a giant yellow bird and fighting mobile suits and demons seems a little weird, then remember, this is a Japanese RPG.

Special abilities make up a great part of the new game, and hidden skill tests, games of chance and even luck all come into play as the game unfolds. Shadow has the ability to throw all manner of magic items into battle, from a simple Shuriken to a mighty Katana. Obviously, as long as he can be kept in weapons, Shadow can inflict major damage on his opponents. Cayenn's special ability is his magic Tanto, which he can throw at his opponents; in the style of modern golf games, you have to press the fire button as close as you can on a swing meter, aiming for full power as often as possible.

Setzer's ability manifests itself in the form of random magic and is represented as a

Fight Mog, fight! A Moogle belt won't help you this time!

slot machine! Setzer has the ability to manipulate this machine to try to get better results, whether this will take the form of holds and nudges is yet to be seen.

All the monsters and associated battle effects have been upgraded for *Final Fantasy VI*, and the new industrial sections have foregone the gleaming machinery of the previous games for a rusty, worn, nuts and bolts-type approach.

With *Final Fantasy III (V)* set for a Western release later this year, we can only pray that Square Soft get their act together a bit quicker, for this, the biggest *Final Fantasy* yet!

**OGRE BATTLE
EPISODE 7: 'LET'S
CLING TOGETHER'**

Quest

The *Ogre Battle* saga has eight chapters in all, the first six of which were enacted in the original game. Now comes the second *Ogre Battle* game. Quest's first *Ogre Battle* gained a cult following in Japan when it was released – it was a fantasy wargame which, while not especially attractive in appearance, boasted a tactician's dream in gameplay, something which I feel is missing in today's games, perhaps?

The plot of *Ogre Battle 2* is classically enough that of an oppressed nation. The peaceful ocean kingdom of Valeria has been surrounded by the evil Zeteginian Empire.

With the death of the Dolgorian Emperor, a complex string of events leads to two other nations, the Gargastan and the Warstar,

deciding that the war being fought between their peoples will culminate on Valeria island.

Thrown into the middle of this worldwide melee are five main heroes. The first is Denim Power, a 16-year-old warrior who is also the lead character of the game. He is joined by his sister, Katua Power, who is a ferocious war maiden. Denim's tutor and good friend, Lancelot Hamilton, hails from the kingdom of Xenobia, but after campaigning on the island of Valeria, he decided to stay. Warren Moon is both a druid and magician and his character has perhaps the

Mobilising your forces in the new *Ogre Battle*. *Knight Lore* was never like this.

The first *Ogre Battle* had its fair share of pseudo 3D, Mode 7 trickery.

most scope for the tactical player; while Canopus Wolf is the ranger of the group, with almost unlimited energy.

The major difference found in *Ogre Battle 2*, however, is the style in which the game is presented. In the original game, character graphics were kept at a minimum, although there were some nice effects on the map screen (and things like the Tarot cards that gave you advice). This sequel, however, has some of the most luscious graphics yet seen in an isometric 3D game. The combat scenes are something to be witnessed with awe by both player and spectator alike, especially when fireballs and lightning bolts explode into the middle of the combat zone in technicolour flashes. If this game lives up to its early expectations, then it could even rival *Final Fantasy VI's* fight sequences.

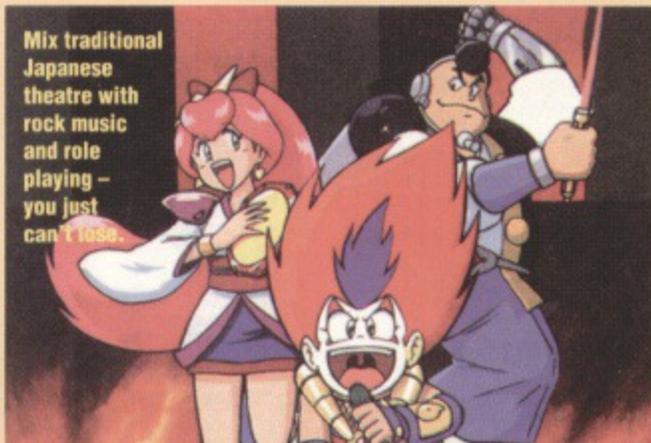

Meanwhile, we await the conversion of the first in the *Ogre Battle* series, sigh...

KABUKI ROCKS

Atlus • 12 Mbit

Kabuki is an old and traditional form of Japanese theatre, but in *Legend Of The Mystical Ninja* fashion this RPG mixes Edo period Japan and anachronistic modern trappings. The result is Kabuki that really does, erm, rock.

Basically, the shogun of the land has made life very difficult for all of his people. To make things worse, he has also banned music from the land, creating even more tension amongst his subjects. The shogun's son – Rock – however, happens to have a brilliant singing voice and wishes for a quick change in his father's laws. The plot continues from this hopeful start, with Rock having to rescue his friend Makki, who is quiet and competitive, unlike Rock. The story then takes us to Awa village where Rock has to rescue Princess Roxika from a dungeon, and on the way he meets Jiraiya, a wily thief and Benkei a brainless fighter.

Mix traditional Japanese theatre with rock music and role playing – you just can't lose.

The plot rolls along like a nightmare collusion of a fantasy world and non-stop MTV. Most of the combat revolves around music, with Rock's guitar being a major force throughout the game both audibly and physically! Instead of picking up spells, for instance, Rock finds new tunes to jam with his friends – a severe headache for his opponents. *Kabuki Rocks* certainly deserves recognition.

TRUE GODDESS

Atlus • 16 Mbit

Another one from Atlus, this game follows a more rigid role playing structure, based in a timeworn city akin to Tokyo (surprise!). The main plot here is that of two religious factions, the Messianic religion of law and order, and the Gaya cult of utter chaos.

The problem with this world however is not that of the evil cult taking over the world as you would expect, but that the heavens themselves have opened up across the universe, allowing all manner of nasty baddies to invade the planet. The first to arrive are those of Valhalla, soon followed by

Monsters, magic and technology are a potent mix in *True Goddess*.

beings from a much higher technological level, bent on taking over the new world they have landed on. The true Goddess is watching all this though, and she's just waiting for the best time to strike...

The game design is unremarkable, with movement across the land in a 2D isometric form, with 3D scenes taking up the main action. Once again, the fight scenes are separated, so you can stop and study your opponent before deciding on your form of attack. The thing that makes *True Goddess* quite appealing is that you get the chance to fight against heroes, titans and demi-gods. Who do you reckon would win if Thor and Baal had a one-on-one scrap?

Above: More beasties to take care of as the action heats up.

Thunder In The Tundra – the Storm God admires his Black & Decker set.

There are two *Goddess* games out in Japan – a straight RPG and a more strategy-based affair.

SUPER PLAY'S HOT LIST

This month we're not here. Oh, sorry. Yes we are. We were hiding for a minute. But we're here now.

JAMES

'I've been playing a game called *Super Mario Kart*. You might have heard of it? I insist on being Yoshi every time because his head looks best from the rear, and I can appreciate his acceleration. Sadly, though, being a dinosaur, he doesn't have opposable thumbs and this is detrimental to his handling.'

SUE

'Time, I thought, to return to the rather lovely *Plok!* I like his modern reliance on vehicular machinery. Let's see; he's got a tank, a motorbike, a car-type-thing, a UFO and probably several other modes of transport. Yes, *Plok!* is a crusader in a fossil-fuel world and deserves recognition.'

ZY

'*Super Smash TV* is my choice. This is because it combines elements of violence with the traits of extreme destruction. Add to this volatile mix the essence of annihilation and you start to get the aroma of my meaning. Not that I'm into destroying things. It's just a catharsis.'

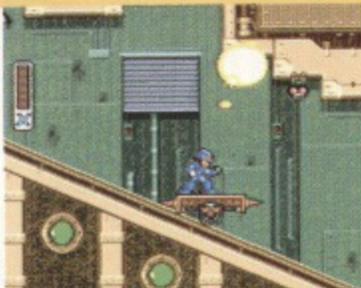

TONY

'Place in my hand a smooth stick and put me into a situation whereupon I behold a flat-topped table with spherical objects placed upon it - and I will commence the playing of pool. Unless it's a snooker table, of course. Hence my selection of *Side Pocket* for the Hotlist. That music, though. Why don't they put out a CD? I'd buy it.'

LISA

'I couldn't stop playing *Mega Man X* this month. Last month, we printed that code for Super Boots, Super Armour and Super Helmet, and this has opened the game up for me. There's just something about *Mega Man* that makes me go weak at the knees. It might be his tight-fitting armour...'

WIL

'I like a challenge, so it has to be *Super Ghouls 'n' Ghosts* for me. A trickier game I haven't found, in fact. I mean, what other game would have the guts to let you get almost all the way through, then send you right back to the beginning because you forgot something? Downright nasty, that's what it is.'

MERCHANDISE OF THE MONTH

Well, sort of. Japan, it seems, is going crazy over tiny vehicles. The Japanese Cars of the Year Awards have just taken place, and although his car didn't win, Osamu Suzuki, of the Suzuki Motor Company was voted Man of the Year for his devastatingly cute Wagon-R.

The Wagon-R owes much of its design to anime and the Super

The best things come in little packages. Allegedly.

Deformed style, and we reckon it looks just like it's come straight out of *Mystical Ninja 2*.

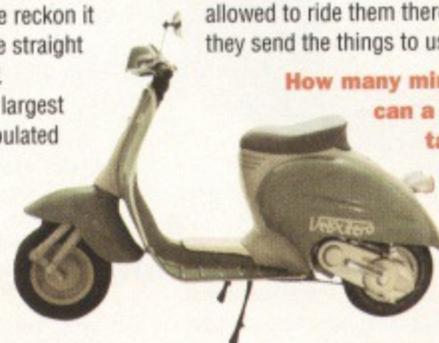

As Japan isn't the largest and most sparsely-populated country on the planet, microcars are big business, and the Wagon-R has been hugely successful in this crowded market.

If the Japanese make any more SD cars, we'll bring you full pics.

Meanwhile, the ultimate mod accessory, the scooter, has also made it big in Japan. Vespas and Lambrettas are changing hands at vast prices, as the Japanese dive headlong into another aspect of retro Western culture. Scooters costing under £1,000 in the UK are being flogged for anything upwards of £5,000 in the Land of the Rising Sun.

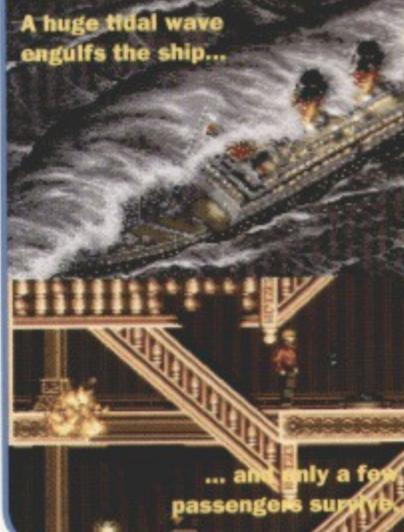

As well as being trendy, scooters are also very practical in Japan, where motorbikes of over 750cc are banned. Strange, when you consider that Japan leads the world in the production of 'superbikes' of around 1100cc and 170mph performance. As they aren't allowed to ride them there, they send the things to us.

How many mirrors can a bike take?

SOS

Vic Tokai

This game was reviewed in Super Play issue 10 as *Septentrion*.

SOS places you on an ocean liner which has been blatted by a tidal wave. You can play four of the survivors in their battle to free as many of the trapped passengers as possible.

SOS is like a cross between *Prince Of Persia* and the film *The Poseidon Adventure*, and in fact is one of those rare games that everybody agrees is unique and original. The novelty of clinging onto the floor, trying to avoid gravity sucking you to the ceiling far below, is just irresistible.

And don't think it's a platformer, because there are plenty of options to talk to the survivors, get the radio working and generally calm down the anxious folk who thought they'd have a safe journey to New York on board the unsinkable *Lady Crithania* (or *SS Britannia* or whatever it'll be called). Expect *SOS* to appear in New to the UK in a couple of months.

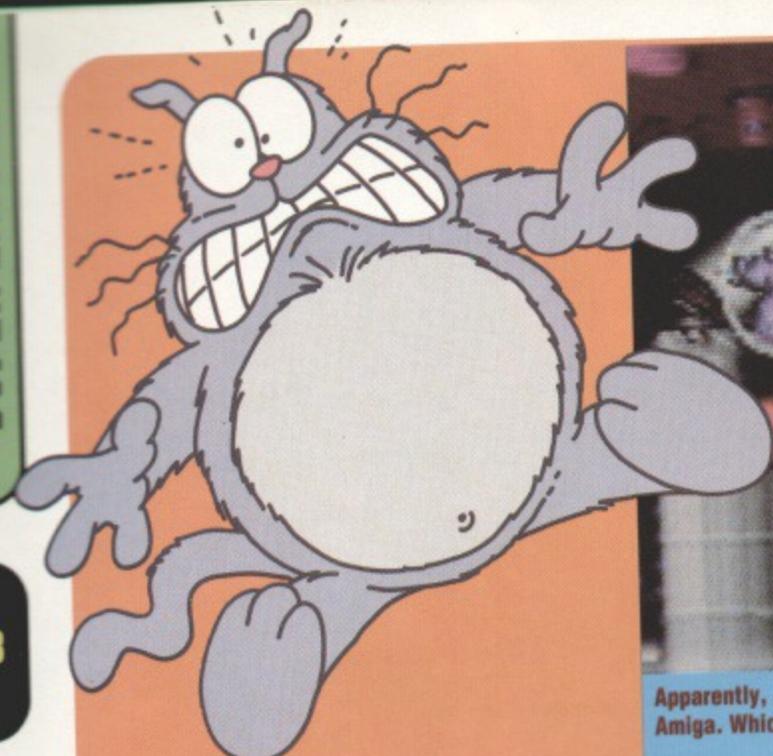

RESPECT IS DUE COMPETITION WINNERS

To be in with a chance of winning one of five *Street Fighter II* CDs, kindly donated by Music of Life, we asked you three happening, groovy, but rather 'phat'uous, questions back in issue 17. The answers to those three questions are as follows:

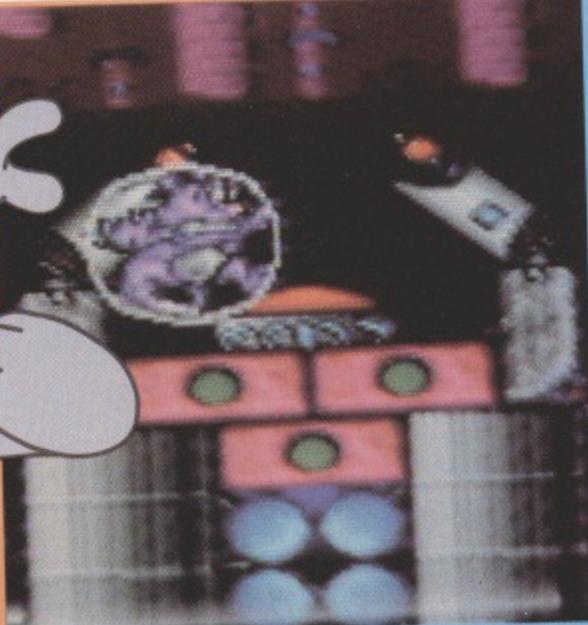

- a) Blanka's real name is Jimmy.
- b) Ice T fronted Bodycount.
- c) Flavor Flav, Snoop Doggy Dogg and Tupac Shakur are all rappers who have

been accused of either attempted murder, murder, or being an accessory to murder. The naughty fellows.

The five lucky winners are: **Ben Isaacs** from Cardiff, **Arran Spencer** of Swindon, **Robin Cohen** from Leeds, **Graham Walker** of Donaghadee, Northern Ireland and **Matt Valler** from Nottingham. Get ready to groove on down to the funky tunes of the World Warriors...

Apparently, *Eek!* will be a bit like *Sleepwalker* on the Amiga. Which wasn't that brilliant. Yikes!

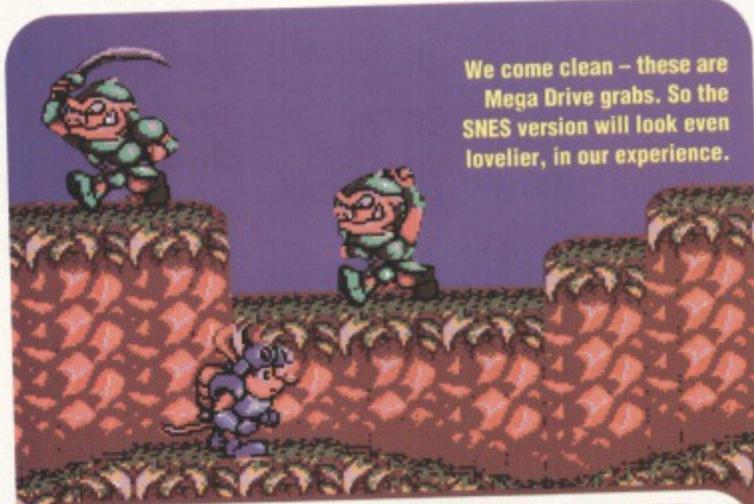

Eek! is, according to Sony, a kind-hearted purple cat who's always trying to help his friends – often with little success. When you read words like this, what sort of a game do you think of? A beat-'em-up? An RPG set in Japan in the 13th Century? Or maybe a platform game with spikes that move in and out?

Give up? *Eek!* is in fact a platform game with puzzly elements. Sony Electronic Publishing are currently working hard to get the little feline to look just right, as he's squashed, fried, stretched and crunched.

The game will have five levels, including a zoo, an alien city, a graveyard and that most ubiquitous of American locations, a shopping mall. *Eek!* must help all his friends through these zones, making sure they remain unharmed.

Eek! The Cat will be reviewed in the August ish of *Super Play*, with some other things, no doubt. Till then, you must curb your curiosity. Remember what it killed?

EEK! THE CAT

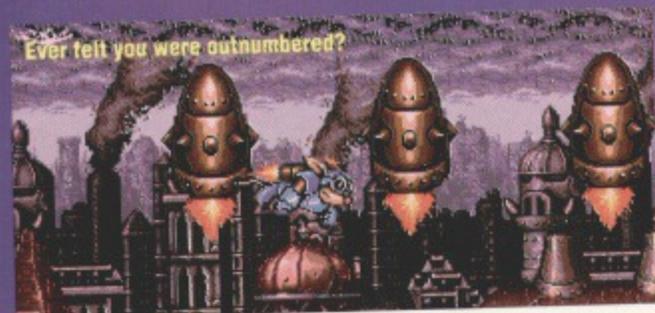

We come clean – these are Mega Drive grabs. So the SNES version will look even lovelier, in our experience.

SPARKSTER Small Furry Mammal

Now, if you've played all the way through *Legend Of The Mystical Ninja 2* then you'll have seen some of Konami's favourite game characters making cameo appearances. One of them was Sparkster, a warrior opossum clad in plate mail (not exactly easy to miss, was he?), who made his first appearance on the Mega Drive in a fairly successful game called *Rocket Knight Adventures*. Now he's set to make his name on the SNES in *Sparkster*, a platform romp which sees the eponymous opossum take on an even greater threat to peace, love and harmony. A taxidermist, perhaps? All we can say is that it demonstrates the same cutesy mediaeval flavour with a steampunkish 'rivets and rockets' feel. Konami plan to release the game in October, but we'll be bringing you a full review very soon.

How many more cute, furry mammals can you stomach? Nobody on the *Super Play* team can eat more than seven.

URBAN NIGHTMARE

A few months ago, we interviewed the major software houses and discovered that their relationship with Nintendo was far from happy (*Third Party Politics, SP13*). Now we have learnt that Electronic Arts, perhaps the most vocal of the dissenters, are to pull out of the European SNES market altogether.

EA has tied up a global deal with THQ which hands over the SNES rights to *Urban Strike*, as well as some Game Boy and Game Gear titles. Effectively, it means that THQ will handle the development of SNES conversions: this might include future Arts winners, like the *Madden* series. The obvious worry in every game fan's mind is that EA's reputation is somewhat greater than

THQ's, although EA's David Gardner has stressed that 'very stringent quality control checks' will maintain their high standards.

Confusingly, this casts doubt over conversions of games that appeared in EA's uncertain period. The SNES has yet to see any sign of *Jungle Strike*, and it's unlikely to be launched at a time when *Urban Strike* is being promoted.

VIOLENT COP

● Cert 18 ● 103 mins ● £12.99

Clint Eastwood used to play a character called Dirty Harry. He was a maverick cop with an unorthodox approach to law enforcement. This translated to shooting dozens of criminals during the course of the film.

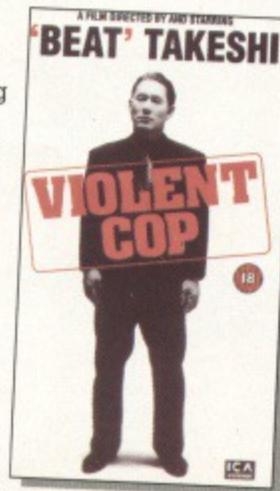

'Beat' Takeshi directs and stars in *Violent Cop*, a live action film, very similar to an Eastwood movie. Being Japanese, it's bound to be weirder than any American film. There are long sequences where people walk around with little incident, then suddenly,

there's an explosion of action, in which many people get injured.

This stop-start feel gives the whole thing a strange tempo. What's gratifying is that subtitles have been used, instead of dubbing – it would be

impossible to dub angry Japanese cops shouting at each other.

Violent Cop contains some graphic acts of hurtage, as well as the odd gout of blood. And it's easy to see how it could be a cult, but you can also see why it might be dismissed as boring, but punctured by adrenaline-charged moments when VC decides to be very V. **Understandability factor:** 8 out of 10.

AN ANIME WORLD

Pronounced 'ah-nee-may'

COMING ATTRACTIONS

WORLD

Anime is blooming this Spring, with lots of new UK releases.

This time last year there was Manga Video and Anime Projects; or there were copies of anime traded on circuitous underground routes. There was one release from Western Connection which bridged the gap between art film and classic anime, in the elegant form of *The Sensualist*. And that was all. But this Spring, things will be very different.

We now have five labels releasing anime in the UK – the two old-hands plus a re-energised Western Connection, and newcomers Kiseki Films and Crusader Video. These will be joined this Summer by two more – Pioneer LDCE and Animania, who describe their product as 'animation with attitude'. We also have a widening range of titles available, and rumours about Manga Video's purchasing sprees in Japan, and the covert activities of major media companies looking for a way in to the anime market. So here's a label-by-label, blow-by-blow account of who's releasing what and when.

Manga Video signed a major deal with Sunrise on 1 April, which netted them classics like *Crusher Joe* and *Dirty Pair*, although the status of the vast Sunrise backlog of classic mecha TV series is still uncertain. What is certain is that the new purchases, plus

Left: Suspended animation in *The Guyver*? Below and right: *Black Magic: M-66*.

their existing line-up, gives them full release schedules right through to 1996 – and they are also rumoured to be after the mighty Kadokawa Films catalogue. The pick of their Spring releases is *Battle Angel Alita*, the

anime of the mega-hit manga – a beautifully-drawn, action-packed cyberpunk tale that's part urban romance and part eco-political polemic.

Manga are also going for their first ever 'video comic' – half-hour tapes released monthly at \$6.99, a bit more expensive than your average comic! *The Guyver* is the chosen title and it's supported by a Grant/Luke comic *Hellcat* on the inside of the sleeve. Other releases in the pipeline include the rest of the *Crying Freeman* series, the excellent *Cyber City Oedo 808* and those Lovely Angels Kei and Yuri.

Anime Projects have just moved from Bristol to Bangor in North Wales, where they run a shop and mail order service as well as the UK's flagship subbing label. This Spring, they went for broke on a dub – Sonoda Kenichi's hit *Riding Bean*. US parent company AnimEigo plans to gauge the response to this experiment and do more dubs if it's what the fans want, but they remain loyal to the principle of subtitling and their UK offshoot's coming releases include more *Urusei Yatsura* movies, and possibly cheaper versions of cyberpunk ubersmash *Bubble Gum Crisis*.

Western Connection have surprised us all. After the release of *The Sensualist* – gorgeous, but hardly action-packed – their anime ambitions seemed to lie dormant for a while, but now the label has sprung back into action with a range of both subtitled and dubbed releases. *Kama Sutra*, based on Nagai Go's 'erotic adventure' manga, is followed by a three-tape release from Kitty Film, the English-dubbed *Galactic Pirates*, and a Toho movie, *Love City*. The contrast of types and styles could hardly be more marked; the slapstick Nagai story is animated in a basic style, while *Galactic Pirates*, based on an award-winning SF novel by one of Japan's top writers, gets the typical Kitty Rolls-Royce treatment, with slick character and mecha design melded with an over-the-top script, whose elements of lunacy recall those other famous Kitty productions, *Urusei Yatsura* and *Ranma 1/2*, but without the cuteness. *Love City* is an older feature and so the animation is less glossy than for *Galactic Pirates*, although in its day it was state-of-the-art; but the story, involving DNA, clones and a bunnygirl assassin, is good, solid science fiction.

Both new kids on the block have caused a stir in their own way. Kiseki proved that science fiction didn't have to feature tits 'n' tentacles when they released *Macross 2*, and other releases in this vein include Shirow's

compelling action/adventure *Black Magic: M-66* and the *Gunbuster* OAV series, with heroines designed by Mikimoto Haruhiko of *Macross* and *Orguss* fame. Kiseki also snatched *Return Of The Overfiend* and *Adventure Kid* from under the noses of Manga Video, and have released *Gigolo*, in the style of *City Hunter*, but with more sex. Another Kiseki release will be *Ambassador Magma*.

Crusader Video have gone out of their way to present themselves as user-friendly, talking to fans and paying attention to the UK market and its needs. *Catgirl: Nuku-Nuku* is a glorious romp aimed at the Japanese early-teen market and dubbed for the UK with little details added – like a Scouse-accented office-lady-cum-helicopter-pilot. Crusader are looking for their next release in the same vein, though they (and everyone else) are rumoured to be chasing the *Dungeons & Dragons*-inspired fantasy OAV series *Record Of Lodoss War*.

Pioneer LDCE are still considering their first release, and Animaniam have made no announcement yet – though an educated guess would suggest a mix of sex 'n' violence and contemporary classics, since this is the way most UK labels seem to be headed.

In any event, these are interesting times.

‘We now have five labels releasing anime in the UK.’

Battle Cars: Mad Max is back in fashion.

It's never a great surprise when a sports game sits at the top of the American chart. This month we have the completely fab *NBA Jam* in pole position. Another quality game, *Soldiers Of Fortune* is close behind, whilst *NHL Hockey '94* stays in the charts for the fourth month running.

PAC ATTACK Nintendo

What good is a crusty old classic like *Pac-Man* nowadays? Eh? For a start, *Pac-Attack* is a reworking of that ancient maze-'em-up. In fact, it's a bit like a cross between *Pac-Man* and *Tetris*.

There are three modes of play in this game. In the one-player bit you have to clear blocks by filling in rows horizontally, whilst dealing with the ghosts which try to make your life hell. *Pac-Man* can eat the ghosts, and the blocks drop into the spaces they vacate.

The serious fun comes when you're playing head-to-head. You have to eat at least five ghosts, which starts them regenerating on your opponent's side.

Finally, there's the puzzle mode. There are 100 levels of brow-furrowing classic *Pac-Man* to be getting on with. Luckily, Nintendo have given you passwords to help out. Phew, eh?

We'll review *Pac-Attack* in a couple of months, without fail. Probably.

Above: What's all this about?

Below: It's the Tetrisy bit - with two-player mode.

SUPER QUIZ

The idea of testing people's knowledge by asking them questions is certainly not new. As far back as the 19th century, employers were asking potential clerical workers questions in order to judge their responses. 'Interviewing', as it was known, is still a practice common to work environments today, where managers quaintly 'interview' employees in offices - sometimes.

In the future, 'interviewing' will be redundant, and silver egg-shaped cups will painlessly suck every ounce of knowledge from an applicant's head, outputting the resultant data

to a computer disk. The employer will then be able to decide whether to employ the comatose candidate. Until then, here's the Super Quiz.

EASY

- 1) Who wrote that tosh above?
- 2) What does SNES stand for?
- 3) What does Famicom mean?

MEDIUM

- 1) Has Harvey Keitel ever won an Oscar?
- 2) What's the name of the girl from *Fatal Fury 2*?

- 3) How many frames a second does a British television display?

HARD

- 1) What does PAL stand for?
- 2) What tank do you drive in *Super Battle Tank 2*?
- 3) Name three characters from *Mystical Ninja 2*.

Yeah, and in the future, people won't have proper hands; they'll be born with jointed, spindly flaps perfect for pressing all the joystick buttons and things. Sorry. You'll find the answers on page 98.

BLABBERMOUTH

with Kris and Tel

Having been cruelly ignored for a month, Kris and Tel are back to wreak more gossip-related havoc on the hearts and minds of those Super Nintendo fanatics who are intelligent enough to have chosen *Super Play* over all the other magazines available to them in the shops. What a long and silly sentence that was. Apologies, and on with Kris and the other one.

Tel, me old metallic mate! Haven't seen you for ages! Did you miss me? Anyway, have you heard the scandal? Apparently, *Legend Of The Mystical Ninja 2* is not, repeat not, scheduled for an American translation. In fact, Blockbuster USA have ordered a load of Japanese carts, so it's gone straight onto the games rental scene (much like duff films do).

This is both a tragedy and an outrage! Hasn't *Super Play* done its best to eradicate this kind of vile-minded narrowness from the streets of our land? Surely the public have a right to see magnificent games in their own mother tongue? I shall be writing to my MP, Kris.

But there's more. Imagineer own the rights to the marvellous wargame/RPG *Ogre Battle*, which has been much covered in *Fantasy Quest*. However, they have decided not to release it, because they expect it to sell only 15-17,000 units in this country. This is a vast shame as well, Tel. And what's worse, this means our chances of seeing the stupendous-looking *Ogre Battle 2* are even more remote.

Boo hoo, as humans say when they're in pain or distress, Kris. Anyway, here's some cheering news. Virgin are doing *Spot Goes To Hollywood* as we speak. This charts the progress of that rather cool *Spot*, which is actually off the 7-Up cans (but that's never mentioned in this country owing to the licensing agreements). Anyway, the marvellously-animated *Spot* is up to his usual graphically-stunning tricks in America. Should be a doozy.

Yes, and I've got a really weird update on Project Reality from the boys at Nintendo. More details of their mega-memory cartridges are seeping out. A minimum of 100 Mbits of data for each game is the aim, which is 10 to 15 times more memory than present 16-bit games. Peter Main, the vice president of marketing at Nintendo of America was heard to say "The choice we made is

not cartridge versus CD; it's silicon over optical.' Well, that's us clear, then.

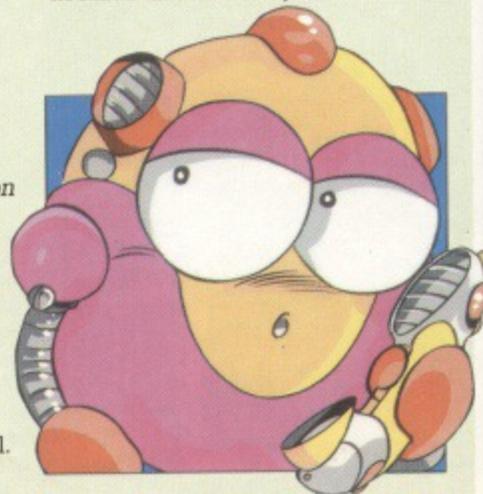

Yes, Kris. But they've also designed the Project Reality machine so that it can be connected to a CD player at a later date. That's a neat bit of forward-planning from the American-based boffins. In fact, I've been hearing talk of the first 64-bit video game. Rare Ltd, based in Warwickshire are to write a game called *Killer Instinct*. We don't know much about it, because Rare and Nintendo are being very, very quiet, but it's known that the software is a 3D fighting game, possibly along similar lines to *Virtua Fighters*. If you consider that Rare used to be called Ultimate Play the Game, who did the best Spectrum games ever, then it bodes well for the future - and *Killer Instinct*.

Cheers, Tel. I feel cheered up now. One final little snippet I picked up. Konami are expanding their *Tiny Toons* branding. There is a game coming out soon called *Tiny Toon Adventures Wacky World Of Sports*. It'll be a four-player Multitap affair, with 10 sorts of silly sporting endeavours to have a go at. And, as if that wasn't enough, there's a game called *Tiny Toon Adventures Acme All Stars*. This is a loony attempt at soccer and basketball.

It enables two players to have a go, and there are loads of sub-games like bowling and stuff. Apparently, there are 46 special moves, with 800 animation frames for the characters alone. Should be fun!

You certainly could well be right about that, Kris. And what's more, I've got the final word in, er, Acclaim games here. *Spiderman/Venom: Maximum Carnage* is a 'thrilling light-speed ride of interactive gameplay'. More than this I do not know. Acclaim are being cagey about what they say. But don't worry. I'll find out more soon.

Should be a laugh indeed, Tel. But I must go now. I can hear my parents coming up the path, and hark! Wasn't that the click of a nuclear primer I heard, being switched to the activated position. Gulp! I'm doomed and so on. Bye!

Super Play's Football Special goes to a replay...

The SNES football game bridge has seen much flow under it since our original feature back in issue 13. The office drawers are now bursting with the likes of *Kick Off 3* and *FIFA Soccer* jostling for position, each looking to make itself the footy game we'll be playing this

Summer. While Jackie Charlton and his boys (hopefully) do the business for Britain in the United States.

The last fortnight has seen a cacophonous din descend upon our office as we've spent our hours taking apart the nation's favourite pastime, SNES-style. Over the next nine pages

we'll be rounding up the leaders to date, reviewing the new titles now hitting the nation's shelves, and making a swift perusal of the veritable cornucopia of supplementary efforts. First, though, another look at the game which could well become the one to beat them all...

WORLD CUP '94

US Gold are no strangers to the phenomenon that is the World Cup. Back in 1986, they embarked upon their first toe-dip into the turbulent waters of video game football with *World Cup Carnival*. A clever marketing campaign and game packaging with oodles of promotional tat ensured that this game found its way into many people's homes. What US Gold didn't tell potential buyers, however, was that their game was, in fact, a re-hash of a very poor game which had appeared years earlier in a slightly different form, from another publisher. That made a lot of people unhappy.

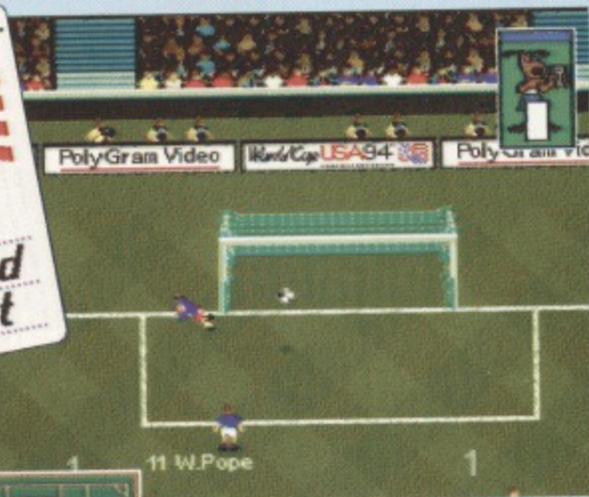

Fortunately, it looks as if US Gold have learned their lesson and are taking their '94 venture very seriously. Having tied up worldwide rights to this year's tournament, their unshockingly titled *World Cup '94* is almost ready to roll. We only touched on it in issue 18, but we've had the opportunity to have a kick around since then and it shows a great deal of promise.

Flexibility appears to be the game's particular strength. One of the most significant features is the ability to customise set-piece movements from throw-ins, corners and, most importantly, free-kick situations. Here, players can be programmed to make the initial pass from dead-ball, run into space, and (hopefully) be well-placed to receive the preprogrammed return pass and then bang in a screaming shot. Programming these moves is surprisingly straightforward and well worth taking time out to master and exploit to fox your opponent. Other tweakable parts include all the usual stuff such as player manipulation within the squad, individual player pitch-coverage, no less than five degrees of ball stickiness and even player skin colour. The finished cart will house a battery backed-up RAM too, allowing tournament records to be saved - as well as your preferred Arsenal-esque set-piece manoeuvres for recall later on.

Because of its worldwide sales pitch, US Gold have consciously engineered the interface to be as text-free as possible. Extensive icons featuring Striker (the official World Cup '94 mascot) replace the traditional options, thus giving the game a supposed penetration through any language barriers which exist, eliminating the need for any textual translations for foreign versions. Which is a good move, we reckon.

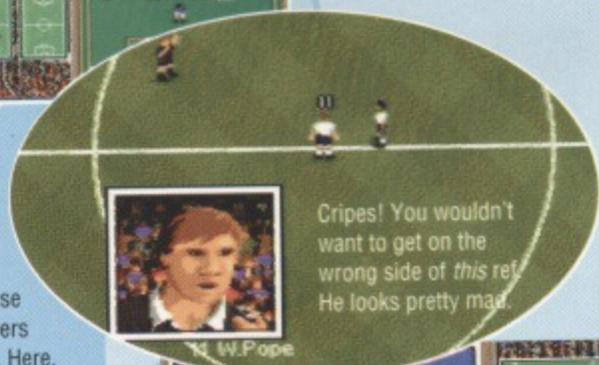

The game itself flows superbly, thanks to its intelligent passing feature; and (this is very important) it all moves along at a cracking pace, ensuring match excitement is cranked up to maximum.

It uses the familiar *Kick Off/Sensible* viewpoint and isn't exactly stunning in the looks department (regardless of the purported 3,000 frames of animation), but we have high hopes for this one. Expect a full review next issue.

Left: The light-green highlighted area indicates the player's pitch coverage. Novel.

Above: That'll be a goal, then. But what's that little chap doing up there in the corner? Eh? Eh?

Cripes! You wouldn't want to get on the wrong side of this ref. He looks pretty mad.

Below: Apparently, all player names are authentic, in nationality terms. Cor!

Striker: the official World Cup '94 mascot. He's a dog who can play football. Apparently.

SENSIBLE SOCCER

Crowned the King of soccer games in issue 15, *Sensible Soccer* proved that the magic which made it an incredible success on other formats could be reproduced on the SNES. It retained the unique feel which was more than enough to counter its infamously tiddly players and weak sound but, surprisingly, it hasn't yet made the mark sales-wise, which it definitely deserves.

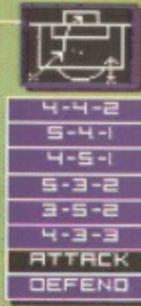

Free-flowing play is what success is about and Sensible Software deftly sidestepped the sticky-ball convention when putting the game together, producing a primarily passing game, which incorporates strategic play and in turn satisfyingly chained moves. The non-velcro-ball-with-matching-boots does mean, though, that it's a game to be approached with caution, but players willing to put in the practice – and most will feel compelled to – will reap the rewards it holds. It's a great game, and the one to beat as far as the competition is concerned.

RATING: 91% SP15

Above: Star players play best. And earn more cash.

Right: Sensi's options are looking weak nowadays.

The dugout can be amusingly slid on-screen mid-match. Time for a tactics rethink, I reckon.

Left: You can perhaps appreciate the feelings of Sensi's critics. Those graphics are teeny.

STRIKER

One of the biggest-selling SNES carts in the UK (80,000 to date and growing), *Striker* was applauded for its accessibility and its swift, logical passing play, which ensured that most people took to it like Paul Ince to a pair of Adidas Predators™. Something that has perhaps been a trifle underplayed in our previous judgement is the indoor 6-a-side option; it really does add a whole new dimension to the package, including as it does the full complement of cups and tournaments which appear in the 11-a-side option.

Appearance is the game's low point; washed-out kit colours make it pretty dull on the old lenses. But still, it's the heart of the game which counts and there's enough playability in there to keep most people beavering away for ages.

RATING: 89% SP10

Players strike balletic poses when you try to mess with their kit

Beautiful pitch, but Fuzzy Felt™ players – that's the problem. See?

Left: Using the walls will reap benefits in Indoor mode.

VIRTUAL SOCCER

Programmed by Probe in the UK for Japanese softco Hudson Soft, *Virtual Soccer* had more than its fair share of knockers (*Steady – Ed*)

when it was released last year. But it really is a fine example of how to do a football game, as indeed our high mark in issue 13 would confirm. Its fair stack of options include a choice of two game speeds (play it on *fast!*) and an unprecedented multi-view facility, offering the traditional *Kick Off* birds-eye, above-and-behind – like *Striker* – and even from the side – like virtually every single Japanese football game ever. It plays well too, apart from the occasionally guaranteed goal-scoring opportunities and dauntingly tough one-player tournaments, both of which are forgivable. A valiant effort, then, and certainly a strong base to build *Virtual Soccer 2* on. Which, er, isn't actually planned at all. So go on then, Hudson Soft.

RATING: 87% SP13

Right: The standard bird's-eye view. No 3D, no dazzling use of Mode 7 – just pure, unadulterated football action.

A shot from El Tel's days as a player. From little acorns, etc.

Wow! Virtual nightmare man! It's all 3D – just like being there, innit?

WORLD CUP STRIKER

Apparently, rugby was originally born out of football. Years ago, some chap decided that instead of kicking it, he would pick up and run with the ball. He was instantly hailed as 'Father Of The Game'. Flipp!

Bigger! Better! Er, Five-playerer! Elite have taken their classic game and bolted bits on...

ICON TINA TURNER

One of *World Cup Striker's* improvements is the completely icon-driven front-end. Not entirely straightforward though, are they? So I'll run through them with you...

OPTIONS

- Flips back to the main menu.
- Alters match time (1-90 minutes).
- Selects indoor or full-size game.
- Redefines the controls.
- Turns off that singing woman.
- Enters extra options screen.
- Dumps battery-backed RAM.
- Views Cup winners.

POOR REF

- Selects level of wind (oo-er).
- Changes ref's general abilities.
- Balances skill over teams.
- Controls in-match weather.
- Returns to main menu.
- Selects 2 or 3 points per win.
- Decides outcome of drawn match.
- Selects auto or manual 'keeper'.

GOOD, BAD OR UGLY?

Elite are obviously looking to refine the classic 'If it ain't broke, don't fix it' line by tacking 'unless of course, there's potential for substantial financial gain' on the end. Still, we shouldn't hold it against them; the original *Striker* had room for improvement, and after all, we should be grateful that it's this and not an updated version of *Super Soccer* from Human that we're getting.

There are *masses* of improvements in *World Cup Striker*, but lots of them are pretty inconsequential. Let's take a look at the most significant:

- The cart now houses a battery backed-up RAM which allows part-played tournaments and edited teams to be saved at any point. Compared to the painful password systems on show everywhere else, this alone puts it a nose ahead of the competition.
- The four new tournaments include the World Championships, and of course, the

MARK BOSNICH'S FAVOURITES

Mode 7 comes into full effect during the penalty sequence. The white directional arrow moves automatically from side-to-side, speeding up as it passes over the centre of goal.

Right: Indoor penalties are superb. *Everything* scales in size.

Below left: He's cheating, surely. Below right: A save. Thank you!

World Cup itself, all of which are fully editable, meaning previous non-starters (mentioning no names) can be included.

- One to five players can now take part in the game, thanks to Elite realising the multitap's potential in a sport environment.

- Player controls have been expanded, giving goalkeepers three new actions which include dropping the ball to dribble upfield. Outfield players now have two throw-in strengths, an extra-long punting kick and the questionable inclusion of a deliberate foul facility.

- Graphics have also had a swipe from the sprucing-up stick. The realistic-looking Mode 7 pitch remains unchanged, but the players themselves are now 33% larger with expanded animation. Sadly, the in-game colours are still as muddy as ever, and not truly representative of the piercingly-bright kit designs which appear front-end.

- The presentation has been re-engineered to exploit the World Cup campaign potential. Tournament games include digitised shots of actual American stadium venues, with accompanying facts and figures on display. And every participating team has a sterling

rendition of their national anthem parped forth prior to the impending fixture.

But, those improvements aside, you may be thinking, does it still retain the sky-high level of accessibility which made the original game one of the front-runners last year? Well, yes it does - perhaps too much, some would argue, with the trade-off being that players simply don't have quite the range of moves which appear elsewhere. But that would be being overly picky, I think; what's here sufficiently covers just about every necessary playing feature and option. The others have, perhaps, gone a bit over the top.

The only slightly questionable point is something I came across by playing many day's worth of *FIFA International Soccer* and *Kick Off* prior to looking at this. It's the implementation of flair moves, such as overhead kicks and flying headers, which are a tad restrained by comparison. Play consequently tends to be of a more conventional variety; and it's rare, for example, to see the sort of edge-of-the-box headers bursting into the top corner which is common (albeit unrealistic) in *FIFA World*

Cup Striker's a less dynamic game, but not really any less exciting for it.

Overall, if you *don't* have the original game, then this is definitely worth scraping together your cash for, but it could be quite a scrape, bearing in mind the price tag. On the other hand, if you *do* already own the original, then you'll feel obliged to check out the others first. And I wouldn't blame you.

KICK OFF 3

Is it really true that, contrary to all previous evidence, it is possible to produce a good side-view football game?

UK Release

Game: Kick Off 3
Publisher: Imagineer
Developer: Anco/
 Steve Screech
Price: £49.99
Release: Out now
Players: 1 to 5 simultaneously
Cart ROM: 8 Mbit
Adaptor: PAL only

The original *Kick Off* became the footy title when it appeared on the ST and Amiga years ago. And hundreds of gamers gathered to take part in nationwide tournaments. Now it's viewed from the side, and on the SNES...

Left: If anyone knows the reason for the name of this tournament, please write in.

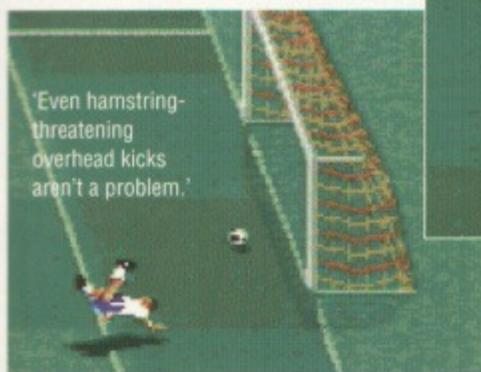

Below: This screen is well worth a look. Pay particular attention to the number of the star player, for use later.

'Hello there. It's great being a footballer. Look, I can do ace headers.'

'And I can do them flying through the air. They're a bit harder, though.'

'Even hamstring-threatening overhead kicks aren't a problem.'

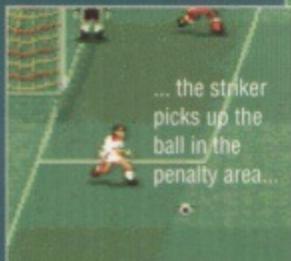

'And my European counterparts have even mastered this move.'

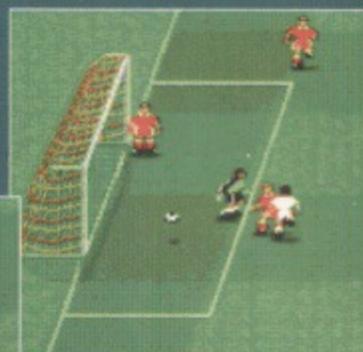

GOALS GALORE

The winger cuts inside to make a splendid cross...

... the striker picks up the ball in the penalty area...

... and proceeds to perform a stunning turn, to score using his instep. A super goal.

A brilliant solitary effort, this. With the defence seemingly watertight...

... the Brazilian player jinks through a series of rash challenges...

... and bangs the ball past a helpless 'keeper.

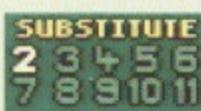

TACTICAL SUPREMACY

Strategy and tactical play, that's what football success is all about. Oh, and scoring tonnes of goals. *Kick Off 3's* strategic elements are fairly compact...

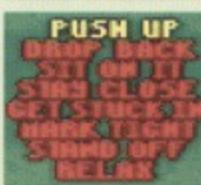

Bring this section up in the corner by pressing pause.

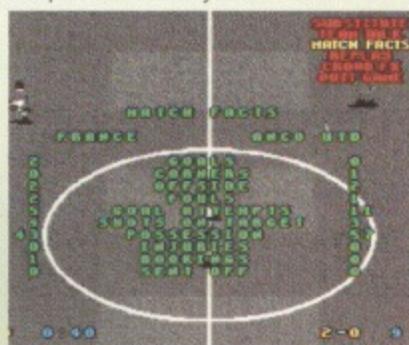

It allows you to swap the team around.

And give them a good talking to. My advice? 'Push Up' every time.

Yesss, another chance to witness my comprehensive victory over Anco Utd.

GOOD, BAD OR UGLY?

I bet you're already fed up with all this football business and zoomed straight in on that final score before coming here. And I bet when you read it, your eyebrows migrated an inch or so up your forehead in surprise. I know mine certainly did when I began to realise that, even after trillions of Japanese attempts, it is possible to produce a completely splendid side-viewed footy game. I think the reason behind *Kick Off 3's* quality is that Steve Screech (the project's chief programmer) has played enough video game football in his time to make his fingers fall off, and as a consequence, he's become very aware of the essential ingredients.

Speed of play is one of the most important; *Super Soccer* was overrated in my opinion because it's so teeth-grindingly slow, and *Virtual Soccer* would be lost without its fast option. But *Kick Off 3* has got the blend just about right; the pace which you travel up the pitch is quick enough for 90 minutes of end-to-end action - crosses and shots

sprang around with alarming velocity, while still being followable.

Control must be another essential, and this game earns praise for the comprehensive control system which it demonstrates. Using the A, B, X and Y buttons (sometimes combined presses) the players can be made to perform 14 individual actions. And because of their context-sensitive nature - volleys are only available if the ball is between ankle and stomach height, for example - it doesn't take long for them to become intuitive. Get someone else round (or ideally four others - it's Multitap compatible, remember) to play and it's furious stuff right through from the first pea-vibrating whistle effect to the very last; during which time valued friendships will have suffered severe erosion, if not dissolved altogether. And that's exactly the kind of emotional involvement which indicates its quality.

But now onto the bit that you were expecting; where we look at the game's flaws and downpoints. The front end is particularly disappointing; a dull colour scheme and unwieldy options paint a pretty poor picture when you first power-up.

There's a hint of slow-down when things get very busy too, but not so much that it affects gameplay to any great degree. And let's not forget the soundtrack which, up against the likes of *World Cup Striker's* funkadelic singing samples, just doesn't cut it at all.

But *Kick Off 3* plays a superlatively smashing game of two halves, being quick, smooth and brilliantly competitive. Yep, definitely worthy of some serious fist-on-chin purchase consideration.

Below: The same view, but from the reverse angle.

Left: The fully-animated scoring sequence adds razzmatazz.

The goals in *FIFA* are usually spectacular. Shots and headers can be loosed off from almost anywhere and – if you're using a good team – are often likely to find the back of the net. Here are two typical examples...

1) Everyone's looking a bit lost at the moment. They haven't seen the ball heading in from the corner...

2) ... Ah, *he's* seen it and crashed in an instant volley.

3) The poor chap between the sticks has no chance.

1) The Spanish midfielder makes swift progress down the centre, looking to pass the ball.

2) He picks out the forward who strikes...

3) ... and scores with a screaming net-buster!

NATIONAL

PRESENTATION POLISH

EA have had plenty of practice presenting sports games in the past and *FIFA* proves they haven't lost their touch...

The game has a fictitious England squad made up of EA employees. Pull up their stats and have a laugh.

You've got to get this bit tuned to perfection. It dictates the amount of pitch area covered by each team section.

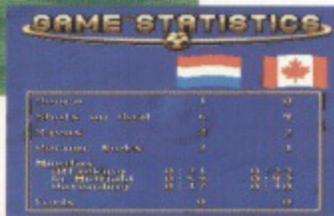

Rearrange your collection of Cadbury's Buttons and your players will magically change their formation.

Do you favour the Wimbledon game? Or Blackburn? It's best to stick it on 'Auto' initially, and let the SNES decide as you go.

Left: You put your all into a kick and the ball rolls two yards. I despair, I really do.

Right: This screen is best used when playing against a human opponent. We call it the 'gloating screen'.

GOOD, BAD OR UGLY?

This game presented something of a dilemma when it appeared on the Mega Drive last year. The

problem was that the brilliant *Sensible Soccer* appeared at about the same time, leaving soccer fans torn between two titles that most pundits reckoned were on a par, quality-wise. And the buying conundrum is even more exaggerated on the Super NES because the situation isn't quite so cut-and-dried: there's an obvious wealth of sterling competition. So let's take *FIFA* apart and judge its worth.

It certainly has it made in terms of presentation. User-friendliness has always been one of EA Sports' hallmarks and *FIFA* doesn't break that tradition. The front-end has been superbly implemented, with some finger-tappingly groovesome music and options which, rather splendidly, can be tweaked at any point during the match, rather than being restricted by natural breaks in play.

The stalwart replay feature is a particularly shining example of the interface excellence, having a long section of viewable 'footage' and incorporating a never-before-seen reverse angle view. The level of options don't run to the extremes of things like *World Cup Striker*, though, which can probably be attributed to the age of the original, that appeared when oneupmanship wasn't the issue that it's become amongst football games this year. Minor improvements have been made in the translation, but it isn't going to beat the very newest entrants in the flexibility stakes.

FIFA's major selling point is quite patently its appearance. The crowd effect is easily the best we've seen, somehow managing to achieve the illusion of a mass of individuals rather than just the

usual, er, mass. And the players themselves are no less special in animation terms, but it's a pity EA didn't get around to solving the player/pitch relationship; instead of surefootedly stomping around, team members are prone to moving as if they're on an ice rink. But they've got some super somersaults and dropping-to-their-knees goal celebrations which serve to ensure that this is the nearest thing to watching real football on the SNES.

The game of football *FIFA* plays is something which seems to divide people into two camps; those who love the viewpoint and its unquestionable visual appeal regardless of anything, and those who maintain that its 30 degree isometric perspective only detracts from the level of control available; and that the game engine doesn't allow for proper passing play, instead running a somewhat random and primarily long-ball game. And the latter group could well have a point.

The (comparative) lack of speed makes *FIFA International Soccer* a more relaxed game than it perhaps should be and, yes, the action does occasionally lack the structure which purists will demand. But if you can get your hands on a stack of chums and a multitap, then the spectacle which inevitably ensues is something you really can't afford to miss.

VERDICT: A cracking conversion from the Mega Drive, plus some extra bits thrown in. Fantastic with a few friends and a genuine contender.

Oldies, but not so golden

So how about the alarmingly large amount of also-rans out there? Some of which had their heart in the right place, but faltered when it came to the crunch; and some of which simply had no heart at all. Looking back at those other footy games, in no particular order...

Champions World Class Soccer Endorsed By Ryan Giggs (SP19: 66%) appeared last month – after Acclaim snatched up the title from America in its original *World Class Soccer* form and plastered young Giggs's name all over it for release over here. It suffers from a muffled sense of control, a useless pitch radar and ridiculous goalkeeping anomalies. No, we didn't go much on it at all.

Super Cup Soccer 1 (69%) was a very early effort which didn't have a full review, but its sequel, **Super Cup Soccer 2** (SP19: 60%) also appeared last month, successfully maintaining the Japanese tradition of producing football games which miss the point altogether. It plays a dull game and should be given a wide berth.

One of the four original carts which appeared in conjunction with the SNES's original UK launch, **Super Soccer** (SP1: 83%) gained sales success purely through lack of competition. It looks and plays surprisingly similarly to *Super Cup Soccer*, and that 83% mark would now be nearer the rating which its virtually identical (now four-player) sequel **Super Formation Soccer 2** (SP11: 70%) got. Both look and feel extremely dated by current standards and again should be avoided.

Programmed by the same team who almost made Mode 7 ice-hockey work – Sculptured Software – **World Soccer** (SP14: 29%) took football to new depths, gameplay-wise. The confusing viewpoint meant that progress was nigh-on impossible, making it 'almost certainly the worst football game we've ever played on the Super Nintendo', to quote our original review.

Amiga gamers' ex-fave (now replaced by *Sensible*, in their eyes), **Kick Off** (SP3: 56%), wowed us with its almost unfinished feel and profoundly pinball-like gameplay. Now found languishing in second-hand cartridge outlets across the country, it is indeed dispensable stuff.

If the Japanese aren't programming Mode 7 footy bonanzas such as *Super Soccer*, they're beaver away at side-view efforts which have become almost synonymous with the Nipponese. **Hat Trick Hero** (66%) and **Prime Goal** (SP13: 75%) are the two most noteworthy examples, both being a good laugh to play and the latter including some bizarre anime-style cut sequences during tackles. But neither include the flexibility of their top-viewed European counterparts and can't be considered purchase-worthy.

And let's not forget **Kevin Keegan Player Manager** (SP12: 59%), an attempt to blend actual football gameplay with a strategical management section. The problem was, neither section was very strong, the 'action' part was particularly weak, being merely a slight revamp of the depressingly weak *Kick Off*. So don't buy it.

So where does this leave us?

Well, it really does boil down to individual preference. That may sound like a bit of a cop-out, but it's true. We all have our own favourites here; Tony prefers the smooth passing play of *World Cup Striker*, James will argue that FIFA's look and feel reign supreme, Wil just plain loves *Kick Off 3*, and Zy still holds *Sensible*'s delights close to his notoriously hard-to-please heart. You'll be safe buying any of those four games if you're after a footy title this Summer.

Game: Super Metroid
Publisher: Nintendo
Developer: In-house
Price: £60-£75
Release: Out now
Players: 1
Cart ROM: 24 Mbit
Adaptor: Most new ones
Game supplied by:
 Dream Machines (0429) 869459

After befriendng the Metroid in her previous outing, Samus takes the larvae to a research laboratory. Upon leaving, however, she receives a distress call in orbit. She returns to the lab to investigate...

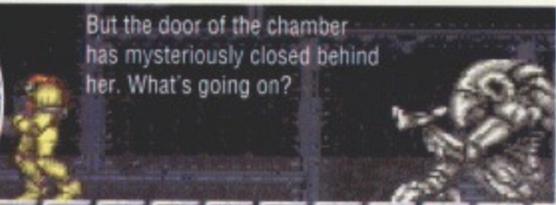

The focal point of most of the game is this golden, jewel-encrusted dragon statue. Its purpose will be revealed later on in your quest.

Samus collects the morphing ball early in her adventure.

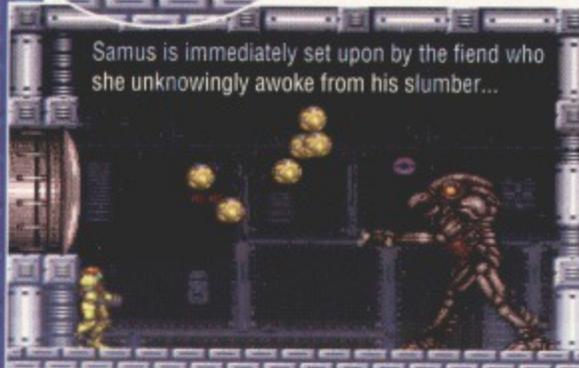

But the door of the chamber has mysteriously closed behind her. What's going on?

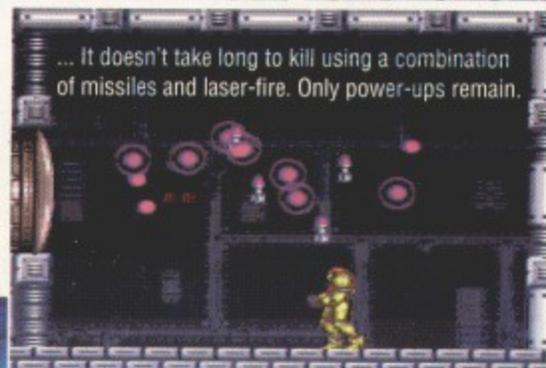

A beast is breaking free from the stone!

Samus is immediately set upon by the fiend who she unknowingly awoke from his slumber...

... It doesn't take long to kill using a combination of missiles and laser-fire. Only power-ups remain.

Descending into the laboratory's heart, she makes her way to the research centre.

SUPER METROID

JUNE 1994 ISSUE 20

This isn't just any Metroid. Oh heavens no. It's a *Super Metroid*. How super? Well let the team say...

TERMINAL TREATS

Super Metroid's world is peppered with rooms housing terminals. Search them out; they're essential to progress.

Early head-scratching moments: How do you negotiate that opening?

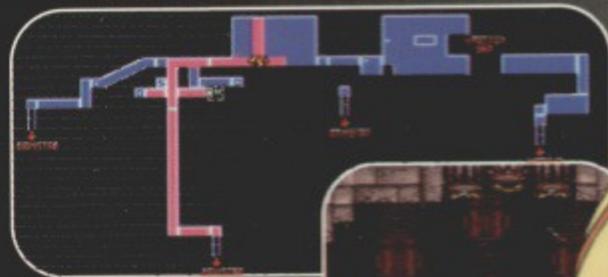

And how do you open these red portals? Eh?

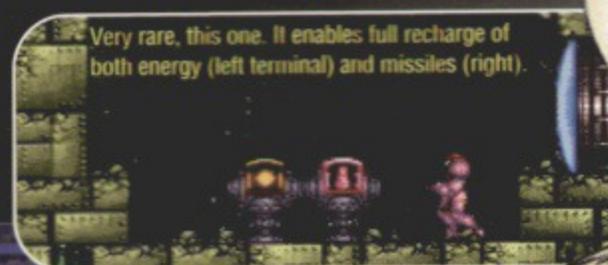

A save-game room. Use it as often as possible, obviously.

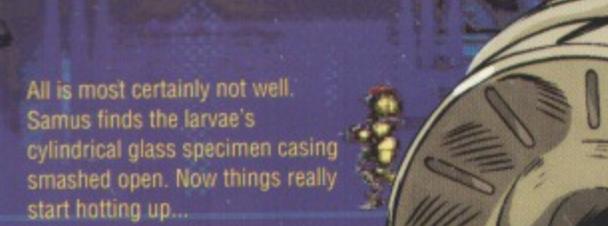

Left: The battery backed-up RAM allows three game positions to be stored. You'll be seeing a lot of this screen.

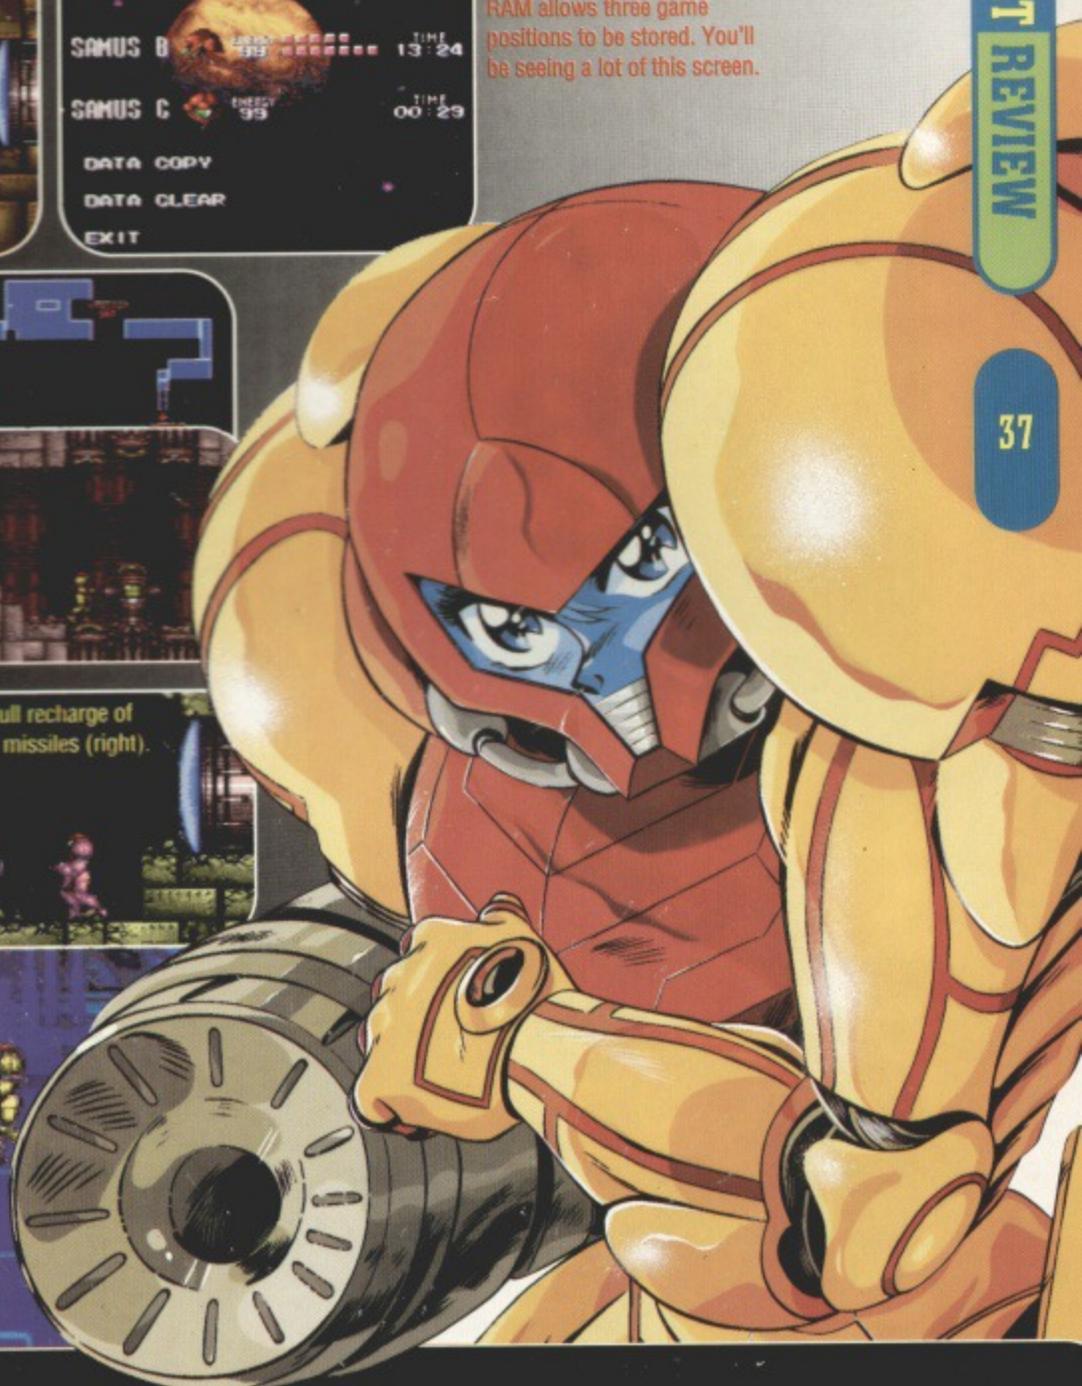

Download the map blueprint from these terminals (right). That's the first level (above).

Very rare, this one. It enables full recharge of both energy (left terminal) and missiles (right).

All is most certainly not well. Samus finds the larvae's cylindrical glass specimen casing smashed open. Now things really start hotting up...

GOOD, BAD OR UGLY?

An apology is called for, I think. When I sat down and played through *Super Metroid*, a single thought repeated itself in my head: that this game was everything *Rockman X* should have been. Now, let's be clear on the matter – I very much enjoyed playing *Mega Man X*, and I maintain that it's much more fun than *Mr Nutz* or *Cool Spot* – but my judgement is in doubt because, quite frankly, I didn't think they made games like *Metroid* any more. And now it's here, I think it deserves to be raved about a great deal more than *Mega Man*.

Super Metroid is more of an experience than a game. Not since *Zelda* have I seen something that manages to build tension and excitement so perfectly; and I thoroughly advise you NOT to read the manual if you want to get the most from your first playing. The structure of the game is vaguely cinematic, helped by the fact that it resembles the *Aliens* movie in many respects: play *Metroid* as if you were watching a late-night movie on your own, by switching all the lights off and whacking the volume up. Like the graphics, the sounds for each level are simple but extremely effective.

Taking an elevator down to the penultimate level, a new *Carmina Burana*-

esque soundtrack kicked in. Talk about atmospheric – it was like descending into the ninth circle of Dante's *Inferno*. As I have done several times in the past week.

The *Zelda* comparison is actually a little bit more appropriate than it might sound. In the process of exploring the subterranean levels of Planet Zebes, you'll see lots of rooms and doors placed temptingly beyond your reach. Later in the game, you'll find a new special object, or even learn a new trick with one of your existing power-ups, that lets you jump higher, climb walls or swing across chasms. Suddenly, you'll remember those undisclosed regions and an idea will form in your head that just maybe, if you went back and explored again with this new ability, something might turn up...

The problem with *Super Metroid* is that it's so compulsive you'll want to play it without eating or sleeping. And at that rate, unfortunately, you'll probably crack it over a long weekend. Even with 24 meg and hundreds of rooms to explore, there's a distinct disappointment to be felt when it's all over – you so much want to play just one more level, find one more special item, fight one more boss. I was feeling so lost I had to go

back and start playing through it for a second time, right from the beginning – and this time I swore I'd find more than 72% of the hidden rockets and missiles.

The cost of the cart doesn't enter the considerations of the marks we've given here, but we'd like to stress that some of the import prices being charged are exceptionally steep and certainly not in fair proportion to the fun you'll get from *Metroid*. Our recommendation is that you get together with a couple of friends, split the cost and then take it in turns to play through. That way you can actually compete with each other by seeing who can finish the game quickest (your times are clearly and accurately touted on the battery save game screen), which adds a little to the solitary nature of this one-player game.

In conclusion, I've re-read my *Mega Man* review and it occurs to me that I should really have kept those sentiments for *Super Metroid*. Can you smell that warm, greasy aroma? It's my humble pie, baking in the oven. I think I'll go and cut myself a slice because, thanks to this game, it won't taste too bad.

CREATURE FEATURES

A nasty flying vegetable thing.

Yer bog-standard wall-clinger.

A group of flocking gits.

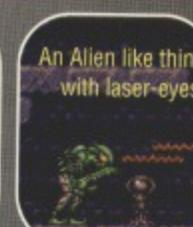

A ceiling-hanger. That swoops.

This nasty moves in wave-like arcs.

A hard-shelled floater.

An Alien like thing with laser-eyes.

This fiend jumps all over the shop.

GOOD, BAD OR UGLY?

Imagine a game which takes all the very best elements from *Turrican*, *Aliens*, *Exile* and *Nodes Of Yesod*, blends them to a perfectly dreamy consistency and then adds the extra ingredients which only Nintendo seem to be aware exist. You've probably formed a mental picture which bears strong resemblance to *Super Metroid*.

There's simply been nothing like it on the Super Nintendo before, or any other machine for that matter. It's such an overwhelmingly consuming game, a genuine rarity nowadays; something so utterly compelling that, as Zy says, you really won't want – or indeed, be able – to do anything else until you finish it.

The game's singular most remarkable feature is the atmosphere. And the incredible thing is, just when you think you've seen everything that it has to offer, it slams something completely new into your lap; a new weapon; a new technique to master or even an interesting new breed of creature to puzzle over.

The heroine herself, Samus Aran, has made the transition from 8- to 16-bit superbly. Oozing visual appeal, her

versatility is unrivalled by any other game character, purely due to the expandable nature of her combat suit, upgraded by finding collectable power-ups.

The action's so varied that one moment you'll be hurtling through sheer rock faces at breakneck speed, the next swinging from cavern-ceiling fixtures over bubbling lava pits. And control always feels so natural; Nintendo have engineered the playability with such refinement and finesse that you'll never find yourself blaming the game for finding yourself tumbling spike-wards on the later levels; but instead cursing your as-yet unperfected playing technique. There's even a selection of hidden techniques tucked away in there too, making it deeper gameplay-wise than we had suspected.

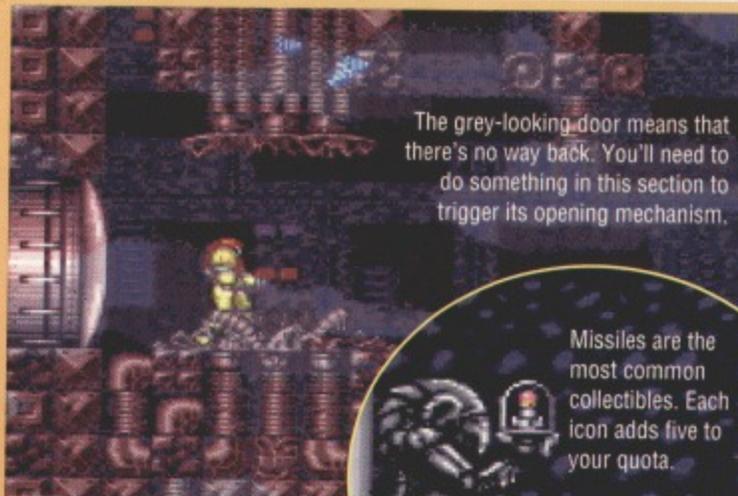

We're all aware of the oft-coined term 'interactive movie'. And we're just as aware of the pathetic excuses for entertainment which people so often pass off as qualifying to fall within that fictitious realm. But I would venture that this is in fact produces a stronger illusion of taking part in a film than most of the FMV-packed CD-based stuff doing the rounds. Of course, it doesn't ever

pretend to match them visually or in style, but the sense of immersion it imparts is virtually unparalleled elsewhere.

It's undoubtedly the best game I've played this year so far, and you can't conceivably call yourself a Super Nintendo fan if you miss out on playing it yourself. Don't expect passers-by to be knocked out by it, though. People in the *Super Play* office have stopped to watch someone else playing it for a couple of minutes and then carried on their way, largely unmoved, but I can't really blame them; Zy's description of it as more an experience than a game is wonderfully accurate. You cannot appreciate what it offers with a mere five minute gander.

So, having praised it to the hilt, is it really worth exchanging a pile of notes that high for? Well, again I must refer to Zy's appraisal: his price point/purchasing suggestion is certainly very sensible. But whatever happens, however you counter that slight conundrum, do make sure that you get to play it. You'll be playing a game destined for classic status.

● Tony Mott

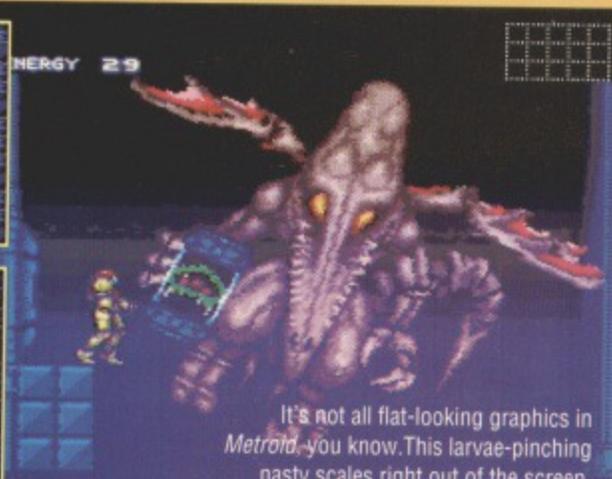

The grey-looking door means that there's no way back. You'll need to do something in this section to trigger its opening mechanism.

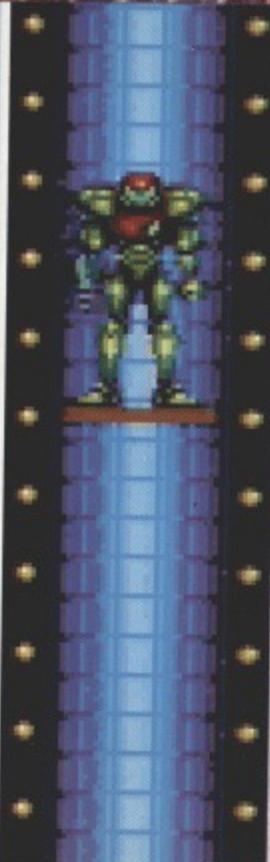

It looks like someone's got their eye on you.

Missiles are the most common collectibles. Each icon adds five to your quota.

It's not all flat-looking graphics in *Metroid*, you know. This larvae-pinching nasty scales right out of the screen.

Going down! Lifts connect the underground complex.

Samus uses the tantrum technique to open this door.

GOOD, BAD OR UGLY?

Do we expect too much from games like this? Are we too harsh when okayish games appear in a blaze of publicity from Nintendo in Japan? *Super Metroid* proves that we're not. It's everything I expected. Rather than be surprised that it's good fun, I'm pleased that they did what they should have done. Namely, taken a long time and come up with something that frustrates, annoys, dazzles and bewitches you. Something, basically, that captures your senses and your imagination.

Super Metroid is a corker, and proves that there are always new directions to take when people say that a certain genre is used up. It's true; this game is what *Mega Man X* should have been. But let's forget about *Mega Man X* and concentrate on how nice this game is. It's got everything I look for; playability, hidden tricks, powerful weapons and steamingly evil baddies (the *Metroid* itself, in fact).

Great, very Japanese game-looking graphics and a cool, thumping soundtrack also hoof *Super Metroid* securely into the endzone where the classics dwell. I'll be playing this one for ages. And I've got a feeling it's going to get better and better.

VERDICT: We all love this game. *Super Metroid* is absolutely marvellous and you should own it.

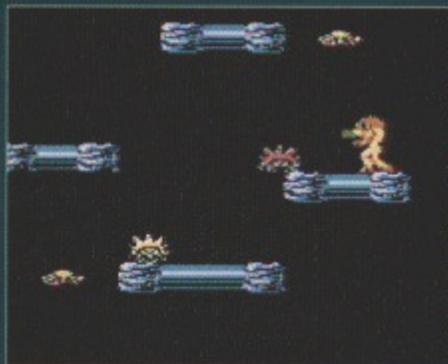

1994 will be an extremely important time for your Super Nintendo. Wise old game sages with their fingers on the pulse, their ears to the ground and their transparent-membraned eyes fixed firmly on the future are muttering that the next 12 months will be a 'software year'. Our cover game is 1994's first of many official in-house developments for the Super NES, but it comes at a time when it seems the big N's efforts are being directed more and more towards the future. We approached it with a healthy scepticism in order to get an idea of what we can expect – and if *Super Metroid* offers a taste of what's to come then we're going to have a pretty good time.

An incredibly successful title in Japan when it was launched a decade ago, the original *Metroid* was one of Nintendo's first Famicom carts with a MMC (Memory Map Controller) chip. Allowing a marked increase in game complexity, it gave designers the freedom to create such classic titles as the original *Legend Of Zelda* and the hugely popular *Kid Icarus*.

In the days of the Famicom (the original Japanese NES) most game heroes were men – and that usually meant handsome, muscle-bound macho stereotypes. *Metroid*, on the other hand, held a little surprise for those who completed the game. Samus Aran, the game's armoured warrior, appeared no different from the usual shoot-'em-up character. Replete with a set of slick moves and an impressive armoury of weapons, Samus took on hordes of alien pirates. It was only when the alien queen, the Mother Brain, was finally destroyed that Samus could finally relax and remove the battle-suit's helmet. Long blond hair fell out: Samus the bounty hunter was a woman.

THEN... AND NOW

It's when looking back at the original Famicom version that *Super Metroid's* roots become more apparent. The graphics, as we've commented, aren't the pinnacle of Super Nintendo achievements, but the heart of the original's gameplay has been transferred and duly improved.

Above: Not bad-looking for an NES game, is *Metroid*. And the playability is all there. Obviously, the platforms are a lot simpler.

Right: The two screens to the right are (above) the NES and (below) the SNES. It's exactly the same point in the game, so you can compare.

Above: It's all done in those nice bright blues, too.

MEMORIES OF METROID

Here you see the sheer beauty of the SNES. There's Samus, and that large thing above her is the Metroid. Scary, eh?

THE BACK-ROOM BOYS

At the time of Nintendo's infancy (in video game terms), company president Hiroshi Yamauchi assembled three development teams which were to be labelled R&D 1-3 (Research and Development). Each team worked on their own individual projects – both hardware and software – and have been co-operatively responsible for a significant degree of Nintendo's progress and current standing within the industry.

The design of *Super Metroid* is the work of none other than R&D 1, headed up by Gumpei Yokoi (See last month's *Inside Japan* feature – Ed), and universally acclaimed to be Nintendo of Japan's premier research and development team. Yokoi's team of 30+ developers (alarmingly described as 'a band of samurai' by a colleague outside of Japan) have the design of the incredibly successful Game Boy – and the not-so successful Famicom peripheral ROB (Robotic Operating Buddy) – to their credit.

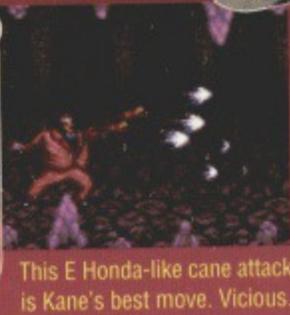

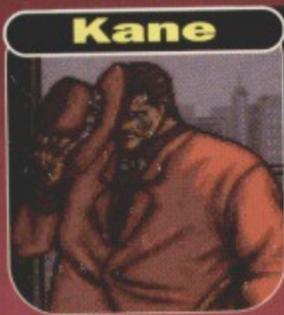

Slash gets a rasping chainsaw in the right ear 'ole, courtesy of a now-skinless Chainsaw. Better put some Witch Hazel on that, Slash.

BRING ON THE BAD GUYS

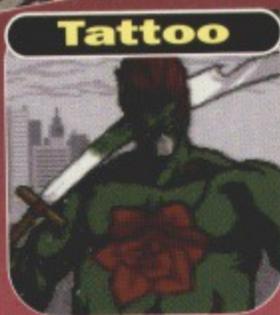

You want weird? Just check out this quite grotesque array of characters...

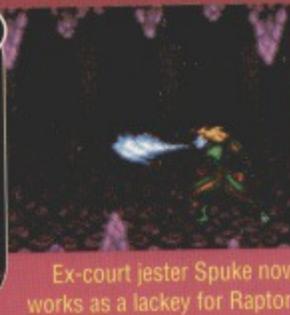

Dr Blast squirts at you with his syringe, then turns it on himself and transforms into a barb-tailed bug! Urgh!

Tattoo's rose tattoo bursts open to reveal a killer rosebush.

Ex-court jester Spuke now works as a lackey for Raptor.

That skin hides a metallic skeleton. Cut his hide off!

A great example of the game's backdrops is this shot from a level overlooking the city's bay, replete with shimmering water effect. That squarish object in the foreground can be broken open to reveal a burger or cola power-up icon.

Edged-weapons have been useful tools in settling disputes for centuries. And they'll retain their popularity right up to 2097, if the storyline of this game is to be believed.

SLICE, DICE AND DISSECT

Rather than just flashing and dying, dispatched baddies behave thus...

Either he's overdone the diet this week or this chap's just been dealt a blow. Have Nintendo seen this?

Ah, I see, this vertical swipe clearly shows that the baddies aren't flesh and blood, but robots. That's all right then.

No mercy, this bloke; he even takes out his rage on the animal community. And these definitely aren't robots.

Above: This flaming swipe is Slash's strongest attack. Its range is offset by the brief freezing effect which follows.

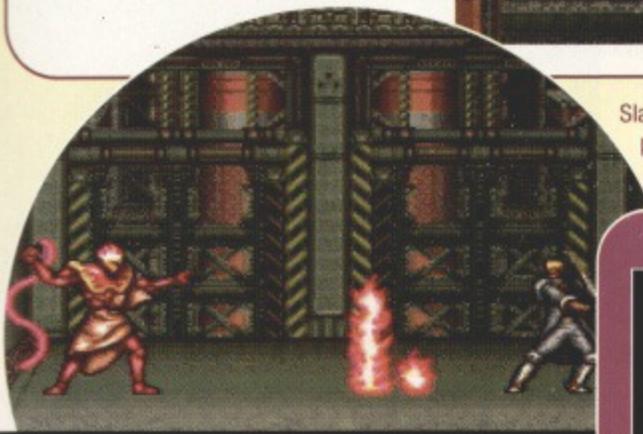

Below: Slash blocks attacks, but it pushes him back. Bottom: He mistakenly unsheathes his artificial Christmas tree. Oops!

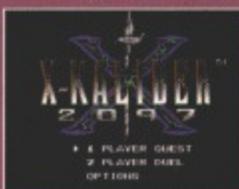

Right: Down and Fire on the pad brings forth this skull-splintering attack. Useful when falling from ledges, I found.

Slash goes toe-to-toe with a pink-clad whippy chap. And gets his curtains criticised.

GOOD, BAD OR UGLY?

Game soundtracks are often ignored, usually with good cause - after all, most are on a par with good old Uncle Herb's annual comb and

the stages with no secret bits as such - nor is there much variation in level layout or action. There are some token parts, such as the glass-encased lift which attempt to inject a little variety into the proceedings but, vaguely interesting characters aside, X-Kaliber 2097 lacks the sparkle it needs to make it worth spending any great amount of time with.

paper Christmas medley in terms of listenability. But there is stuff around which is genuinely entertaining, and X-Kaliber 2097 attempts to stake a claim for inclusion within that bracket. American dance music ensemble Psykoonik were responsible for the original tracks which have been squeezed into the SNES's Sony sound chip. The manual describes their brand of tunesmithing as a fusion of pop, techno and heavy metal.

The game's appearance is its only commendable part, and even then it's something of a mixed bag. The industrial backgrounds are very reminiscent of Contra Spirits and are wonderfully atmospheric, but it's a shame that the same attention wasn't paid to the characters themselves. Every character has an ugly black border surrounding them, giving a flat, laid-down-on-top appearance which detracts from the otherwise pretty damn fine look. It's short on challenge too, has a daft storyline and the two-player head-to-head mode is a complete waste of time.

And I think therein lies the problem; choosing to replicate a sound as diverse as theirs is perhaps a touch ambitious, especially if the emulation techniques employed are those demonstrated in this game. The results are weak warblings which I suspect bear little resemblance to the actual band's sound. The daft thing is, it didn't have to be like this. Tim Follin proved with Rock 'n' Roll Racing that it is possible to coax some convincing vibes out of the SNES - if you know how. Shame, that.

X-Kaliber? X-tremely average, more like.
● Tony Mott

But what about the game? Well, it's a platform slash-'em-up. Doesn't that tell you enough? OK, the problem here is obviously how to take the platform slash-'em-up concept and make a great game out of it. It's a contradiction in terms, surely. And Toshiba EMI (the developers) don't seem to be any more aware of how to do it than anyone else. There's only one route through

Rarely has a game's title filled me with more enthusiasm for the product than '*Astro Go! Go!*'. The mere mention of it had me bouncing up and

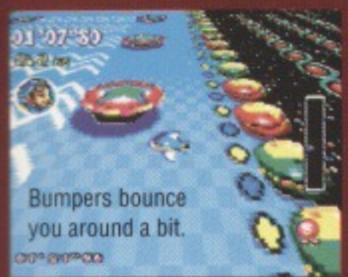

down on my chair in anticipation. Actually seeing it written on the cartridge, I could feel the excitement welling up inside me. And when the options screen appeared, with the title written in huge letters across it, I could contain myself no longer. 'Go!' I cried, rising from my seat and waving a fist above my head, 'Go! Go!'

After that, it was all downhill at a frighteningly rapid rate. *Astro Go! Go!* is one of those games that deep down you know isn't going to be very good, but you kind of secretly hope you might be wrong, and then

GO FOR IT

Jumps make you jump into the air.

Bumpers bounce you around a bit.

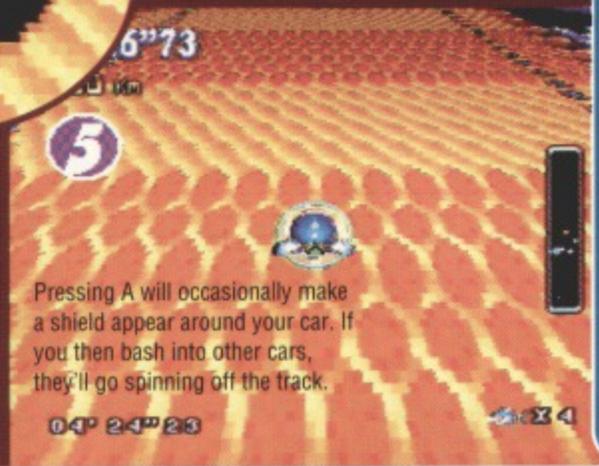

Below: These bits make you slide around the track.

Left: You'll fall down holes (if you're not careful). Open and close them by driving over skulls.

There's a very limited number of special features to watch out for as you drive around Astro Go! Go! Here are most of them.

Pressing A will occasionally make a shield appear around your car. If you then bash into other cars, they'll go spinning off the track.

Right: Arrows make you shoot off really fast in the direction they're pointing.

You're just as likely to get run over on zebra crossings, like this one, unfortunately.

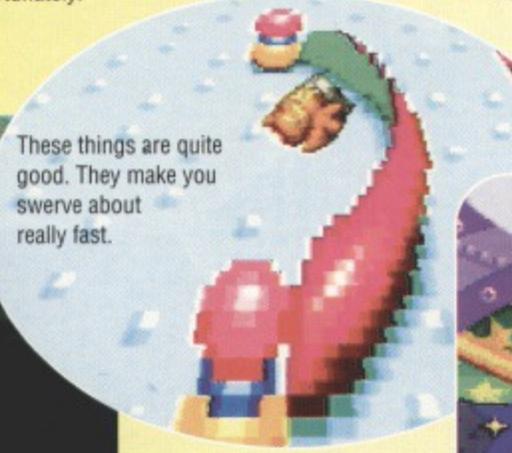

Here's a nerve-wracking sideways bit. Eek! Erk!

The black bit on the right, incidentally, is a map showing where everyone is.

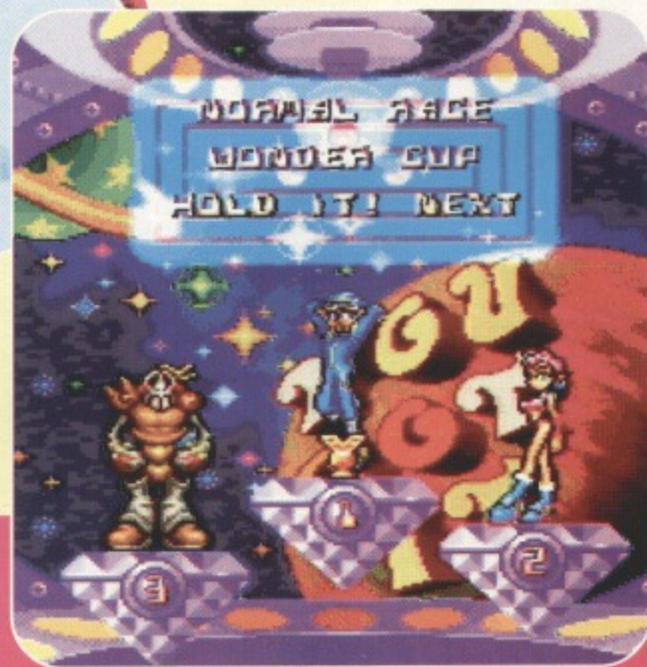

Here we are going over a jump. It seemed to be the safest thing to do.

These things are quite good. They make you swerve about really fast.

Left: After each race you get all sorts of statistics about lap times and things. Then three drivers get cups, and you get to see their overall rankings. Just like Mario Kart, basically.

Below: There are three cups, and we've just won the easiest one. There probably isn't a 'special' one when you get gold in all three, though, like in Mario Kart.

get terribly disappointed when it turns out to be as crap as you expected.

It looks superficially like top early Super Nintendo racing game *F-Zero*, but the similarities aren't even skin-deep, barely penetrating the upper epidermis in fact. It's got the smooth, high-speed scrolling road out of *F-Zero*, and the futuristic cars that skim along on top of it, but that's about it. Completely missing is the intense, edge-of-your-seat action that makes *F-Zero* so great, having been replaced by dreary, hum-drum stuff that frequently has you switching the game off before you've completed a race, simply to avoid having to do another lap of one of the duller courses.

This might sound harsh, but it's completely true, even though it's hard to put one's finger on exactly what the problem is. The cars you compete against don't help - you

rarely see them during races, and when you do they just sort of drift past, with none of the jockeying for position a true racing game needs. And the courses themselves hold few surprises - except, perhaps, when you go round a particularly sharp bend and suddenly find the road scrolling backwards, away from you, with practically no warning of any obstacles that might be approaching. Although that's more irritating than exciting.

The only thing *Astro Go! Go!* has actually got going for it, by my reckoning, is an extraordinarily weird atmosphere created by a combination of odd colours and bizarre sound effects. It feels tremendously Japanese.

But that's hardly enough to save it from eternal damnation. As the game itself says when you win a championship, 'Hold it! Next.'

VERDICT: Engagingly off-beat, but only for a matter of seconds. Then its true colours as a lazy attempt to copy *F-Zero* will shine through, driving you to despair.

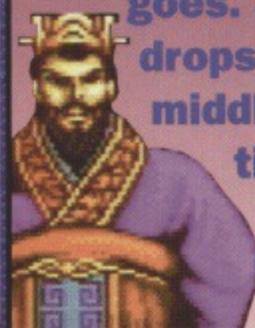

Not exactly an epic battle. Only nine people have bothered to show up.

These special items can add greatly to your powers of war and diplomacy – but how historically accurate is a luminous sword, I wonder?

'May you live in interesting times', as the old Chinese curse goes. *Kingdoms* drops you in the middle of such times and promptly scarpers.

Aha! You've fallen for the classic blunder, 'Never get involved in a land war in Asia'. A nice feature is your advisor, who offers wise words on your leadership.

ROMANCE OF THE THREE KINGDOMS III: DRAGON OF DESTINY

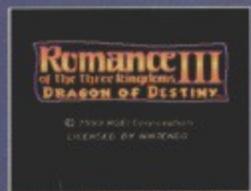

General Hospitalised

Even in the midst of war, a massacre can be avoided. Personal combat between two opposing generals can decide the outcome of an entire battle. Unlucky, Cao Ang.

GOOD, BAD OR UGLY?

War, poverty, famine, treachery and a massive instruction manual – it's that hot Japanese favourite, the historically accurate Strategy

Wargame. Now then, calm your racing pulses. If I say that it mixes elements of *Risk*, *Diplomacy* and *Kingdom* have I made it sound any more interesting?

The good news is that it's not at all bad. Some of it is, though, and it's my duty to inform you of such. At first I was a little confused by the enormous 'cast' of historical figures – I knew nothing about this period, and sometimes confused my Dong Zhou with my Dong Rhou and my Kong Rhou. It didn't take me long to pick it up, however, as I was soon forging alliances and plotting intrigues in the role of Cao Cao. I'd have preferred something a

bit more like *The Water Margin* myself, but I guess I'm just not a realist at heart.

Sadly, the presentation has all the allure of a packet of lard. The BGM is restricted to a couple of plinky-plonky tunes, and the graphics are – well, take a look. Distinctly 8-bit, with dull colour and design that really doesn't capture the flavour of the milieu. The battle sequences are even worse: 10,000 soldiers charging into battle in the name of their warlord are represented by, er, a small blob with a stick. There's no consideration of which way the unit is advancing, whether it seriously outflanks its opponent, the consequence of routing, etc. Once you've learnt the importance of strong crossbow units there's not much more to it, and the naval battles follow criminally similar rules.

Worst of all, my enjoyment was undermined by a lousy menu control system, in which one of the joypad buttons could act as either Cancel or Execute, depending on the option selected. When you're trying to balance the budgets of eight city states, then you really need something a bit friendlier.

Although it allows for up to eight players taking turns, I really couldn't recommend

this for more than one player. A single turn of one game month can take from 10 minutes to an hour in real-time, depending on how many cities you control and how many battles must be fought. Simple arithmetic will reveal the unlikelihood of a multi-player game being either completed or, indeed, at all interesting. Besides, this is the sort of game you play behind closed curtains when you know you ought to be doing more with your life.

THE FLINTSTONES

THE TREASURE OF THE SIERRA MADROCK

Some day, maybe Fred will win the fight, then this cart will stay out for the night...

A TYPICAL EPISODE

A typical episode goes thus; Fred and Barney plan a trip away from their wives. They take bowling balls and stupid moose hats with them, for some reason.

Barney's wife Betty finds out they're taking the hats (it's supposed to be secret) and sabotages Barney's foot-powered car. Barney fails to meet Fred, who suspects him of bottling out of the trip. Fred refuses to speak to Barney and they fall out. Wilma and Betty think this is silly, but then they fall out over some minor dispute. Fred and Barney collide in the garden,

running away from something, and become friends again. They think that Wilma and Betty's falling out is silly. Wilma and Betty make up and they all laugh. Fade to credits containing the names of about three million people.

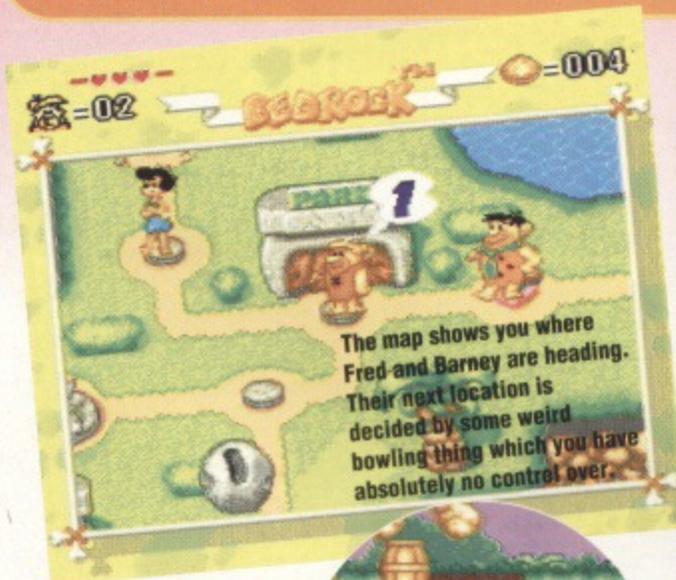

How come Barney's voice changed during one series? Remember?

Left: Barney jumps over Dino. (This didn't happen in the show either.)

Right: Fred realises he's spent over £50 on this tat.

The map shows you where Fred and Barney are heading. Their next location is decided by some weird bowling thing which you have absolutely no control over.

Right: Yes, there's a shark in the game as well. Here it is.

Fred meets a madman with two barrels. Another high-point.

Right: Fred runs along in Mode 7. This is a high-point, too.

GOOD, BAD OR UGLY?

The people who invented *The Flintstones* couldn't have realised that their idea would last for so long.

After all, the joke is that the people living in Bedrock have all the modern conveniences available to us, but they're made out of stone and powered by a small bird from Brooklyn. After that, it's all just a sit-com (see the box marked A Typical Episode).

This game has some token plot about looking for treasure, but what it really boils down to is just moving around a map and beating each level. The problem is, all the levels are virtually identical. There are a certain number of variable baddies which appear - like fish, armadillos and bombing birds - but generally it's all much of a muchness.

Fred and Barney jump, swing their clubs and run around. And that's about it. Unless you find a sub-game. These are generally poor diversions from the game, in which you can win maps, money or energy points. When these first appear, it breaks up the general tediousness of the levels, so you get excited. But don't. The sub-

levels don't get much better than the humdrum levels themselves.

It's a pity that *The Flintstones* is so boring. The graphics are neat, especially all the animation that's gone into the main characters. Sure, some of the others don't look too *Flintstone*, but someone's put some thought into it.

What sucks is the playability. The backgrounds are all the same, so you never know where you are. Various creatures appear from nowhere and attack you with no warning at all, so you haven't got time to react; and you're never sure whether you're dead or not because your character does a little dance to indicate pain or distress, before collapsing off the screen.

Oh, and there are a lot of mind-numbing talking bits as well.

A HOLIDAY IN TOKYO!

Be sure to get hold of a copy of *Super Play's* July issue, which is out on Thursday, 2 June, because stuck on the cover there'll be a special card which could win you six days in Tokyo, the bustling capital city of Japan. As well as enabling you to enter this storming competition, the card will also allow you 20% off the recommended retail price of the Sony Electronic Publishing games *Skyblazer* and *Equinox*.

All you'll need to do is answer a simple question, then complete the back of the card with your details and take it to an HMV Games Store. It's as simple as that! The prize is a six-day

holiday at the Shiba Hotel, right in the heart of downtown Tokyo. It's a first-class establishment, within easy walking distance of the city centre, and just seven minutes from the station (where you'll be able to catch the famous bullet trains). Two people may go, and all meals are paid for, as well as a one-day guided tour of the city.

But you'll only stand a chance of winning if you buy a copy of the July issue of *Super Play*. You won't be able to miss it because as well as having a distinctive Wil Overton-type cover, there'll be those exclusive Manga Video collectors cards of *Akira*, plus the Sony/HMV card mounted on the cover.

Once upon a time, in a land far, far away, lived four little trolls. They were very lazy little trolls. They spent most of their time asleep in bed...

I am a troll and I live in a hole. No that's wrong. I mean a mole. But that doesn't make any sense. (Just get on with it - James.)

SUPER

There are lots of collectibles to pick up along your way. When you complete a stage hundreds of them appear.

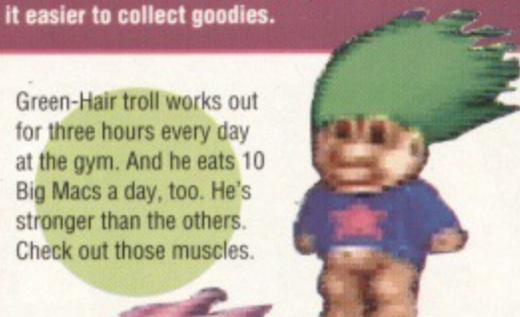

Collecting apples or shells (see pic below) will add leaves to your lucky clover.

TROLLICULUM VITAE

Each troll has his own special abilities. You can change the troll you are playing at any stage - to cope with a particular obstacle or make it easier to collect goodies.

Blue-Hair troll can swim underwater. Which is very useful in the levels where collectibles are scattered about in underwater maze-like passages.

Green-Hair troll works out for three hours every day at the gym. And he eats 10 Big Macs a day, too. He's stronger than the others. Check out those muscles.

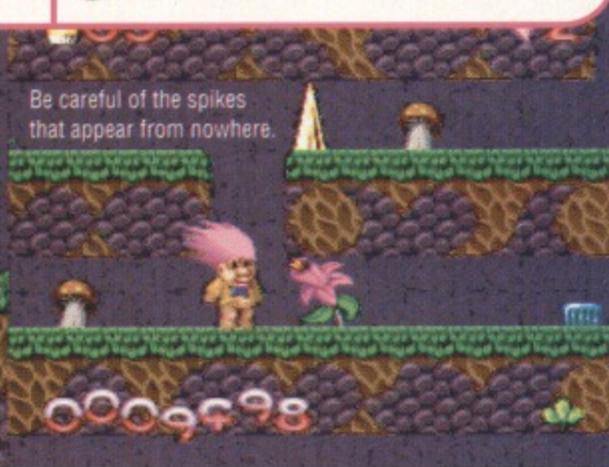

Red-Hair troll is the fastest runner, which means that he can get out of trouble fast. He's also the friendliest of the four trolls. Look - he's waving at you now!

Pink-Hair troll can jump really high. He's probably the most useful of the lot, as he can reach apples placed miles up in the sky - and collectibles on tall pillars and stuff.

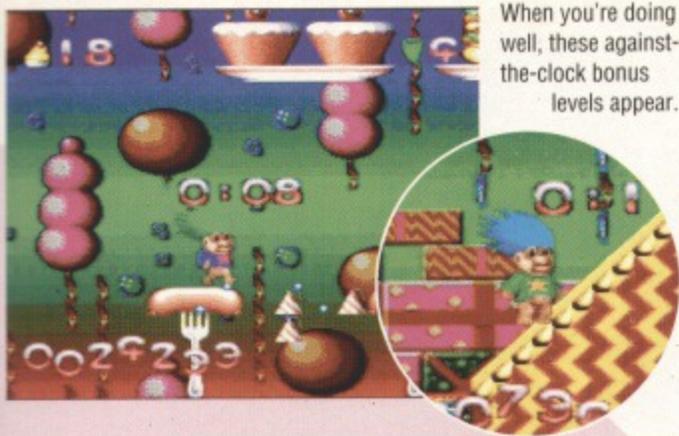

Use these ropes to swing over spikes - or to find new sections to colour in and hidden apples to collect.

Be careful of the spikes that appear from nowhere.

When you're doing well, these against-the-clock bonus levels appear.

This is where Blue-Hair troll comes into his own. He's the only one who can swim underwater to collect lots of bonus items.

NASTY BAD THINGS

Along your way, you have to avoid loads of 'orrible baddies. To get rid of the gits completely, chuck custard pies at them and then eat 'em. If you don't gobble the nasty guys straight away, they'll simply brush the custard splodge off and carry on.

Not all of the toadstools are friendly.

These blobs drop randomly from the sky. Bastards!

The crabs are soooo cute. But make sure you avoid them.

Those boots were made for walking. Over you...

A bad-tempered black thing.

'Don't you just love being in control?'

TROLL ISLANDS

GOOD, BAD OR UGLY?

I remember trolls from when I were a lass - back in the early '80s. I wasn't a fan of them then, and when they had a revival recently, I still wasn't

massively impressed. However, my young cousin and my nieces all wanted them for their birthdays, so I guess they must have some appeal. I am obviously missing something. Thus, when James handed me this game to review, I was prepared to look at it with an open mind.

The first thing that struck me about this was the cheery and colourful graphics, and the jolly, bouncy little tune that accompanies them. The next thing that struck me was the fact that there's not much to do in *Super Troll Islands*. You just run about colouring in the landscape as you go, avoiding spikes and other obstacles and splatting all the baddies with custard pies. Oh, and collecting bonus items, of course. It's a simple idea which marries together platform elements to a puzzly style, as you work out how to fill each block of landscape in.

You have four trolls to choose from to

play, each of them has different coloured hair - pink, red, green and blue. And each troll has his own special ability - one can swim underwater, one runs fast, one is very strong and one can jump really high. You can change the troll you're playing by pressing Select, which will take you back to the bedroom you started in. Here you just bounce on the bed of the troll you want to change places with. (You can even choose the direction the trolls' hair leans on the configuration screen!) When one of your trolls loses all his lives he returns to the bedroom, jumps into bed and falls soundly asleep - he doesn't actually die. When this happens, you just choose another one to use. The game is over when all four trolls are asleep. (After you've used up all your continues, of course.)

I really like it when the trolls say 'Yeah' or 'Wow!' when something nice happens or 'Ow!' when they get hit - in this remarkably cute little voice. It's certainly one of the neat touches in the game.

The age-range quoted on the box of *Super Troll Islands* is 6-14, but I reckon it should be more like 6-11. Most self-respecting 14-year-olds wouldn't be seen

dead playing with trolls and might conceivably tire of this game pretty fast. The levels are, however, big and colourful and do get considerably more tricky as you progress. So, whilst the game would appeal to younger children because of its bright and appealing graphics, they'll have to master the nicely-programmed, but rather sophisticated movements of the little characters. And a six-year-old may find getting through five islands with 10 levels each a little too difficult.

Each character has a different ability, so here's a run-down of them all.

SPECIAL MANPOWER

The Cut Kick literally 'cuts up' the opposition... er, literally.

The Skull Shot protects the ball down the pitch.

The Wood Shot is like the Skull Shot, but with leaves.

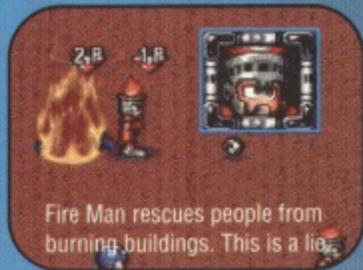

Pharaoh Man burns up the opposition... ho, ho, ho. Hmm.

The Mega Shot can be pretty devastating, actually.

10,000 volts of soccer action, thanks to Electric Man. Sigh.

Fire Man rescues people from burning buildings. This is a lie.

If this isn't crammed with tension, I don't know what is.

Dust Man (eh? eh?). Leaves you in the... In a right mess.

Wood Man hadn't spoken to the large blob for some time – and he wasn't going to start now.

GOOD, BAD OR UGLY?

Imagine a team with the talent of The Dog and Bucket's Sunday squad being transported into the future, enclosed in

tight-fitting metal suits and then smothered in toffee. You're now half-way to discovering the feel of *Mega Man Soccer*. A negative start, I admit, but no less accurate for all that.

To begin with you're presented with a spurious 'A N Other Evilbloke' plot to add some depth, but at the end of the day, this is just a football game where the players are, for some strange reason, dressed in metal, wood or even as pharaohs. And they all have special mega, wood or pharaoh-man powers to help them liven the game up. You can play against the Super Nintendo or a friend; and there's also a cup to play for and a tournament to play through. So the cart's options, although not overflowing, have taken the restless gamer into consideration.

Combined with the graphics, which are just about the best in any football game I have ever seen, this *should* be the one football game to rise above the crowd (*Where have I heard that before?* - Ed). But it won't, despite the added bonus of having a recognisable character as the star.

This is a slow, tedious and rather pointless game, that in an ideal world, shouldn't have made it past the playtesters. The control is - and I can't emphasize this too strongly - painfully frustrating. The players clump around like, well, like blokes wearing metal suits smothered in toffee. And that's all you need to know really. They're so slow that this one fact overshadows anything else the game might have had to offer.

There are other things wrong with this game too: you have the option of kicking the ball so it's virtually unstoppable, kicking it so that it goes reasonably quickly, or kicking it rather slowly a short distance... Oh and you can head it as well - which just isn't enough. Especially when considering the competition.

Mega Man Soccer has absolutely nothing to offer any kind of player, it has appeared at a time when there's already a glut of football games, and it's by far the worst of the bunch. This is a whim of a game that will only sell well because it features Mega Man.

Above: The two teams face each other in one of the most action-packed moments of the game. No, really.

IT'S JUST TERRIBLE

Pandemonium has broken out at the football stadium, Dr Wily's evil robots have taken over - and it's up to Mega Man to... play them at football. This is all described, in what for me was the best part of the game: the storyboard. If only a similar amount of time had been spent on the gameplay as on these lush graphics. It's also quite a nice kitschy idea that football is the only way to battle evil. If only the real world were like that...

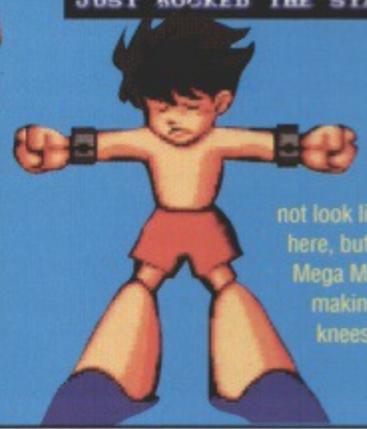

IT'S A BEAUTIFUL DAY FOR TWO TEAMS ARE ABOUT READY TO HEAD ONTO THE FIELD.

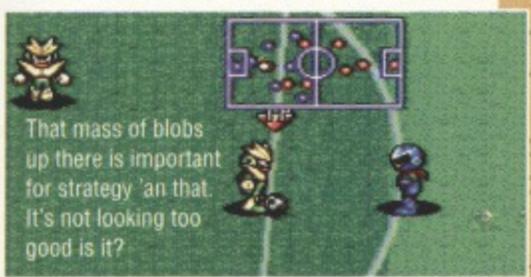

WHAT ARE THEY UP TO???

SO I'LL JUST MAKE A FEW MODIFICATIONS TO YOUR PROGRAMMING

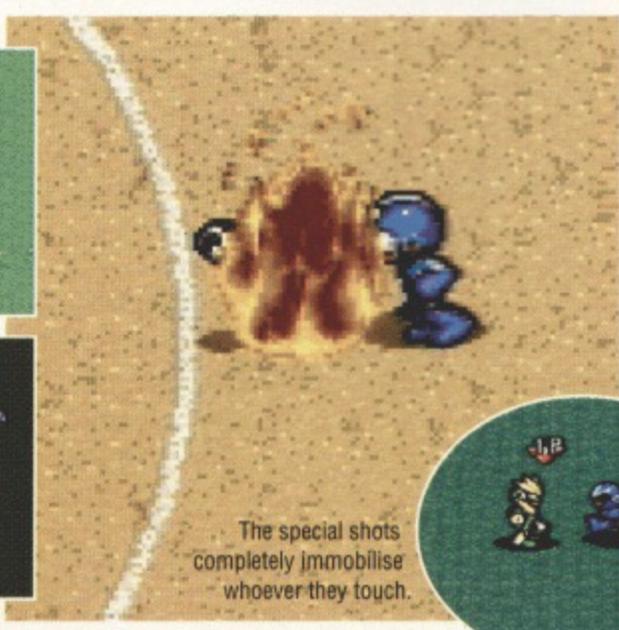

He may not look like much here, but this is a Mega Man in the making. Funny knees though.

That mass of blobs up there is important for strategy 'an that. It's not looking too good is it?

Leaping to stop the ball is a great technique. Well, it's the only one really.

The special shots completely immobilise whoever they touch.

If you'd been warped back in time from the year 2193, your spelling would probably be a little shaky, too.

TIME TRAX

TIME WHAT? HUH?

Time Trax is based on a not-terribly-popular American sci-fi TV series called – yup – *Time Trax*. We're not quite sure who it stars, but whoever he is, he plays a character called Darien Lambert. Born on 17 August 2160, in Enclave 1-6, Middle City, Darien was unclaimed by his parents and chose his own name. He's got an IQ of 204, can run 100m in 8.6 seconds and a mile in 3 minutes 38 seconds, has a heart rate of 35 beats per minute, and can read at 1.2 pages per second (which is slightly above average, apparently –

this is the future, after all). He can also do 'mash-ti' (some sort of made-up futuristic martial art) and has received Beta Wave training, which means he can somehow speed up the rate at which his brain processes information, making the world appear to slow down. Or something.

He graduated first in his class at the International Police Academy and became a Captain in the Fugitive Retrieval Section, something he'd always wanted to do. But then one day he found himself on the trail of someone called Mordical Sahumbi. As the instructions explain, 'Sahumbi has been helping criminals in 2193 buy themselves a future by escaping into the past – a past that has no record of their crimes – a past that we know of as our present – 1993.' Er, hang on.

In the future, all buildings will be made out of toilet rolls, washing-up liquid bottles and egg boxes.

WATCH THIS

One of the finest parts of the game is this helicopter on Level 4. (In fact, um, it *is* Level 4.)

It's actually a giant Mode 7 thing, tilting and rocking in the air above your motorbike.

You've got to shoot it till flames come out all the way along the bottom.

You then get the most incredible explosion ever, which makes your entire telly shake about.

Your gun often only stuns people. You've then got to go over and punch them out. No holds are barred violence-wise.

MIND BENDING

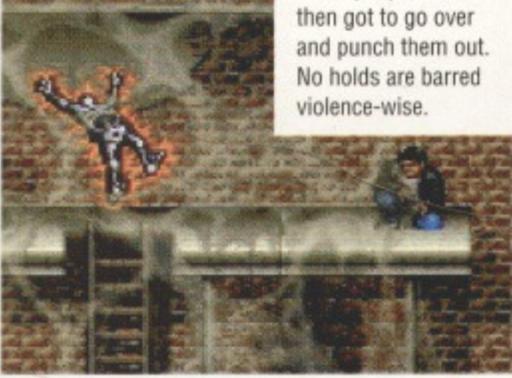

Thanks to his special Beta Wave training, Darien can quite literally stall for time, using something called, in fact, Time Stalling. When you press the appropriate button, the screen goes wobbly and the game slows down for a few seconds. We've yet to use this facility in anger.

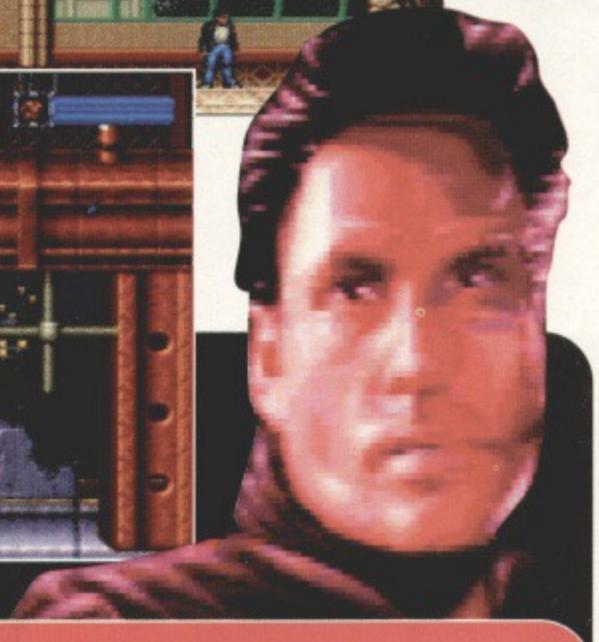

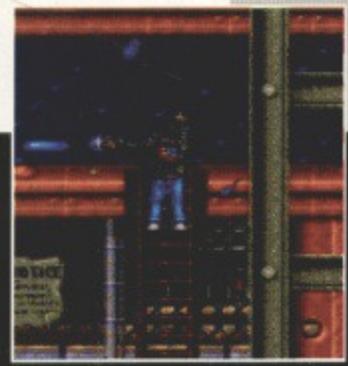

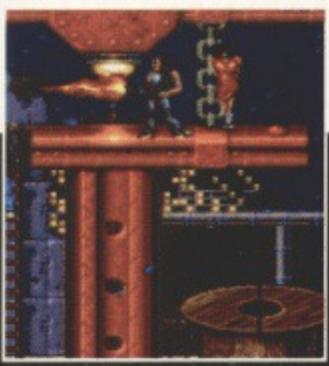

This is Level 2, the laboratory which sends you back into the past. (After you've killed several technicians.)

And here's Level 3, which is set in the Smithsonian Institute – some sort of American museum.

Below left: Recognise these girders, runaway barrels and women who need rescuing?
Below middle: Then you must've played *Donkey Kong*.
Below right: Or have worked on a building site.

GOOD, BAD OR UGLY?

Time Trax, the TV show, sounds a bit like a version of *Quantum Leap* in reverse. Instead of jumping about in the past righting wrongs, the hero jumps back into the past once, in the first episode, and then stays there, righting the wrongs as they jump about him. Sort of. Er, so it's probably a bit more like *Terminator*, in fact.

Time Trax is great, anyway, despite sounding like a proper recipe for disaster. You know the sort of thing – TV licence becomes platform beat-'em-up; games players flee for their lives the world over. Except this time, Malibu Games seem to have really put the hours in, and come up with a slick, playable game that defies your expectations at every turn.

The first thing you'll notice is that, contrary to all the laws of TV licence/platform beat-'em-ups, the graphics aren't bad at all. Darien looks great, with his jeans and his leather jacket that has a Stars and Stripes on the back. And the scenery's really detailed, with loads of parallax scrolling and Mode 7 'transparent' effects.

Try walking about a bit and shooting some people and you'll be astonished to find that the controls are ultra-responsive. Darien can do plenty of different moves, too – like blocking enemy bullets and swinging from bits of overhead pipe.

What's more, you won't find baddies reappearing after their start positions have scrolled off the screen and back on again. Or places where you've got to jump onto platforms you can't see because they're off the edge of the screen. Or 300-mile intervals between restart points. Or bits of scenery that look like platforms but turn out not to be. Or any of the other annoying niggles you might have expected. Nope, *Time Trax's* programmer's have carefully weeded out all the traditional platform beat-'em-up pitfalls...

... and replaced them with lots of really great things. Things like secret rooms that you've got to 'unlock' by finding certain objects. And power-ups hidden in obscure bits of scenery that you wouldn't normally visit. And gigantic spiders that crawl about harmlessly in the parallax-scrolling foreground, occasionally leaping back towards the background and, due to a tragic consequence of the laws of

perspective, suddenly becoming very small and getting squashed under your feet. All genuinely important features which, when they're all added together, make for a truly well-rounded game.

All sounds too good to be true? 'Fraid so. Sadly, there's one classic mistake Malibu haven't managed to avoid – *Time Trax* is miles too short and miles too easy. The end-of-Level-1 boss can be dispatched in about five seconds once you know how, and by my third go I was half-way through Level 5 (out of 8). Which is a real pity because, while it lasts, *Time Trax* is astonishingly good fun.

Above: The chap in the blue suit is the Boss of Bosses. He sits and watches you pit yourself against all the others. And laughs a bit, too.

WARRIORS

Left: Kunolchi, her golden hair swinging, dispatches a load of bad guys with her wicked little knives.

Right: I haven't a clue what's going on here. A special move, probably.

Left: Fighting more than one enemy simultaneously requires a special type of skill. It's called hammering the buttons furiously.

Right: If you lose all of your energy, this happens. It's horrid. So don't look, OK?

power meter and the word BOSS. They appear at the end of each level and they take some serious kicking. See? A thick herbivore could indeed grasp what's going on.

So it looks like an arcade game. But how does it play? Well, for a start you can be one (or two, if your chum's around) of three rock-hard characters. But some aspects of the game don't depend on which character you are. At first you think that it's the sort of game that calls for repeated hammering of the punch button - because this tactic is vastly effective against the legions of naughty henchmen which attack you. But no. Do this a lot and you'll lose. There's only one way to be good at *Ninja Warriors*, and that's to master all 10 of the moves each character can perform.

Of course, there's nothing tricky about these moves; most are a combination of two buttons, or one button and a direction. But using the right one at the right time in the middle of a rack is vital.

Indeed, playing *Ninja Warriors* is fun. Loads happens in the background; you've got

a special 'rage-gauge'-type meter which gives you a smart-bomb attack every few minutes, and there's a neat feel to the characters. They've got some weight to them, which is nice, and each of them has a different fighting style, so once you've beaten the game with one, you can have a crack with the others.

Ninja Warriors is a goody, then. If software folk are going to release scrolly fighting games, they've got to be this smart. The feel is right, the graphics are skill and there's a lot going on. The only problem is that the minion-bashing is a bit repetitive - you can get away with just punching them. In fact, to alleviate the boredom, it's a good idea to practise your special moves on the no-hopers - so when you need them, they'll fall at your fingertips.

The only thing worth criticising about this game is the sound. It looks like an arcade game, so why doesn't it sound like one? All you hear are pathetic grunts when you blap people. Annoying, because there's a good deal of blapping people within *Ninja Warriors*. Still, you can live with it. In fact, to simulate an

arcade feel, get 80 people who annoy you to wander around your room, occasionally laughing in a stupid way and watching as you play. Some should have bad breath or a cold, and many should be in shell-suits which squeak and swish as they walk.

Where was I? Oh yes. *Ninja Warriors*. Get it if you want a walk-along fighting game.

VERDICT: Despite its modern ninjanness, it's got an old-fashioned feel. But, as the game is done well, *Ninja Warriors* is worth checking out.

Imagine a land full of adventure and fantasy, where clerics, warriors and elves wander about fighting things. Imagine how much fun it could have been...

KING OF DRAGONS

Fighter

Fighter isn't really a good job description; his only qualification is the ability to whack things hard with a large, bladed weapon.

Wizard

Never trust a man in a dress. Initially, the wizard is the weakest character, but then he casts fiery spells. I think a sword is better.

Dwarf

Small, strong and stupid, the dwarf is one of nature's natural squaddies. He's slow to run and advance levels, but packs a hefty punch.

Cleric

He's got God on his side. Eric the Cleric converts heathens with his large hammer. Believe, or be heavily concussed.

Elf

A big girl's blouse, is the Elf. He has ranged attacks, but is a real wimp in close quarters fighting.

Jewellery Jewels are the key to raising your experience. The more experienced you are the harder you hit, and the more enemies you kill.

Now it might just be me, but this immolated corpse looks a little familiar.

If you want to get a head... Look, that gag isn't going to work is it? This is a hydra. You kill it. You go to the next level.

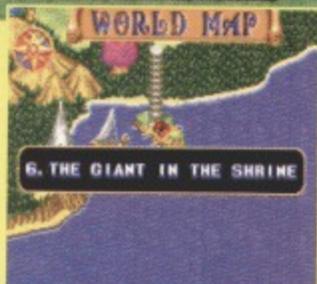

Your mission is explained by an old bloke in what appears to be a corner shop. Our local shopkeeper is always saying stuff like that and I never believe him.

The red dragon Gildiss has risen from his long slumber. The northern folk are overrun with monsters.

Suddenly, the floor gave way and we both fell 1,000 feet. There was no real reason. It looked good though.

As World maps go this one seems a little sparse. There's only 10 places. Even Wells (in Somerset) boasts more sites of historical importance than that.

Nice weapons these flails instead of hands. But just how does he do normal stuff, like wipe his nose?

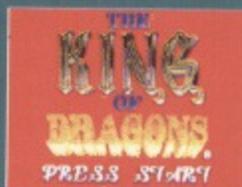

'The only good spider is a dead spider', that's what my old Granddaddy used to say. And do you know what? He was right.

The bestest and nastiest bit of the game. These spiders are really, really horrible. Shame the rest of the game isn't as creepy.

GOOD, BAD OR UGLY?

I don't like playing *King Of Dragons*. It's not the dull and tedious gameplay I object to, I can cope with that. And it's not the distinct

if you had a really bad heart condition and were on medication, that is.

Now Capcom have done some good things and they have done what can only be described as bad things. *Street Fighter II* (and variants) was a good thing. *Final Fight* was a bad thing. Sadly, this owes far more to *FF* than *SFII* with its wander-along-hacking-monsters-in-the-head game-style. But if it's indebted to Haggar and friends, then *King Of Dragons* must have taken a second mortgage out on *Golden Axe*.

feeling of déjà vu that's off-putting - *Golden Axe* was, after all, charming in its own very brutal fashion. No, the reason I don't like playing *King Of Dragons* is because I get scared by the spiders on Level 7.

Now I'm a big grown up bloke who knows full well that the sprites on a TV screen can't really do me any harm. What's more, I'm not even scared of spiders. Yet the second these arachnids ensnare your hacking hero in their furry, golden legs your spine can't help but tingle in revulsion. They're fast, they're creepy and they move just the way you wish they wouldn't. They are also the best thing that *King Of Dragons* has to offer.

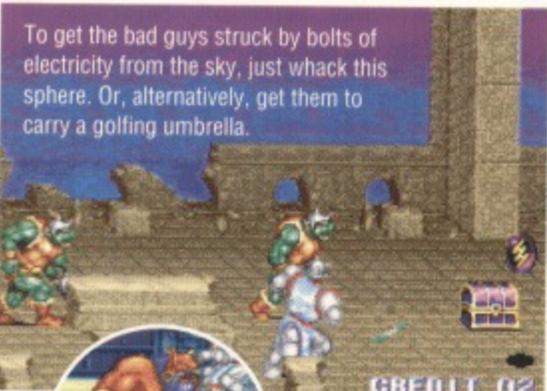

Two players walk from left to right hitting things with different weapons. Each of the characters has specific powers - essentially a selection of short- and long-range weapons - and when things get a tad sticky they can summon magic from the skies to kill their foes.

There are minor differences between this game and *Golden Axe* - you can use five kinds of magic to collect, you can parry blows on your shield and you've got five characters to pick from - but that doesn't stop this simply being a slightly inferior 1994 reworking of a 1980's coin-op classic. Which is a shame because those spiders are really scary.

● Trenton Webb

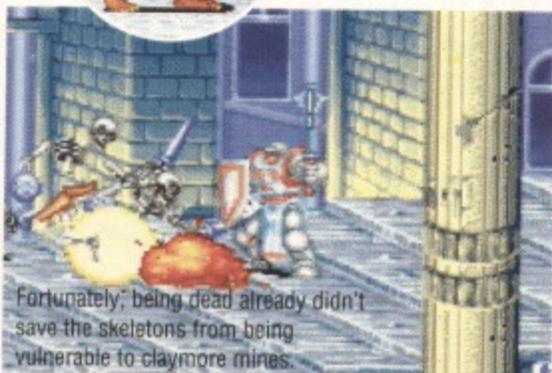

He runs a bit, he swings his axe a bit, he flashes when you hack him - and then he falls over and dies. Wow.

To get the bad guys struck by bolts of electricity from the sky, just whack this sphere. Or, alternatively, get them to carry a golfing umbrella.

Most of the bosses are too easy to beat. It's more a test of tedium than skill.

Fortunately, being dead already didn't save the skeletons from being vulnerable to claymore mines.

GUIDE TO BUYING MAIL ORDER

TEN STEPS TO SAFETY

When you're buying from any mail order company, it's worth following these Super Play guidelines:

- 1) Before you send any money, ring the supplier to make sure the item you require is in stock. Ask questions about the company's policy on delivery and returns of faulty equipment. Make sure there are no hidden costs such as postage and packaging. Find out when you can realistically expect to receive your goods.
- 2) Always read the small print on adverts.
- 3) Beware companies that do not include their address on their adverts. Also, avoid companies that do not answer or return your calls.
- 4) By far the best method of payment is by credit card. If ordering goods of more than £100 in total value remember that you are legally entitled to claim compensation from some credit companies - if the retailer goes bust. Check your credit card company's policy. You can also try to get extra insurance in advance.
- 5) If you're not paying by credit card, pay by cheque. Never send cash and avoid using postal orders.
- 6) Keep records. If you are buying by credit card, keep a note of the order and ask for an order number. When ordering anything over the telephone, always double-check the price.
- 7) If you are sending a cheque, keep a note of the cheque number, the date and the exact value. Make sure you know the exact name of the mail order company.
- 8) When you receive your goods, check them carefully. If anything is missing or faulty, contact the supplier immediately.
- 9) Always order from the most recent issue of Super Play.
- 10) If a problem does arise, contact the supplier in the first instance. Calmly and politely tell them your problem. Most problems turn out to be minor hitches or misunderstandings that can easily be resolved. If you think you have a genuine grievance, contact your local Trading Standards Officer. The number is in the phone book.

Is Winter Olympics worth gold, silver or bronze? Will it make the medal tables at all? Let's have a closer look, shall we?

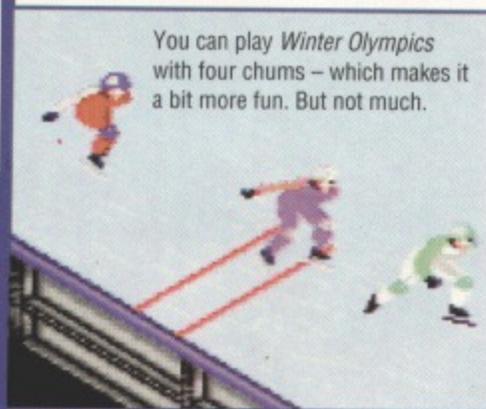

UK Release 

Game: Winter Olympics
Publisher: US Gold
Developer: LOOC
Price: £49.99
Release: Out now
Players: 1 to 4
Cart ROM: 16 Mbit

WINTER OLYMPICS

The two-man bob and the luge are my personal faves. Over-steering on the corners is a problem.

You can play *Winter Olympics* with four chums – which makes it a bit more fun. But not much.

Winter Olympics is based on the 1994 Lillehammer games – which explains why it was released at the same time. Stats fans get a reminder of where each and every Winter Olympics (since time began) took place at the start of the game.

Downhill skiing and the three slaloms are the best events. Controlling them is easier, too.

The shooting part of the biathlon is a joke. And it's hard to keep the cross-country skiing smooth.

GOOD, BAD OR UGLY?

This game reminds me of *Kawasaki Caribbean Challenge*, which I reviewed way back in issue 11. I

awarded that game a massive 20%. Which may give you a rough idea of what I'm about to say. *Winter Olympics* is awful. I'm not just saying that because the graphics are poor, or the sound becomes irritating after hearing the same tune over and over and over again, either.

You see, the main problem with *Winter Olympics* is that it's boring, yet very frustrating to play. Especially the biathlon, where you cross-country ski and then have a go at shooting little round targets. Now, I have never shot a gun. But I am a great fan of Arnie films and I think I know that when you aim a gun it stays aimed until you fire, at least roughly. But no, obviously not – in this game it's completely impossible to aim the gun and keep it aimed. It's like trying to shoot while you're shivering in a high wind.

It took me ages to work out how to do a mogul without crashing, too. And it's almost impossible to control the bobsleighs properly – it was much easier just to let them do their own thing. The controls are the least user-friendly I've come across. Or

maybe it was because I was so bored by then, I couldn't be bothered to persevere. No, that's wrong. I *did* persevere and the controls stayed impossible.

You have the choice of either taking part in all 10 events of the full Olympic Games, or only doing the ones you're best at in the Mini Olympics. You'll probably end up just picking your favourites – to get through the thing as fast as possible.

And another thing – US Gold didn't draw much press attention to this game just as it was coming out. I wonder why?

VERDICT: Having 10 events in the game should provide variety, but because none of them are any good, it doesn't work like that. So don't buy *Winter Olympics*. It's a complete waste of £49.99.

We brainy types at *Super Play* know our ABCs from our other Jackson Five hits. But can Mickey Mouse teach us a thing or two?

PUZZLY PARTS

Familiar Disney characters pop up to set Mick (or Min) tests – which will gain them items if successfully solved.

Daisy Duck's gallery is in need of a good dusting. Clean and match common images, pairs-style, within the time it takes for the candle to burn away.

Can't say I know who this cow-like chap is, but the face is familiar. Anyway, organising letters into the correct order is the name of his game.

Left: *Mastermind*, Goofy-style. Below left: Donald's shift-the-blocks-in-the-right-order game. Below: A simple *Simon* variant.

... only to discover their magical giant beanstalk-growing properties. The rotund fellow (far right) awaits.

Poor old Mickey Mouse. If we are to believe the research

being conducted across the Pond, he's recently lost out to Mario in the recognition stakes amongst root beer-swilling American kids. And now he's following in the dungaree-clad Italian's footsteps by starring in an *edutainment* title. Hmm. He really should consider getting himself a better agent.

The game spins a fairytale yarn which finds Mickey in the kingdom of Beanswick – a simplistic, platformy environment from which five sub-games can be accessed. Billed as 'five magical puzzles full of family fun' they are moulded out of age-old themes and supposedly develop memory skills, deduction abilities and spelling/alphabet awareness. But it's their origins which are the sad part – all but two of the sub-games have been seen before in

non-video game environments and don't particularly draw upon the abilities of the SNES to improve them. Playing a game of 'pairs' with Daisy Duck looking on, for example, is certainly no more pleasurable than playing it with a deck of cards and real people.

And a disturbingly large question mark hovers over its longevity.

GOOD, BAD OR UGLY?

It does have three difficulty settings, ranging from 'cake' (as in piece of) to 'challenging' – but I can see most players opting for the default 'cake' option (innocently not knowing any better), and exhausting the game's appeal long before the £54.99 price tag is justified.

The depictions of Mickey Mouse himself and the clutch of other familiar characters will no doubt provide some amusement to the targeted audience, though. They're all brightly coloured and fairly true to the Disney originals, with Mickey displaying his usual wide-eyed innocence and Goofy his inimitable gawrshiness. So, um, that's good.

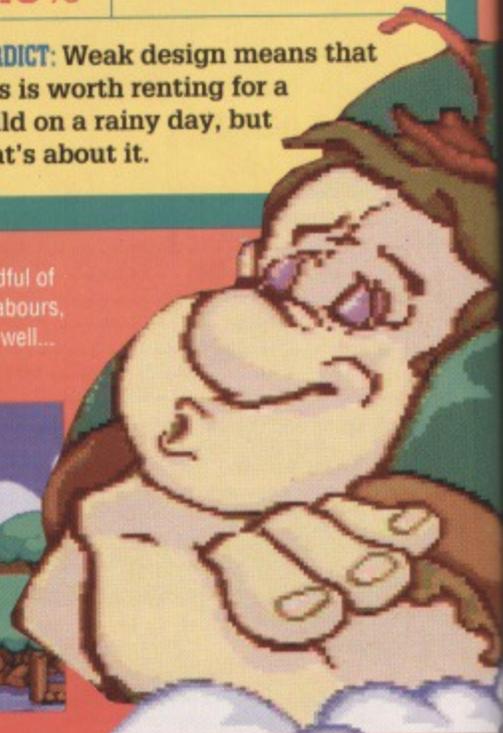

Overall, it seems like a bit of a cop-out. With considerably more development time spent on design rather than cloning crusty old ideas, this could have been a worthwhile purchase for parents intent upon broadening their children's video game interests beyond Mario et al. But it didn't happen, so it isn't.

MICKEY'S ULTIMATE CHALLENGE

The glorification of conflict in games continues. Absolute have unsurprisingly taken the 'serious' simulation route in *Turn And Burn*. Opposing forces favour the Ruskie-bred MiG-29, one of which is in shot over there to the right. Time for evasive action.

Sounding suspiciously like a low-budget straight-to-video *Top Gun* movie clone, *Turn And Burn: No-Fly Zone* pits an F-14 Tomcat against an unknown foe. Excited yet?

Level 4's ground-based target is a fortified island base. Destroy!

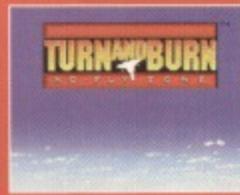

Right: 'Tally ho chaps, I'll be home in time for tea and biccies.'

Is that an Ibiza-bound 737 departing from Gatwick? Maybe. Better shoot it down, anyway.

Can I do my two bogies gag now? (Absolutely not - Ed.)

GOOD, BAD OR UGLY?

Software sells machines. Fact. Ask any Super Nintendo owner why they bought their machine and the answer will inevitably include

reference to *Street Fighter II*, *Zelda* or the *Mario* series - all games which have become synonymous with the SNES.

So why do Absolute insist on releasing games which don't fit the average SNES owner's needs at all? Games like this and their *Battletank* series are more suited to computers. Don't get me wrong, I'm all for diversification and agree that there's tonnes of room for games as playable and well-executed as *Pilot Wings*. I just don't believe that there's enough interest amongst the SNES-owning populace to support a serious military aircraft combat simulation.

Product misplacement quibbles aside, and judged as a piece of software in its own right, this isn't really too bad at all. The dogfighting itself is fairly exciting, mainly because of the effort which has obviously gone into the looks department. Enemy MiGs soar in and out of view smoothly, and the over-the-shoulder reverse views are splendid - convincingly supporting the illusion of intense airborne confrontation. The problem is that the illusion only holds your attention for a short while. Later missions include scenario changes which involve submarines, oil rigs and battleships, but the bulk of play-time is still spent tracking and destroying enemy MiGs, which becomes boring fast.

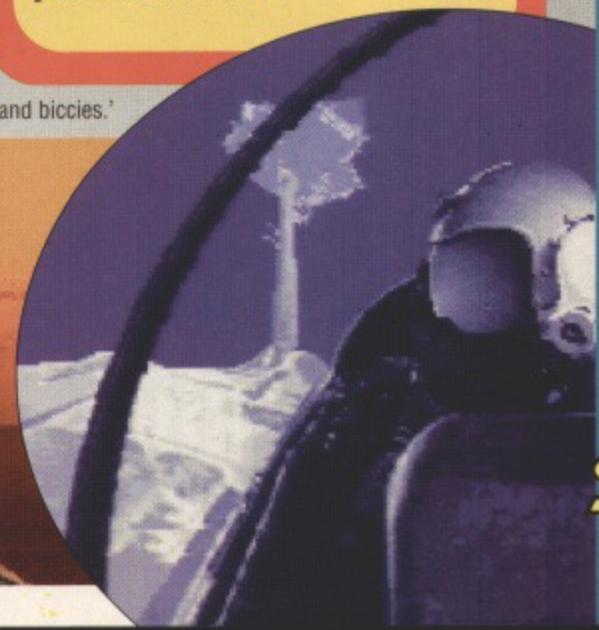

There are plenty of gauges and displays to occupy yourself with, but on the whole, *Turn And Burn* lacks the depth of its computer-based counterparts, falling uncomfortably between an action-based blaster and a simulation.

And I still maintain that your average SNES gamer isn't going to be even vaguely interested in buying this.

YOUR GUIDE TO AFFORDABLE SOFTWARE

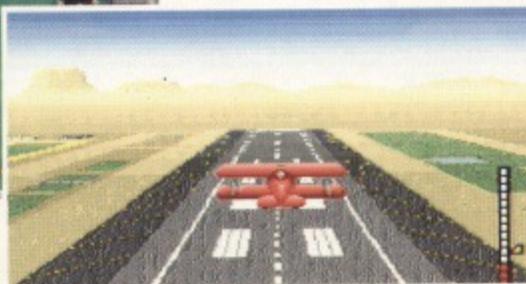

Super Bomberman for £30! *Zombies Ate My Neighbours* for £25! *Axelay* for £12! Sounds wonderful? Well, the bad news is that we're not running a special offer. But the good news is – we don't need to, because you'll find prices like this cropping up all the time.

The national media's 'other' big video game story of the past year has undoubtedly been the

cost of computer games. Not content with victimising epileptics and turning small children into violent sociopaths, it seems that the Japanese multi-national mega-corporations are intent on bleeding us dry with their dangerously addictive console games. Just this once we might, uncharacteristically, agree that they do have a point. The official retail pricing of console cartridges is

Now that it's received a UK release, import copies of *Super Bomberman* (above) can be picked up for around £30. Second-hand carts, like *Pilot Wings* (right) are cheap too.

incredibly steep, and judging by the letters we receive every month at *Super Play*, you wholeheartedly agree.

The Japanese have it much easier. Not only can they buy every SNES game ever produced (we see just a selection over here), but the market is actually geared towards lower prices and higher unit sales figures. Just a week after its official release, *Legend Of The Mystical Ninja (Ganbare Goemon) 2* dropped to just 6,000 Yen in certain stores (approximately, a fall from £30 to £16). Older carts like *F-Zero* can be picked up for as little as £5 from specialist retailers. If people can afford to buy more carts, then more carts will sell, so the publishers still make a healthy profit.

Not so in Blighty. According to our market research, the average British console owner obtains only two games a year – and these are actually bought as presents on birthdays and at Christmas. This rough figure tends to ignore older players (particularly those in *Super Play's* readership), but it still paints a worrying picture.

This can only mean that the majority of you aren't aware of the burgeoning market in budget games. If you're actually prepared to go out and hunt for bargains then you will find them. Just take a closer look at Supermarket or the classified ads in this issue and you'll see a few surprises.

Hold on a moment – did I say 'budget'? Isn't that the sorry state of the dying NES and its software at the moment? Well, yes and no. The rapidly growing availability of budget SNES games has appeared for slightly different reasons, and even encompasses some very recent releases – where, for example, stock was ordered in unrealistic quantities. Sometimes, a game will sell very poorly on release, but prove incredibly popular when the price falls to a more reasonable level. Second-hand games are also being sold and exchanged in impressive numbers. 'In our opinion there are very few games that are worth their original price tag,' commented Adrian Bolton of One Step Ahead, 'but when you get down to £30 and lower, the range of games worth the money increases dramatically'. In other words, the budget arena is actually consistent with the growing popularity of the SNES. 16-bit consoles are only starting to show the extent of their capabilities, and judging by some of the games on display at the April ECTS (Electronics Consumer Trade Show), it will be a long time before the SNES is relegated to second division.

Sensible fun for the under-30s

Although £20 seems to be the average budget price on older games, it's amazing what you can pick up for £30 and less. Researching this guide I found *Cybernator*, *SFII Turbo* and *Super Bomberman* for £30, *Zelda* for £26, *Zombies* for £25 and *Castlevania IV* for £24. So where to look? Anywhere and everywhere. To start with, check the advertisers in our classified ads. Make sure you know what you're getting for your cash – some prices are for old stock, some are for used and second-hand games. Check for special offers – companies like One Step Ahead Gaming and Console Connections will also take old games in generous part-exchange towards another title. Even relatively recent releases can see a sudden price drop after just a couple of months.

Finally, we have always stressed that you should take care when buying anything from mail order. There are plenty of unscrupulous con-men ready to fleece you, as some of our readers can sadly testify.

SUPER PLAY RECOMMENDS

SUPER SMASH TV

Acclaim (US/UK) SP1: 86%

● Currently available for around £20-£23*

If you've never played this *Robotron*-style shoot-'em-up then you really don't know what you're missing. Satirically, you play a contestant on a sick future gameshow where your task is to blow away hordes of 'robots' in order to win toasters, VCRs and a big cash prize. The fun might seem short-lived at first, but it's the sort of game you come back to time after time when you feel the need for a burst of ultra-violence. Your fingers

will be an inch shorter by the time you finish the final boss, and there's even a cheat to make the game harder.

* **Console Connections on (0736) 331131 can help you out on this and other games.**

Just in case you're new to the world of SNES, or you've forgotten just how much we liked those old games, we suggest a couple of classic titles that you ought to be looking for on budget.

AXELAY

Konami (US/UK) SP2: 85%

● Recently available for the special offer price of £12-£15*

Quite simply, this is still one of the best-looking space shoot-'em-ups ever to grace your SNES. The levels switch between forward and side-on views and the

graphics exploit the machine's oft-hidden capacities. *Axelay* is also renowned for having the biggest, baddest bosses you'll ever have the chance to blast: we think the ED209 look-alike is our favourite. The only criticism is that it's a little bit easy and a little bit short at six levels, but when you can pick it up for around £15, you're getting value for your money. A must-see.

* **Console Plus always have special offers going on UK and import stock, so give them a call on (0924) 456082 or (0345) 090099, or write to them at 218 Bradford Road, Dewsbury, West Yorkshire WF17 6FJ.**

SIM CITY

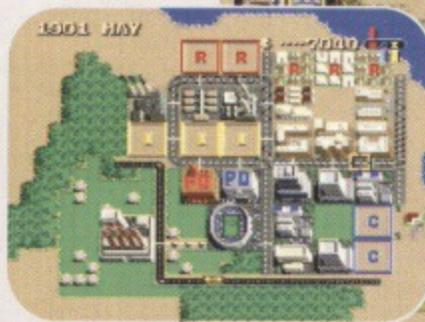

Maxis/Nintendo (US/UK) SP1: 84%

● Currently available for around £20-£26

Who'd have guessed that civic planning and budgeting could be fun? The idea is a simple one, but it will keep you absorbed for hours. Build houses, shops and factories; lay roads, rail and power cables; commission police and fire services; then watch your small village flourish into a thriving metropolis (or collapse into polluted crime-ridden slums, dependent entirely

on your policies). Produced in conjunction with Nintendo, this rendering of the classic may look somewhat behind *Sim City 2000* but it's the most user-friendly you'll ever find. If you've been looking for some truly educational software then forget 'edutainment' - we recommend this wholeheartedly.

A true original.

SUPER ALESTE

(JAP) (US: Space Megaforce) Toho/Compile SP3: 87%

● Currently available for around £20-£24 Here's proof positive that the Super

Nintendo really can handle a *Gunhed*-style overhead shoot-'em-up without any sort of slow-down, just as long as it's competently programmed to take advantage of the console.

Some great use of parallax, Mode 7 and stacks of enemies on-screen at once make this one of the all-time classic carts. Sometimes it gets a little weapon-heavy, but we're not put off by that (like tortilla chips, when you've had one power-up you can't resist another). Unfortunately, we've seen very little that compares to *Super Aleste* since, so at budget price this is an absolute bargain.

PRINCE OF PERSIA

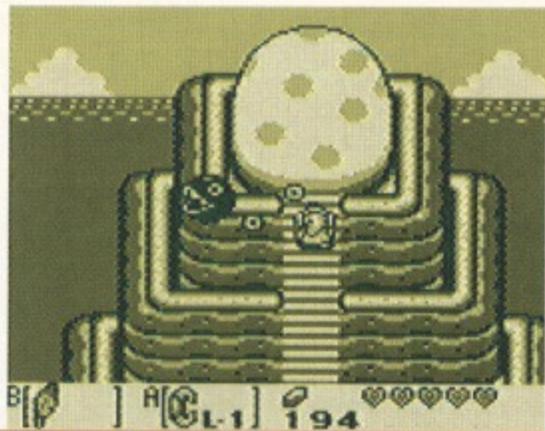

Konami (JAP/US/UK) SP5: 89%

● Currently available for £20-£26

You want your games tough? *Prince Of Persia* adopts the platforming ethic, throws in puzzles and sword-fighting

and creates a game in which each new level will give you a whole new challenge. There's absolutely no chance of you breezing through this game in an afternoon, or on a first attempt: passwords will never seem so welcome, quite frankly. What's more, there's some excellent animation for the main sprite (long before anybody mentioned rotoscoping). The patient, persevering nature of the game isn't absolutely everybody's cup of tea, but at £20 you can afford to find out if you're a Darjeeling or an Earl Grey.

The budget price of Game Boy carts could make the Super Game Boy a good investment, especially when the graphics don't need to be sophisticated (as with *Tetris* and *Chessmaster*). And we can play *Zelda IV*. Hurrah!

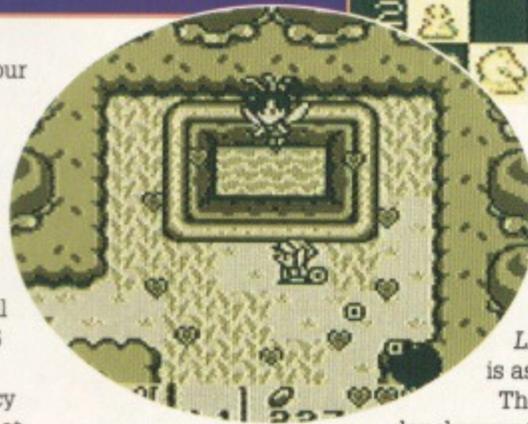

WE DON'T NEED NO STEENKING BATTERIES!

You can recognise Game Boy users a mile off. They wear bandoliers of spare AA batteries like Mexican bandits, and their heads lean at a peculiar angle after hours of trying to get the light-source just right. Fortunately, we will be spared this condition, as Nintendo has announced the imminent release of an adaptor which allows you to play Game Boy games on your Super NES. Imaginatively entitled the Super Game Boy (hmm, their Product Naming Dept is looking decidedly understaffed these days), the device has a slot for the GB game but otherwise resembles a normal SNES cartridge. Just plug it in your machine and those portable favourites are yours to play, in full stereo sound.

Now, we know what you're thinking. 'Won't that 2" square dot-matrix picture look a bit, well, ZX81-ish on a full-size colour TV?' Good question. The clever bit is that the grey tones will be

represented by four colours of your choice. Better still, all future GB software – like the forthcoming releases of *Donkey Kong* and *Tetris 2* – will support up to 256 colours. Even the once-proud Speccy couldn't match that.

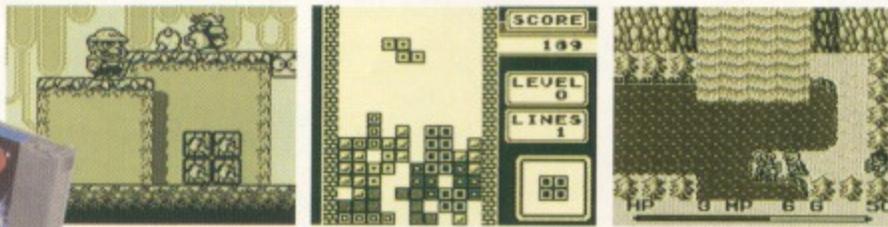

The consequences of this adaptor may not be obvious, but the potential is immense. With more than 350 Game Boy titles available, the library of SNES games is effectively doubled. The older carts can be bought for as little as £5, putting a large collection of budget games at the disposal

of SNES owners. What really gets our juices flowing is the thought of being able to play fab games like *Monster Max*, *Castlevania I & II*, *Wario Land*, and the *Nemesis* shoot-'em-ups. Better still, you'll be able to crack the amazing *Zelda IV: Link's Awakening*. Believe us, it really is as well-crafted as *A Link To The Past*.

The reason behind the adaptor's development is still unclear: there was hardly a demand for it from SNES owners, although it may now prove quite popular. The news of colour software, however, has revived speculation within the games industry that a colour Game Boy is in the pipeline – perhaps appearing in late '94. New software produced for such an innovation would directly benefit SNES owners with a Super Game Boy.

The Super Game Boy will be available in the US in early June, retailing at \$59.99. Expect a European launch within a couple of months, for just under £50.

BLAST FROM THE PAST

Sad to admit, but these 8-bit games have better graphics than a couple of SNES titles we could mention...

LOOK AT MY UGLY FACE!

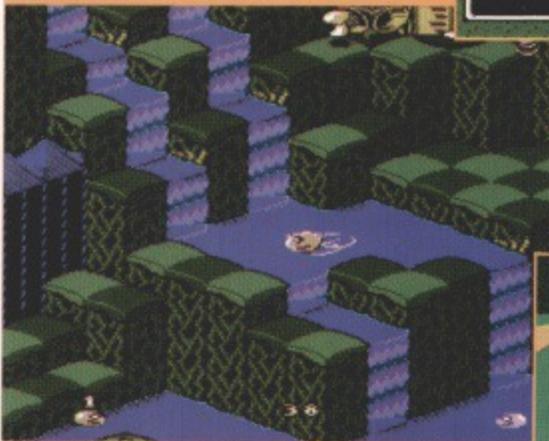

And the 8-bit fun doesn't stop there. *Super Metroid*, *Super Mario Collection*, *Zelda*, *Castlevania* – all of them

are great games, with one thing in common: they originate from NES games and characters. The humble Famicom and its various incarnations may have seen better days, but there are still some quality carts bouncing around out there. And that's where the Tri-Star comes in. Like the Hornby Superdeck, this big grey box allows you to play NES games on your Super NES. We playtested it with an impressive

back-catalogue borrowed from our sister mag *Total!*, and discovered that it worked with everything we tried, except for *Gradius*. The adaptor even features two different NES slots to accommodate foreign carts.

If you're a 16-bit snob with your eyes on a Project Reality machine come 1995, you might be turning your nose up at this regression and wondering what all the fuss is about. This can only mean you've never played the likes of *Xevious* or *Snake, Rattle & Roll*.

Hornby's Superdeck has now been shelved completely, thanks to the price cut on a new NES, but Effin Awesome are selling the Tri-Star for £39.99. If the idea appeals then give them a call on (0924) 897359. Or you can try calling Zap Computers on (0532) 586523.

NEW TO THE UK

Guiding you through the veritable minefield that is the new releases on UK labels is James Leach. Follow him as he pops on his headphones, activates the metal-detector and wanders in circles with his tongue slightly protruding.

PLOK!

Nintendo/£49.99/8 Mbit

You wouldn't expect a game which has chunks of black-and-white graphics in it to get over 90%, would you? But that's exactly what *Plok!* did when it was reviewed by the inestimable Jonathan Davies in issue 14.

The game contains 64 levels, and Plok himself has access to all manner of vehicles to make things easier. He's got a tank, a car, a sort of jet-pack thing and a selection of special presents which, when opened, could be a welding kit, a set

of boxing gloves, a hat or maybe a pair of, er, special trousers. Look, all you need to know is that the game is immensely varied.

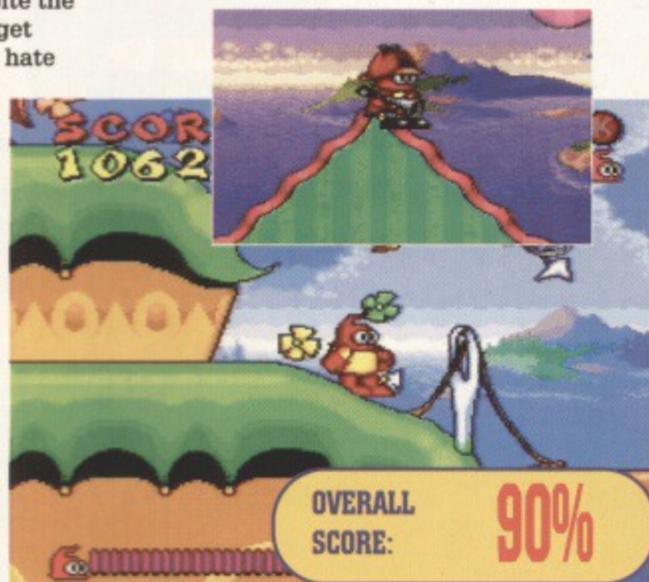

There's a vast amount of colour (despite the black-and-white bits) and it's easy to forget that this is a platform game. If you really hate platform games, then *Plok!* will change your mind for you.

It's a tricky game, of course, but it isn't annoying. If you have to jump off the screen to get to a platform you can't see, a line of shells neatly and helpfully points the way. And if you fall in water, you don't instantly die, but you get bounced up into the air and given another chance to land safely.

As if 64 levels weren't enough, *Plok!* also contains a large number of bonuses and secret levels. There are weeks worth of gameplay in here, and you'll be glad of them, rather than resentful. The appeal of a game like *Plok!* is difficult to explain, but it has a definite 'feel-good' factor which keeps you

playing long after you should have stopped to do something else instead.

SUPER STRIKE EAGLE

Playtime/£49.99/8 Mbit

Flight sims have never been perfect fodder for the Super Nintendo. Despite the glorious beauty of *Pilot Wings*, Mode 7 hasn't helped matters. Part of the problem is complexity. There is no way you could make a really playable, yet accurate and detailed, fighter combat game, so what do you do? Simplify it.

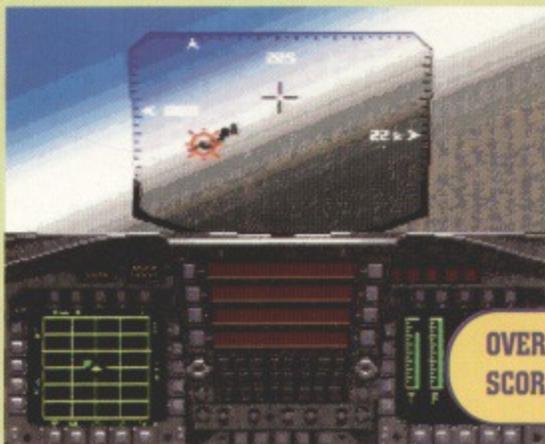

With *Super Strike Eagle* that's just what's happened. There's no proper focus to the game. It's got two sections; one where you're shooting down enemies who

buzz around you like bluebottles; and another where you're doing some ground attack and you see the plane from an unnerving top view.

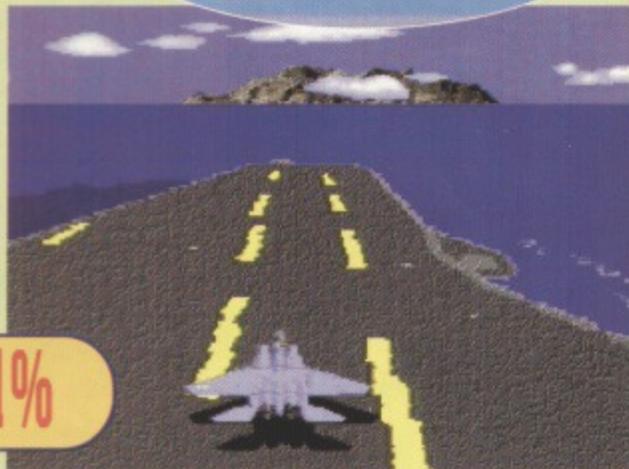

The idea to have these two segments was good, if a little brave, but the implementation really does suck. There's no way you can get much joy out of either section, and the result is a messy, half-cocked game which won't

fulfil your Tom Cruise-like inside yearnings to be an ace.

R-Type III

Kiss UK/£54.99/16 Mbit

Shoot-'em-ups have been the staple diet for many a games player since the year dot. Or at least since the mid '80s. So anything which plops itself into that camp nowadays has to be a bit special.

R-Type III is very nearly there. It's a great game, actually. You get all the power-ups, all the special weapons and you can blast all the baddies with an old-fashioned feeling of glee. You know that in a tricky shoot-'em-up you're living on borrowed time, and every big baddy could be the boss that you just can't get past.

Plenty of massive levels and loads of variety will keep you glued to the Super Nintendo as your thumbs dance manically over the buttons. A neat touch is where you hold down the fire button to charge up your main weapon. Its destructive power is vastly increased when you're at full charge, but of

course, the trade off is that you can't fire in the meantime. Very smart.

The cavernous levels are packed with slimy nasties, all pointing their guns at you and firing annoying homing blobs which you have to be quick to avoid. The walls themselves often move and slide around, creating the most hideous of claustrophobic hassles for the hapless spaceship you're driving.

Overall, this is a tiny bit short of a classic, but it's one damn fine game nonetheless. And everybody needs to play a shoot-'em-up once in a while.

Football fever is sweeping the land! Not content with checking out all the footy games available on the Super Nintendo, the *Super Play* team are settling down to watch the World Cup on the telly.

Well, all the team except one. Although Neko has done well in getting people to see sense and subscribe – thus guaranteeing themselves trouble-free and prompt delivery of their favourite SNES magazine month after month after month – the young tiger hasn't reached the heroic target we set last month. In fact, he fell short by six people. Not many, you'd think, but thanks to Neko's negligence, that's six people who have to trudge to the shops to get their copy of *Super Play*. Six people who could catch coids as they walk along to the newsagents. Six folk who might get very disgruntled when they see all the copies flying off the shelves and into the hands of those more pushy and eager to get their copies of the only SNES mag worth reading.

So, as the team settled down to watch the opening ceremony (or whatever they have), they noticed that the reception wasn't quite right. In fact, the aerial needed adjusting. And the roof being all wet, mud and slippy, nobody volunteered to go and tiddle the aerial into the right position. What was needed was

a creature with agility and nimbleness. A cat, for example. A cat, in fact, who was in need of punishment over those six would-be subscribers who were denied their fix of *Super Play* receiving ease by his negligence and laziness.

Neko's been up on the roof for several hours now. His poor little arms must be getting tired. And every time he tries to reset the heavy aerial bit, we notice a sharp decline in the quality of the signal and quickly change channels, thus giving him a fairly mild electric shock, just to remind him of the correct positioning.

So the only way to sort out Neko's misery is to subscribe. It makes great sense, because not only will the unfortunate tiger get a break from the pain and the cold, but you'll get your copies of *Super Play* every month, delivered through your postbox.

As if that wasn't enough, you'll also receive an editor's letter, written with extreme skill by

James, which contains extra news, competitions and fun. Remember, this stuff isn't available to the fools who still believe that going to the shops is the best way of getting hold of *Super Play*.

So subscribe now and, if you use the handy and convenient direct debit form, you'll even save five quid! Oh, and if you do, we'll consider letting Neko down when the adverts are on.

'Oh yay, oh yay, oh yay, oh yay. Oh yay, oh yay, oh yay oh yay. Oh yay, oh yay, oh yay...'

CAPCOM
(JAP/US)

By Allan Brett
(with Zy Nicholson)

XX

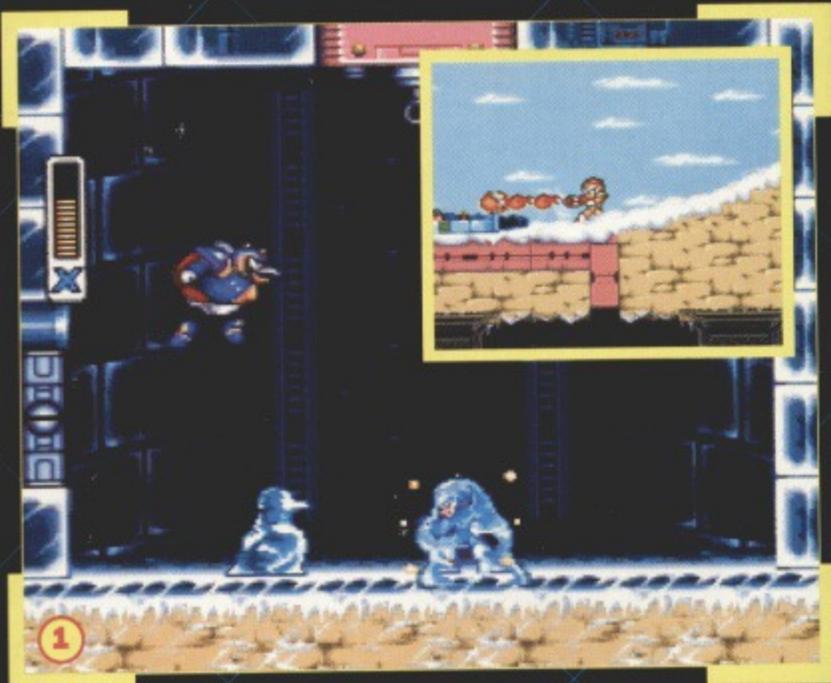

Our resident games guru – the one they mysteriously call ‘Allan’ – has had no difficulty in finishing our top cover game of issue 17. We burnt offerings and beseeched him to share his holy knowledge with ordinary mortal folk. Zy was suddenly seized by a feverish vision, in which the following advice was imparted...

General Tips

1. Don't hesitate to use your special weapons. Your meters are refilled at the end of each level anyway, so you've got plenty to play with on each go.
2. Select your special weapon carefully. If enemies are coming in at all angles the Homing Missiles are a natural choice, but the Storm Tornado is better on many ground-based enemies.
3. When you eventually get the X-Buster power-up, you can charge up your special weapons too. If you want to charge a special weapon, charge up your X-Buster, then switch to the weapon you want to save energy.
4. You can take Accelerated Leaps off of the wall by pressing 'A', then jumping off afterwards. You will spring out much further, allowing you to get past bosses much more easily. The best way to perform it is to hit A and B simultaneously.
5. There's no time limit! This means you can stop, charge up your X-Buster and select your weapon before moving on into dangerous territory.

Stage: Icy Penguigo

- 1 This is the best level to start on, as you can get by with your normal X-Buster. All the enemies can be dispatched with a single charge shot or less. To obtain the Heart Tank you will need to return to this level with the Fire Wave: get to the section where you have to abandon the mech suit and take an Accelerated Leap left from the top of the cliff face. Destroy the buildings there with the Fire Wave.

ICY PENGUIGO

WEAPON: ICE SHOTGUN

Keeping your X-Buster charged to full power, stay high up on the wall and

clear of his ice breath. Don't bother shooting his ice sculptures. Wait for him to jump to the central ring (that activates blizzard conditions) and shoot him from the wall. When you meet Icy Penguigo again in later levels you can just charge in and hold down the button on the Fire Wave – he hates it.

Stage: Storm Eagleed

- 2 You can find a Heart Tank on top of the building at the very start of this level. To reach it you'll need to make an Accelerated Leap from the top of the nearby lifts. Blast any capsules bearing a flame mark and a 'DA' stamp, to reveal extra items.

STORM EAGLEED

WEAPON: TORNADO STORM

- 3 Your Acceleration System will help you to counter both his flapping and diving attacks. Nip back and forth when he dives, and charge up an X-

Buster to take care of his little birdies. After that, you'll just have to try getting in as many hits as quickly as possible. A Chameleon Sting or the Homing Missiles will help on your second encounter, but here you'll just have to make do with an Ice Shotgun.

Stage: Spark Mandriller

4 You could jump all those missiles and sparks, but it's easier to let rip with the Storm Tornado and take out the launchers permanently. After the second dark section – before you go down the ladder – ascend the right-hand wall and you'll see another Heart Tank. Do a big Accelerated Leap and curl around to reach it.

HENCHMAN

5 When you meet this mid-level boss, scale the wall to hit him whilst he's on the ceiling. Do your best

to avoid the bubbles, but if you get caught, use your dash repeatedly to free yourself. Don't bother with charging up when he's on the floor, just use your normal shot and keep your distance at all times.

**SPARK MANDRILLER
WEAPON: ELECTRIC SPARK**

Use either your X-Buster or Ice Shotgun (charged up if you can), but stay near the wall and get ready to climb up if he dashes, and leap off before he hits the wall. I find staying at opposite sides is best, darting underneath when he climbs across the ceiling.

Stage: Armour Armarge

When you drop down the hole and see the second mining machine, shoot it as fast as your fingers will allow. If

you're quick enough you will be able to climb the wall and collect the Heart Tank. Otherwise you will need the Boomerang Cutter to reach it. When you fly out of the mine shaft on the trolley, leap slightly early to cling onto the wall and find a health top-up before facing the boss.

find it easier to avoid. Don't forget to charge up your weapon so you're ready for anything.

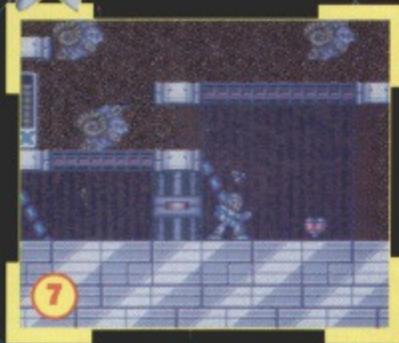

Stage: Launcher Octopuld

7 The first Sub shouldn't pose much of a threat, but the second one can be tricky, so use jumps to stop it pulling you forward onto the spikes and let the missiles hit you. You can recover energy from the Sub's wreckage afterwards.

**ARMOUR ARMARGE
WEAPON: SHIELD**

6 The Electric Spark weapon is essential for removing his armour, but once that's done, just about any weapon will do (though a charged Electric Spark works wonders). Stay on the wall when he fires his laser and move to the floor when he rolls as you'll

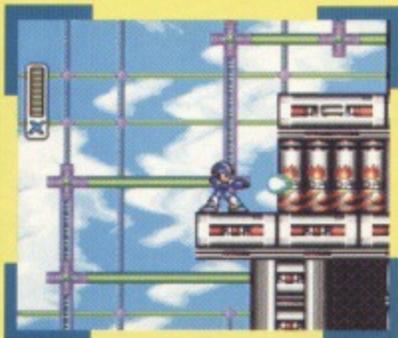

Accessory Capsules

1. THE ACCELERATION SYSTEM

Icy Penguigo's stage. You can't help but run into it.

2. THE POWER HELMET

Storm Eagleed stage. About half-way through the level you have to climb a tall scaffold tower and drop down the other side. At the bottom you will see

four capsules marked 'DA' with flame logos on them. Take an Accelerated Leap onto the adjacent platform and blast the capsules. Given plenty of shots, they will eventually blow up, letting you reach the capsule containing the Power Helmet.

3. THE X-BUSTER POWER-UP

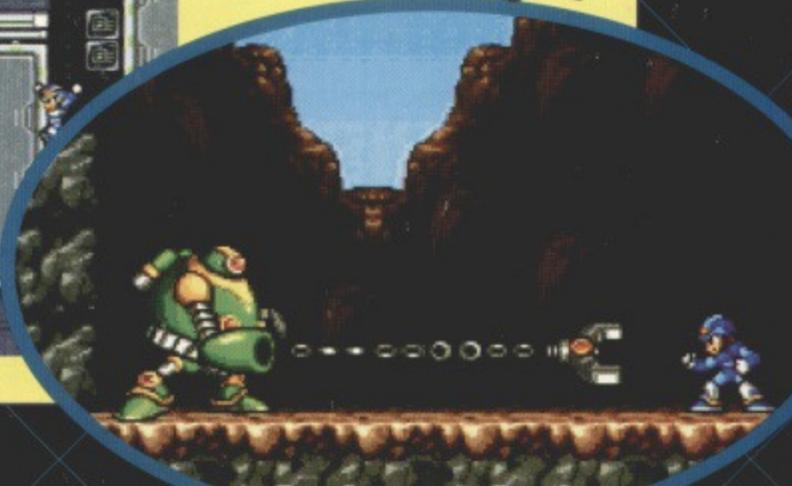

Burnin' Noumander stage. To reach this capsule, you must have possession of the Accelerator Boots and the Power Helmet. Just before you reach the pick-throwing miners, look up and you'll see some blocks. Take an Accelerated Leap off the platform to the right and, if it's timed perfectly, you will cling to the blocks. Hit the jump button rapidly to smash your way up to the capsule. If you mess up here you will have to start all over again.

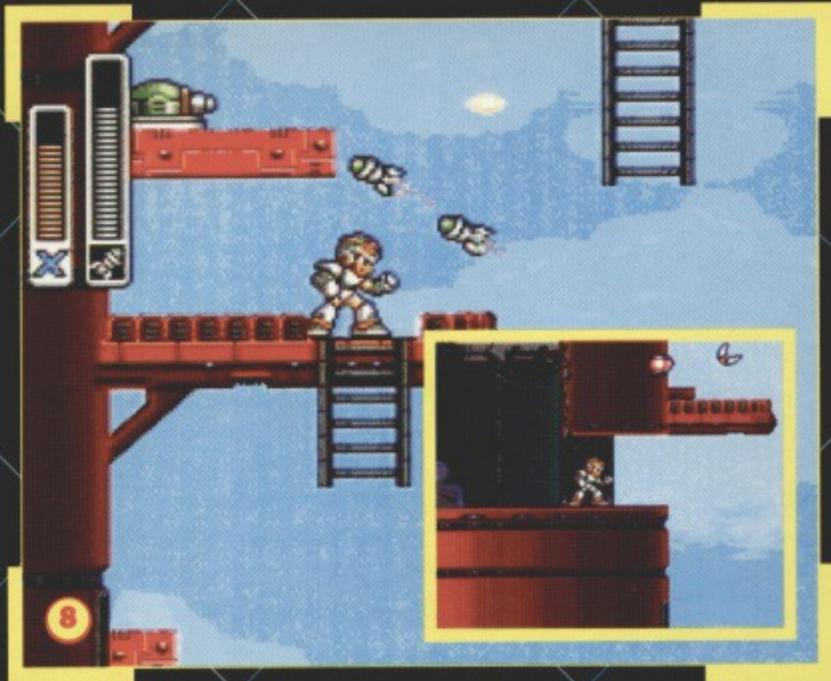

4. THE BODY ARMOUR

Sting Chameleon stage. At the point where you drop down into the cave with the falling rocks, take an Accelerated

Leap instead and climb the wall. You'll face a robot whose weak point is his red eye. Dash underneath him when he leaps at you, then jump and unleash a charged X-Buster at his head. Once he's defeated, the capsule will appear.

HENCHMEN

There are two snakes – one hiding in the sand and the other guarding the Heart Tank down below. Both follow hopelessly predictable attack patterns, and both can be destroyed quite easily by simply waiting at the very edge of the screen to get a shot in. Pathetically, you can't be harmed at all standing here.

To reach the Heart Tank, travel up the third turbine current and get on to the Whale Ship. Just stand on the left and hammer away until the whole thing crashes through the floor. Head right when it stops and destroy the robo-snake. Now go right to get the Tank.

LAUNCHER OCTOPULD
WEAPON: HOMING MISSILE

You can stop all his missiles with the Rolling Shield, but I prefer the X-Buster. Staying by a wall will often make him use his cyclone attack, which you must avoid by dashing clear.

Stage: Boomer Kuwanger

8 Taking out the shielded robots is easy if you use the Ice Shotgun's ricochet to shoot them in the back. If you have the X-Buster power-up, use either a Rolling Shield or Chameleon Sting charged up to red level on the bit with the ascending platform. Once outside the tower, take your time to watch the sliding platforms before moving in with a charged X-Buster. Save your Homing Missiles for now.

When you've completed this level, do it again. This time you'll have the Boomerang Cutter to let you reach that enticing Heart Tank.

BOOMER KUWANGER
WEAPON: BOOMERANG CUTTER

Kuwanger's most powerful attack is to charge and gore you, so stay on the wall

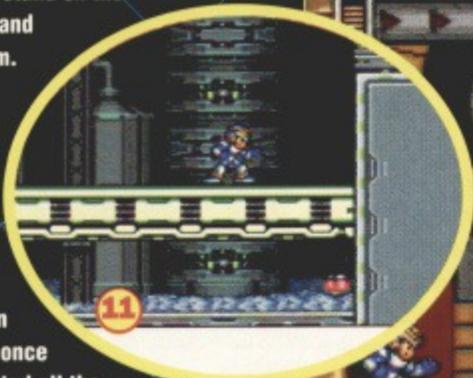

all of the time. Select the Homing Missiles and fire one at a time, or charge them up if you can. Don't worry if he hits you with his Boomerang because, if you keep plugging away at him with those Missiles, he'll die first.

Stage: Sting Chameleon

10 This level is really simple. The axe robots are harmless – they can't turn round, so stand on the wooden trunk and jump over them. Keep your X-Buster fully-charged to hit the small caterpillars.

Another Heart Tank can be found here once you've completed all the other levels – you'll see the forest has become waterlogged. Go to the section where you jump to get the body armour and drop down the pit into the water.

Sub-Tanks

The first Sub-Tank is on the Armour Armarge level. When you see the first mining machine, quickly jump back up the passage and once it has gone past, go into the bit where it was to find the Sub-Tank.

Another is on the Burnin' Noumander level. When you reach the pick-throwers, make your way up to the highest platform you can (there's an extra life on it).

Once there take an Accelerated Leap to your left and smash the blocks in the wall to reach the Tank.

The third Tank is on the Storm Eagleed's level in the big glass control tower. Use the moving platforms on the right of the tower to reach it, then blast your way inside.

Stage: Burnin' Noumander

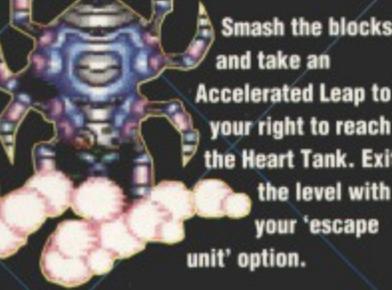

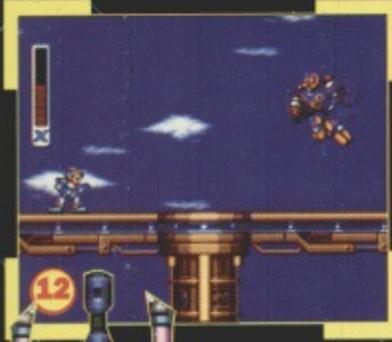

11 Your priority should be to get the X-Buster power-up if you haven't done so already. Stick to the very bottom and keep going left along the floor of the section with the pick-throwing miners, to reach the final Heart Tank. There's an extra life on the route to the Sub-Tank, but it's not worth going out of your way to reach it.

BURNIN' NOUMANDER
WEAPON: FIRE WAVE

If you haven't got Storm Tornado, you may find this boss quite tricky... Just stay tightly in one of the top corners and charge your X-Buster to red. Switch to Storm Tornado and, when Noumander is underneath you, blow him away.

Stage: Sigma 1

Near the start you'll have to destroy several turtle missile launchers. Get right next to them and let off a red level X-Buster or, better still, use a Storm Tornado shot to take out a couple at a time. To negotiate the moving platforms

STING CHAMELEON
WEAPON: CHAMELEON STING

You can defeat the Chameleon with the X-Buster easily enough, but if you use the Boomerang Cutter he should keep trying to do his tongue attack, making him easy pickings. When he flings his tail spikes just tuck yourself tightly into a corner to avoid them completely.

The last Sub-Tank is found on the Spark Mandriller's level. Climb up the first ladder and down the second one, then run to the end of the passage and use your Boomerang Cutter – jump and fire to guide it downwards – to collect the Sub-Tank.

it's best to charge up Rolling Shield – it lasts ages, your flying enemies will be annihilated before they get close, and you can concentrate on your jumping.

SEMI-BOSS

Use Storm Tornado when he jumps over (charged to red level), and keep your distance. He shouldn't last long.

After defeating the semi-boss you'll come to an upward passage with many enemies obstructing your progress. Use red level X-Buster to remove the shielded knights and red level Rolling Shield so you can ignore normal enemies when scaling the wall.

When you meet Boomer Kuwanger, tackle him as you did before (charging your missiles up to red level this time).

SIGMA SPIDER

Spidey is vulnerable briefly – when he comes to the bottom of the screen and his abdominal shutter opens to reveal a red 'eye'. Charge up your X-Buster to red level and shoot a bit early, anticipating the point where he will touch down. Forget Homing Missiles – they're too slow.

Stage: Sigma 2

12 You must fight Icy Penguigo, Storm Eagleed and Boomer Kuwanger in this section. Zoiks! Use the Fire Wave, Chameleon Sting and Homing Missile respectively.

SIGMA FACE

13 Use any weapon to defeat the Face. Shoot his eyes when they open (their colour gives you a clue as to how they will attack), and when the wall closes in deliver a full X-Busting broadside at the 'nose' section as you slide down past it.

Stage: Sigma 3

You must confront Armour Armarge, Sting Chameleon, Spark Mandriller, Launcher Octopuld and Burnin' Noumander. You know the drill.

SIGMA MECH-BEAST

14 This boss is easier than he looks, just use full power X-Buster on the top section, take Accelerated Leaps between him as he approaches and stay tightly in the top left corner when he charges up a Spark Ball.

FINAL LEVEL

SIGMA DOG

15 Use normal shot X-Buster and try to avoid him. There isn't a handy trick for this chap, but your defensive weapons – Rolling Shield and Chameleon Sting – might spare you from some hurt. Sigma Dog is faster, tougher, and better than you, frankly.

SIGMA

Beam up your X-Buster or Electric Spark (preferably the latter) and go up the left wall. Sigma will start to move in a zig-zag up the screen from wall to wall. When he jumps from your side a second time, drop down and release your beam as you pass him. Once on the ground, charge again and Sigma will start coming down. As he passes over you scale the wall and repeat the process.

SUPER SIGMA SUIT

ATTACKS: FLAME THROWER /LIGHTNING BOLT/ELECTRIC SPARK

16 I can only tell you what not to do here. The best way to hit Sigma is to get onto one of his suit's clawed 'hands' and shoot him in the head. The most effective weapons to use are the Rolling Shield and your X-Buster, so forget about the others. Even when charged up, the Storm Torpedo et al are useless.

The Armoury

1. X-BUSTER

There are few situations where you won't be using your X-Buster, as it has unlimited ammo. Charging it up to red level unleashes a stream of laser fire and creates a temporary shield to cover your rear.

2. SHOTGUN ICE

A good back-up weapon, momentarily freezing your enemies. It explodes into deadly ice shrapnel if you miss and hit a wall (or you can use this ricochet to hit shield-bearers). Charge it up to red level for an ice platform 'X' can ride on.

3. ELECTRIC SPARK

Slow, but powerful, it's good for taking out non-moving enemies, but not much cop in the heat of battle. At red level the Electric Spark fires two walls of electricity, both left and right.

4. ROLLING SHIELD

Slow and, although powerful, it can't cut the mustard. But it can absorb projectiles. Where it redeems itself is at red level, forming a shield around 'X', allowing him to destroy most enemies by walking into them.

5. HOMING MISSILE

Best for taking out those hard-to-reach baddies. But it can take time to find its target so it isn't suitable for any hectic situations. Charge it up to red level and release a school of robotic homing piranha (!) upon your enemies.

6. BOOMERANG CUTTER

This is completely ace for the following three reasons:

1. It can hit enemies above or below depending on how you guide it.
2. It can pick up items that 'X' himself is incapable of reaching.
3. You can unleash total screenwide massacre at red level.

7. CHAMELEON STING

Great for getting rid of flying enemies or awkwardly-situated gun turrets. Charging the Sting up to red level gives 'X' temporary invulnerability.

8. STORM TORNADO

You can't miss with the immensely powerful Storm Tornado. Charging it up to red level creates a vicious vertical cyclone that wipes out anything directly above or below.

9. FIRE WAVE

Severely limited range and a criminally short duration make this a weapon for special occasions only. However, the red level Ground Flame isn't too bad.

SNES TECH & GAMING ANSWERS

By Jason Brookes

Don't know your Super FX from your PS-X? Or your Jaguar from your Saturn? Or do you want to know when a game is coming out? Then page the oracle. (Better known to Super Play readers as the Gamefreak.)

DEAR GAMEFREAK,

Q I buy *Super Play* the very day it hits the stores in the US, but every single contest you've ever held has expired by the time I've got hold of my issue. Not being able to enter the Japan trip or the Ultimate Christmas Stocking contests have been particularly heart-breaking experiences. If I subscribed, how much sooner would I get it? (I bought issue 15 on 28 January!)

A Much, much sooner. In fact, you'd probably get your copy only about a week later than UK readers. Naturally, it's more expensive than a UK subscription because of the extra postage involved, but it would be thoroughly worthwhile, and would probably work out cheaper than buying it on import, too. See page 96 for more information.

Q Do you think there is a market for an internationally-distributed Japanese games magazine printed in the English language? It could be like *Super Play*, but have one columnist from Europe, one from America, East Asia, Japan, etc.

A A brilliant idea, but it would be extremely difficult to co-ordinate.

Q I imagine *Samurai Shodown* could be squeezed to fit on the SNES, but I doubt the same could be said of the Genesis. *Samurai Shodown* could be the game that finally

humiliates Sega fans once and for all. Does Takara have any immediate plans to release it?

A Ah, you see, if you'd got a subscription you wouldn't be asking me that. Because – we know, don't we readers? – *Samurai Shodown* is already on its way to the SNES and looks like being the best Takara translation yet. But, no release date has been posted in the Japanese games press.

Q Not really a question this one, more of a nitpick. I've noticed you've misspelt some Japanese game titles. Here are my corrections:

Ace Owoerare – *Ace Onerae*
Super Bikuri Man – *Super Bikkuri Man*
Kamitashino Yoru – *Kamaitachi No Yoru*
Rushing Beat Syura – *Rushing Beat Shura* (Shura means bloodshed)

A Er, thanks for that. (*Sack the translator, eh, James?* – GF.)

Q I've read about Sega's plans to release a DSP cartridge – so consumers don't have to pay for it over and over again – with games like *Virtua Fighter* and *Virtua Racing Deluxe*. Do Nintendo have any similar plans?

A Actually, Sega have changed their plans and are now releasing a much more powerful add-on for the Mega Drive called the Mega Drive 32 – this might negate the future of the SVP and the two games you've mentioned will be the first for the system. Nintendo will be releasing new FX games this year, including *Starfox II* and *Stunt Race FX*, but you won't be able to buy the Super FX chip separately in any form.

Q With all the new *Castlevania* games coming out why aren't SNES owners getting a new one?

A The latest rumour suggests that we are. Apparently, Konami will have *Castlevania V* for the SNES at the Famicom Space World in August this year, and one rumour even suggests it's a Super FX game! However, Furano Jan – the main programmer of *Castlevania IV* – now works at Sega

developers, Treasure, and coded the splendid *Gunstar Heroes* for the Mega Drive. Perhaps that explains why the Mega Drive version of *Castlevania* was so sad...

Shawn Bowman, Oklahoma, US.

DEAR GAMEFREAK,

Q When will *Stunt Race FX* be released and how much will it cost?

A It should be released in May in Japan, with a UK version following a couple of months later. It will probably have the same price tag as *Starfox* (ie £49.99).

Q Will the ships in *Starfox II* be different to the Arwings, and will the team be the same?

A A working version I saw contained the same Arwings, but it was an early version so it could change. As for the team, who knows?

Q How will Project Reality compare with Sega's Saturn and Sony's PS-X (which looks amazing, particularly with games like *Ridge Racer*)?

A The specs for Project Reality haven't been announced yet, but Nintendo would be crazy to release something that wasn't at least as powerful as both these machines.

Q Will there be any Super FX chip RPGs?

A Very unlikely. The Super Famicom was

apparently designed to make light work of top-down RPGs, and given the high memory size and battery back-up needed in most RPGs – a Super FX chip would be an unnecessarily expensive extravagance.

Q In *Edge 5* there was a preview of *Powerslide* and in the intro it said it was the first of Elite's line-up of 3D SNES games. Any news on the others?

A Another driving game, *Dirt Racers* is the only other Super FX title that's been announced so far from a proposed schedule of four.

Q I think the *Super Play* team should have a big group

DEAR GAMEFREAK

I am writing with reference to Martin Fewell's letter in Gamefreak issue 18. I had the same problem of distorted sound when connecting my Super Famicom to my hi-fi, due to having phono sockets only.

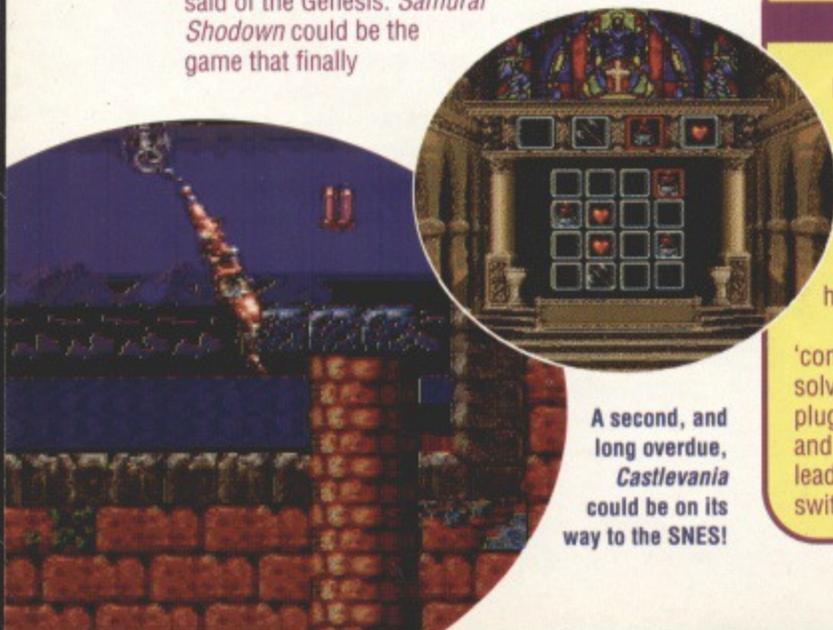

However, by buying a 'compact disc switching unit' I solved the problem. The unit plugs into your phono sockets and you plug the SNES stereo leads into the unit which has a switch for CD and phono. When

the switch is set to CD it changes the frequency line-in source to that of your SNES, giving you crystal clear sound. The units cost around £15-£30 and are found in most hi-fi shops.

Seth Eagles, North Wales.

Cheers Seth, but the problem of buzzing that Martin complained about can be solved much more easily by disconnecting the ground (the outer sheath wire in the SCART lead that joins with the SNES ground wire) from the relevant pin in the SCART plug – it just depends on your TV. Give it a try.

A second, and long overdue, *Castlevania* could be on its way to the SNES!

hug, like at the end of *Aladdin*. Is there any chance of one?

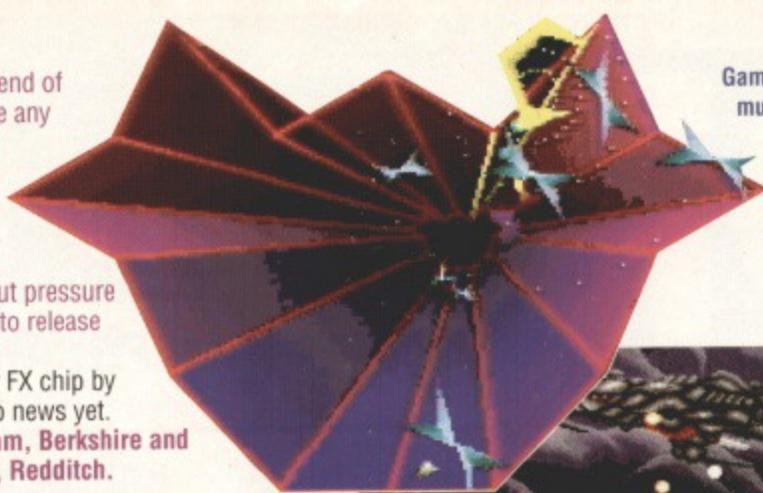

A What a thoroughly bizarre request. Certainly not.

Q Would you put pressure on MicroProse to release *F1 Grand Prix*?

A On the Super FX chip by any chance? No news yet. **Simon Downham, Berkshire and Steven Bagley, Redditch.**

DEAR GAMEFREAK,

Q I've got an expensive hi-fi and I sometimes connect my SNES to it. The problem is that I don't have any games with good music. I've got

Games with great dance music: *Tempest* on the Jaguar (left); and the official version of *Bio Metal* – resplendent with the noise of *2 Unlimited* (below).

Elite's *Powerslide* (above) uses the Super FX chip. *Super Metroid* (right) is on schedule for Project Reality.

Super Mario World, *Super Mario Kart*, *Cool Spot* and *Starfox* (okay this has good sound), but I'm crazy about rave and techno (like in *Streets Of Rage 2*), so could you tell me the names of any games that this kind of music?

A *Super Adventure Island* has some reasonably smart dance tunes (particularly towards the end) by Yuzo Koshiro, the same geezer who did *Streets Of Rage 2* on the Mega Drive. Other than that, the only other games that spring to mind aren't SNES games – *Apidya* on the Amiga has the best techno I've ever heard (Stuart Campbell off *Amiga Power* agrees with me), and *Tempest 2000* on the Jaguar has pretty good techno stuff too.

Q Is *Mortal Kombat 2* coming to the SNES?

A Where exactly have you been for the last four months? Yes, *Mortal Monday* – 13 September – the same as last year.

Q Is the Jaguar a true 64-bit machine? If so, will the SNES CD beat it?

A SNES CD? Do you mean Project Reality, because that's cartridge-based? Anyway, to answer your question, the Jaguar is a 64-bit machine but that doesn't mean it's more powerful than a 32-bit machine. More bits is just an indication of the amount of data it can process at any one time. Custom chips are what makes a console great, and it's on this point that the Jag will face some tough competition from Saturn, PS-X, and hopefully, Project Reality. Funnily enough, there's been a rumour knocking around Japan recently that Nintendo might finally be releasing a CD-drive for the Super Famicom later in the year. Now that would be an amusing turn-around!

Q What games can we expect to see on Project Reality when it appears?

A Some details have just leaked out on the

development of 64-bit Nintendo titles. The first three games to be released for the system will be *Zelda V*, a new version of *Metroid*, and unsurprisingly, *Mario 5*. *F-Zero 2* is on the drawing board, too. Can you wait for that one?

Michael Ellul, Malta.

DEAR GAMEFREAK,

Q I think I am correct in believing that the Super Multitap from Hudson Soft has a hidden use – it can act as an adaptor, enabling Japanese or American controllers to work on the European SNES. I doubt that Hudson Soft will have bothered to change the configuration between the US and UK models.

This saves people from having to have a £25 conversion to their UK SNES, enabling it to have universal controller compatibility.

A Yes, as we have hinted in the past, this is true. It was possibly included to allow the wide variety of joypads (import and official) to function on the Super Multitap.

Q £55 is a lot of money to spend converting the Super NES to run at 60Hz. Does it really add to gameplay that much?

A I wouldn't go out of my way to recommend doing this to the UK machine. It would be far better to flog your UK machine and get an imported US or Japanese system. Of course, the difference in speed and graphical clarity you get through 60Hz RGB SCART is considerably better than the optimum picture obtained from a UK PAL SNES. But then gameplay isn't usually affected to a great degree, and that's what matters most. Having said that, I can't go anywhere near a UK SNES without moaning about the borders and blurry graphics. But then, that's me – I'm always moaning about something.

Q Are Capcom or Konami ever going to set up UK headquarters?

A Konami are already here on a small scale, but Capcom are looking to expand in the near future.

Q When Project Reality finally arrives, will *Super Play* be covering it?

A Yes, with a big black cloth to hide it from *GamesMaster* on the ground floor. Actually, come to think of it, I'll make sure it's in my house in front of my telly. I'll let *Super Play* borrow it occasionally, though, 'cos I'm nice like that.

DAY DREAMING

The only gaming forum free from the restraints of what is technically feasible. And only limited by your imagination. Unfortunately, this month's harvest of ideas contains a couple of rotten apples...

'My daydream is a game based on the new *Three Musketeers* film. It could be done by Konami in the style of *Sunset Riders* with horse riding sections, animated film sequences, and an 'all for one, one for all' at the end of each level. You could even have that Bryan Adams song – (*Snip – GF.*)

Yes, I think we get the general idea. Ever thought about applying to THQ for a job?

'Our idea for a game would be a mixture of shoot-'em-up, beat-'em-up, platform and RPG. You would be able to choose between two cats – Cilla or Bonnie. The plot goes like this: A toothpaste-wielding flamingo has stolen their kittens and is making them eat their own litter. The title of our game would be *The Legend Of Cilla's And Bonnie's Kittens.*

Keve Stewart and Dave McAffery, Walkden.
Ye-eess. Am I missing something here?

'I'd like to see a Super Nintendo version of *Kid Icarus*, that great NES game from yesteryear. That's it really.'

Matthew Fleetwood, Cheshire.

You're in luck. A SNES *Kid Icarus* game will be unveiled at either the Summer CES in June, or the Winter CES next January. The game isn't set to be released until early 1995, though.

'A game I would like to see (and I can't be the only one here) is *F-Zero 2*. The only other thing that could match this would be a *36DD Bikini Babes Mud Wrestling* sim with rotoscoping.'

Dean Henshaw, Staffs.

Er, right.

'I'd love to see a platform game with a puppy dog – a Westie with a really waggy tail.'

Lisa Nicholls, Bath.

Look Lisa, you stick to the pictures, and I'll handle the words, okay?

Come on, you can do much better than this. Send them in (the good ones, that is) to Daydreaming at the Gamefreak address. But let's be sensible, eh? (Now, where did I put those *Street Fighter III* daydreams?)

MODE 7

By Allan Brett **CALLING ALL CHEATS, CRACKERS, AND GAME-FREAKS!**

It's mine, all mine, do you hear? Wah ha, ha, ha, ha! (I'm sorry about this readers, Allan does tend to get a little carried away at times. In fact, Tony, can you carry him away now? - Ed.) Following Dan's most regrettable ritual disembowelment last month, I have been entrusted with the safekeeping of Super Play's Grand Modus Septima (in between sessions of four-player NBA Jam and the odd cheese and ham toastie, of course).

So if you - yes, you - have tips, cheats or even used banknotes, then send them to me, Allan Brett, at: Mode 7, Super Play, Future Publishing, 30 Monmouth Street, Bath BA1 2BW. You could be in with a chance of winning a stupendous Super Play pen - if you are lucky enough to be mentioned in these hallowed pages, that is.

● Moving on the map grid
Well, were we right or were we right? Here's another Rainbow Bell cheat and it's probably not the last. Pause the action by pressing START, then press A, A, A, A, B, B, B, B, X, X, X, X, Y, Y, Y, Y, L, L, L, L, R, R, R, R (That's five each of A, B, X, Y, L, R), unpause and pause again. Now you can use the D-pad to shift that little blue block wheresoe'er your heart desires.

● Move out of screen
Here's a strange one that was sent in by Thomas Wash of Warwickshire. Like most of the Mortal Kombat tips that we've seen, it's really a bug rather than your genuine cheat. Thomas reckons that if you perform

Sonya's flip throw on the very last second of the first round, you can move out of the screen and straight on to the next round. You must make sure that Sonya's throw is still draining energy when the timer runs out, though.
Thanks, Thomas.

That's not Sonya. (Obviously not - she's moved off the screen, you peasant - Ed.)

INVALUABLE MONTHLY GAMING ADVICE

Hello, er, again. This is the section where I put on my other hat and endeavour to assist you in your darkest gaming hour, so without further ado I'll get on to your questions.

Select the global map and look at the very centre of the ocean. Make your way there and fly low to see this sunken face.

Examining ancient artifacts, Cecil concludes that the Moon-dwelling race possessed 70s footballer haircuts. Yeuch.

DEAR ALLAN,
Please can you tell me where Ellie Sattler's ID card is in Jurassic Park?

Melinda Tan,
South Australia.

ALLAN SAYS:
Well, if I remember correctly, you'll find her card on the boat. Once you have it you

should take it to the Visitors Centre. Does that help you?

DEAR ALLAN,
Is it true that there is a cheat on Dead Dance (Tuff E Nuff) which allows you to be the bosses?

Luke Potter, Hayle.

ALLAN SAYS:
Yes there is me old mate. What you have

to do is press: LEFT, LEFT, LEFT, RIGHT, RIGHT, RIGHT, LEFT, LEFT, LEFT, LEFT, LEFT, LEFT, LEFT.

If the cheat has worked you'll hear an explosion and you can then choose a boss on the character select screen, using the bar below the normal characters.

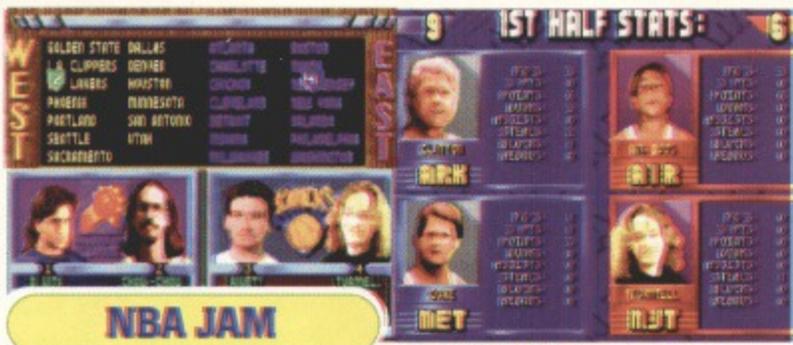

DEAR ALLAN,
Could you tell me where the Midge Mallet is found in Secret Of Mana? Also, I have found a small face in the ocean just west of the Ice Country and north of Northtown. Do you know what it does?

Gene Ruston, Wilmslow, Cheshire.

ALLAN SAYS:
The Midge Mallet is found in the Dwarf Village: after you have defeated the thieves and their robot Kilroy, go and see the Dwarf Elder standing in the centre of the Village. As for your other question, I've examined it and I can't figure out why it's there or what it does. Can anybody solve this peculiar mystery?

(Yes, we can. The faces are a sort of 'trademark' in Square RPGs - you'll also see one on the Moon's surface in Final Fantasy II, and in the forthcoming FFIII. We haven't checked on every game in the series, but we're sure you'll find them. They don't serve any other purpose.

NBA JAM

- Password cheats
- Lying git?

(Well what do we have here? Could it be? Yes, it's the secret player cheat and I think I'm going to faint because it's so fresh and minty. Not only can you play as President and Vice-President, but characters such as Mark Turmell, Midway's *NBA Jam* designer, also puts

Yes, it's hard to believe these fit, healthy-looking people aren't real NBA athletes.

in an appearance. Select YES to enter your initials and input the first two letters of the following codes. (Place the cursor over the third letter, but don't enter it normally. Instead hold down L, R and START and press X or A accordingly.)

BILL CLINTON: Enter ARK and hold L, R, START and press X.

AL GORE: Enter NET and hold L, R, START and press A.

AIR DOG: Enter AIR on initials screen and

hold L, R, START and press X.
TURMELL: Enter MJT and hold L, R, START and press A.
DIVITA: Enter SAL and hold L, R, START and press X.
RIVETT: Enter RJR and hold L, R, START and press X.
CHOW-CHOW: Enter CAR and hold L, R, START and press X.

A juice code also exists, although I had trouble getting it to work. What you must do is press any button 13 times on the TONIGHT'S MATCH UP screen and then hold B and X until the court appears. The word 'JUICE' should flash on the screen, heralding a high speed match. See if you have any luck with it. Unfortunately, it's rumoured that certain arcade cheats (like the Tank Game and the Big Head trick) have been deleted from console versions.

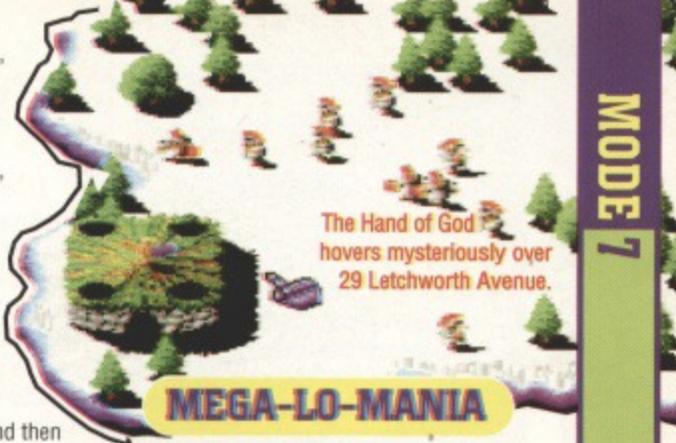

Want a massive head-start in completing the game? Then heed the words of Gareth Davies from Sunderland, who has investigated his options and discovered some built-in password cheats. Enter one of the following initial codes and its corresponding password and you'll be given a high rank, several teams beaten and a winning streak of up to 242 matches. Yep, that's cool.

INITIAL	PASSWORD
ONE	11111111111111
TWO	11111111111111
SIX	15151515151515

Finally, Oliver 'Baz' Barrett of Carlisle reckons that by pressing any button on the TONIGHT'S MATCH UP screen, then holding A and B until the tip-off, you'll get a little box in the bottom corner telling you the percentage chance of scoring from a shot at any time. We couldn't get this to work at all, but perhaps somebody else will confirm its virtue. His integrity is on the rocks, frankly.

It doesn't make much difference on court, although Clinton's gut is quite prominent.

DEAR ALLAN,
 On *Zelda 3* I can't get into the dungeon containing the fifth crystal. Please tell me how to do it.

Stephen Pencil,
 Pimlico, South Wales.

ALLAN SAYS:
 To enter the fifth dungeon you need the Titan's Mitt, which you should have found in dungeon 4. Go to the entrance to the Pond of Happiness in Lake Hyrule and lift the dark stone to reveal a tile which takes you to Dark World and the entrance of dungeon 5. Possibly a level select.

Ryan Rickard,

ALLAN SAYS:
 One level select coming right up! Oh dear I seem to have mislaid it somewhere, so I'm afraid you'll have to make do with an infinite lives cheat instead. Pause the game, unpause and then pause again, now press: SELECT, UP, DOWN, LEFT, RIGHT, Y, B, X, A.

DEAR ALLAN:
 I have heard that there are some levels hidden at the back of Bowser's Castle in *Super Mario World* - is this true? And if it is, how do I get to them?

 I think someone's been pulling your leg, unless they were referring to the back door or the sections of Donut Plains and Chocolate Island which you can see on the cliffs around the Valley of Bowser.

DEAR ALLAN,
 I have reached the final boss in *Cybernator*, but I just can't finish it off. I need a cheat, but not the one for infinite continues, because I can't get that one to work.

ALLAN SAYS:
 I have never played *Lagoon*, so I can't help, but maybe someone out there could share their *Lagoon*-related wisdom with you. Oh, congratulations by the way!

DEAR ALLAN,
 In *Legend Of The Mystical Ninja 2*, where can I find the golden glove and what does it do? Also, what does the flute do,

and why are some of the villagers brandishing Konami signs?

ALLAN SAYS:

I think the flute (found in the Lantern Village) allows access to the red devil icons found in the Fairground Isle, which in turn lets you enter the highly secret special stage I told you about in my guide, but I'm not sure. As for your other two problems, we'll have to wait and see if any of you out there can help.

'What the hell is that?' I hear you cry. Well, the egg-beater is the guaranteed redizzy technique. Using Ken, jump away and use a hard punch just as you are about to go out of range, then unleash a powerful hurricane kick. Because the hurricane kick is travelling backwards, the poor sucker on the receiving end is thrust back and forth and by the time the kick has finished, your opponent will be reeling and you can do it again.

Unfortunately, you can't do this on the Japanese version, apparently, because the Japanese don't like the technique and it was omitted from all their copies. Fortunately, the Americans seem to like it and you'll find it included in US and UK copies too.

'All we haven't managed to figure out is why your ship goes all yellow if you stop firing.' A minor caption by the late, great Jonathan Davies (last seen stroking a white cat and looking master-villainish behind an oak desk in *Amiga Power*). Fairly innocuous too, but several of you have rushed to explain the enigma. Basically, it's possible to pick up a drone ship from the oncoming waves by touching it with the yellow aura that engulfs your transforming battlecraft. It only works with smaller enemies, but they have various attack patterns. The top of the screen displays the name of the robot fighting on your side.

We've only tried this out on a preview version supplied by Konami, so let us know if it works for you (and feel free to curse our forefathers if it doesn't). On the title screen, use controller 2 to enter the code X, UP, Y, LEFT, B, DOWN, A, RIGHT, X, UP. Go to the FIGHTER SELECT screen and put Leo and Shredder in 1P Vs 2P respectively. Now move the selection icons up into the top left-hand corner of the screen and you should see Karai and Ratking appear in their places. That's the theory, anyway...

You know that man from Konami? Well, before we could get screenshots of the tip actually working he – oh, it hasn't been our month.

SECRET OF MANA

(Square Soft) SP15: 94%

● **Ninth weapon orbs**

● **Fly backwards on the dragon**

Yes, it's true that a ninth weapon orb exists for each weapon. Search the Mana fortress for a while and they will slowly appear. These are the transformations you can expect after reformatting:

Glove becomes **Aura Glove**

Sword becomes **Mana Sword**

Axe becomes **Doom Axe**

Spear becomes **Daedalus Lance**

Whip becomes **Gigas Whip**

Bow becomes **Garuda Buster**

Boomerang becomes **Ninja's Trump**

Javelin becomes **Valkyrian**

Try this tip out too: it's nothing special, but it's good for a laugh. Go somewhere

where there are Owls and let them cast Silence spells on you. Now call the Flammie Dragon and gasp in amazement as you fly around backwards upon your intoxicated steed. I found this one, by the way.

Below: Now there's something you don't see every day. Or, indeed, ever.

FATAL FURY 2

(Takara) SP19: 79%

● **Control the bosses**

I'm not bothered what anyone says, I think this game is pretty ace and James Ryder has found a tip to control the bosses. When the Takara logo appears and the music starts, press B, A, X, Y, UP, LEFT, DOWN, RIGHT, L, R. Make sure you finish it before the logo disappears. If the tip has worked you will hear Terry Bogard say 'OK!' and all of those bosses – Billy Kane, Axel Hawk, Laurence Blood and Wolfgang Krauser – can be used at your leisure. Check out the quarterstaff on that Kane fellow. Or the sword on that Blood fellow. Or the leotard on that Brian Glover fellow.

The deadly cross-your-heart bra. (Eh? – Ed.)

No wobbly bits in this screenshot – phew!

TOP THREE MOST WANTED TIPS

Yes that's right, we want you to tell us how to make these tips work. They have all come from various reliable sources, so they do exist.

1) **NBA Jam**: Word reaches me that there are many more hidden players in this smart dunk-'em-up. One of these hidden players is none other than Rayden of *Mortal Kombat* fame, who can teleport to the other end of the court (!) You can also play as an old granny, or some bloke by the name of Jordan...

2) **Secret Of Mana**: If you look in the instruction book you may notice that on a couple of screenshots all of the characters are standing in Potos Village with literally hundreds of hit points, which is impossible if you play the game normally. But maybe one of you can help by exposing this well-hidden cheat?

3) **Super Puyo Puyo**: We know that a couple of hidden option screens exist for this game. We want to know how to reach them. And don't complain that you haven't bought it yet – in two-player mode this is the most competitive puzzler we've ever reviewed, so rush out and buy it now.

REN & STIMPY: VEEDIOTS

(THQ) SP12: 47%

● **Stage select**

'Steempy, why is dees veedio game less fun than your leeter tray?' When the title screen appears you should watch for the word 'Veediots' to start forming. On this cue, press L, R, A, L, R, L, B, R, X. The words 'PRESS START' will now be replaced with the number 01. Press the SELECT button to advance this number until it registers the stage on which you wish to play, then press START to go straight into that part of the game. Happy, happy, joy, and, to a lesser extent, joy.

By the way, rumours from the States suggest that THQ are parting company with Malibu Comics to concentrate on 'other projects'. Oh no, look out!

I've never really liked chihuahua's, they aren't proper dogs. But this game is.

Who looks old enough to buy the fags and beer, then?

TOTAL CARNAGE

(THQ/Malibu) SP14: 63%

● **Access arcade voices**

This is an odd one and no mistake. We're used to seeing old bits of junk code cropping up on game cart chips – unused sprites, redundant background screens and the like – but this seems to be a deliberate little joke on the part of the programmers. What you must do is play the game until you get a score that puts you in

fifth position on the high score list. Die and do not continue. Now, enter your name as 'YAWDIM'. Press RIGHT and you'll get a bizarre school blackboard

screen by the Black Pearl team. Press Y, B, X or A and you'll hear some secret voices from the arcade version of the game that didn't make it into this 'conversion' (I use the term loosely – anyone who's played the arcade *Total Carnage* will know why). Curious.

THAT'S ALL FOLKS!

This month in Playback: sick and tired of *Street Fighter II*; overseas blues; what's wrong with violence?; oops, we made a mistake (*Impossible - The readers*); why aren't there more rib-tickling games for the SNES?; and will Lisa marry her number one fan?

'DO ONE BETTER'

I'm writing on behalf of me and all those other *Street Fighter* fans who are sick and tired of Capcom just bringing out more and more remixes of *Street Fighter II*.

I can understand Capcom releasing *Champion Edition* and maybe even *Turbo*. But they should have left it at that. But no, Capcom had to do one better and bring out *Super Street Fighter II*, and it came as no surprise to me when I heard about the launch of *Super Street Fighter II Turbo* (Or 'X' as it is officially known - Ed).

When will Capcom realise enough is enough and release *Street Fighter III*? (But then we will probably have to go through the same procedure all over again.)

Yours faithfully,
Jim Lightfoot,
Edgbaston, Birmingham.

We too think Capcom are being a touch naughty in their handling of

the *Street Fighter* phenomenon recently. The theory is that the creative process at Capcom is constantly revolving and ideas which aren't strong enough to be put toward *SFIII* have to be used somewhere. The logical progression is to update, evolve and hone a game until it's perfect. But we agree, Jim. Capcom do appear to be milking it a bit.

'THE SOFTWARE DROP'

I'll get straight to the point - that is Nintendo. What on Earth are they doing at the moment? I looked in What Cart? and saw the last game Nintendo released for the SNES was *Starfox*, reviewed nearly a year ago. Since then, the only thing they have brought out is *Super Mario All Stars*, which although quite good, contained all old games. I read your section on

the CES, hoping to find some good new games coming out, and basically all I found was barely three pages of sad games. Since Nintendo released the original few games with the launch of the SNES (*Mario 4*, *F-Zero*, *Zelda* etc), it seems they have almost forgotten about it. Where are the sure classics, like *F-Zero 2*, *Mario Kart 2*, *Zelda 4*

etc? And it's not just Nintendo. All the other companies seem to be doing nothing as well. What the hell is going on? Is there a big release planned, because that would explain the software drop.

I think Nintendo should buck their ideas up, or they are bound to

ENVELOPE ART!

lose their reputation and game players to Sega, who are a worse company, but don't seem to ignore their machines.

Yours faithfully,
James Leaver,
Hassocks, W Sussex.

This month's cover game is an official Ninty release; they're personally bringing Square Soft's *Secret Of Mana* to this country; and *Stunt Race FX* is almost with us. Here's somebody who disagrees with you entirely. Hooray for heated and varied debate.

'BUT IN SECRET'

I am writing in reply to my letter about the lack of attention by Nintendo. I take back everything I said. After going into my local games store, and finding games like *Zombies* at a mere £20, looking at the line-up of new Super FX games, and the stunning demo pictures of Project Reality, Nintendo have re-established their position as the world's leading software and hardware manufacturers, in my opinion. As I suspected, all the time nothing appeared to be going on, a lot was – but in secret.

Yours faithfully,
James Leaver,
Hassocks, W Sussex.

Thanks, James, for putting, er, James in his place. However, we're dubious about the 'demo' pics of Project Reality appearing recently. They were all produced on huge £10,000 Silicon Graphics workstations, and we've yet to see any evidence of the proposed hardware.

'HERO SHIGERU 'MARIO' MIYAMOTO'

I have just been reading all about Project Reality, and I was initially delighted to see a piece in your magazine about that unlikely hero, Shigeru 'Mario' Miyamoto. However, during the course of your interview with him, he hinted that he was working on a sequel to *Pilot Wings* on Nintendo's forthcoming super-console. All well and good for the future, but doesn't this mean we'll never be seeing one on the Super NES?

If all the top developers at Nintendo in Japan are working on software for Project Reality, it looks bleak for those of us who want some decent games now on our 16-bit machines. Nintendo's profits may be committed to developing the new technology, but I think they should remember just who made them all that capital to invest.
Lawrence McGill,
Leamington Spa, Warks.

Firstly, Project Reality is still a long way off. In the absence of hard facts, many journalists have made unsubstantiated claims about the software it will run: quite honestly, couldn't anybody have guessed that we'd see new *Mario* and *Zelda* games? Any developments on the software side will be sketchy, so we don't think you need to worry about Shigs being overworked. Secondly, our cover game this month was designed by R&D1 – Nintendo's top design team – so rest assured, we're not being neglected.

Lisa replies: 'Get lost, creep.'

'GETTING WORSE ALMOST DAILY'

Almost since the dawn of time people have been complaining about how long Super Nintendo games take to appear in their country, and how much they cost when they eventually show up. Spare a thought for us poor Aussies, though – our situation is much worse than England's, and getting worse almost daily.

Super Play's February issue has only just come out here. This isn't as bad as it may seem – the games take almost as long to appear on Australian shelves. (And considering that the Australian SNES can take English PAL cartridges without an adaptor, this wait is unacceptable.)

Mattel used to handle the distribution of all Nintendo hardware down here, as well as Nintendo's own software. When *Super Mario All Stars* came out, the recommended retail price was \$160 (about £70), but some stores were

charging \$185 (£81) for it! However, most Nintendo software is around \$100 (£44). Smaller retailers got fed up with Mattel, and are importing software from Britain... including from Nintendo UK! (I myself have a UK copy of *Zombies*, which still isn't officially here.)

Since then, Nintendo of Australia was established to handle distribution in Australia and New Zealand, and the big N has made a dedicated push to rein in Sega. (For example, the Japanese *Super Mario Kart* advert you mentioned a few issues back has been dubbed into English and is receiving heavy exposure on television here.)

However, the straw that breaks the camel's back is the Australian Federal Government's recent decision to classify games (including coin-ops) the same way that films and videos are rated. This means that each game will be submitted to the Film and Literature Classification Board before release, delaying shipments even more! The legislation has not yet taken effect, but its ramifications are already being felt at arcades around the country.

Super Nintendo owners in Britain are definitely a mob of whinging Poms, but we've got it a hell of a lot worse.

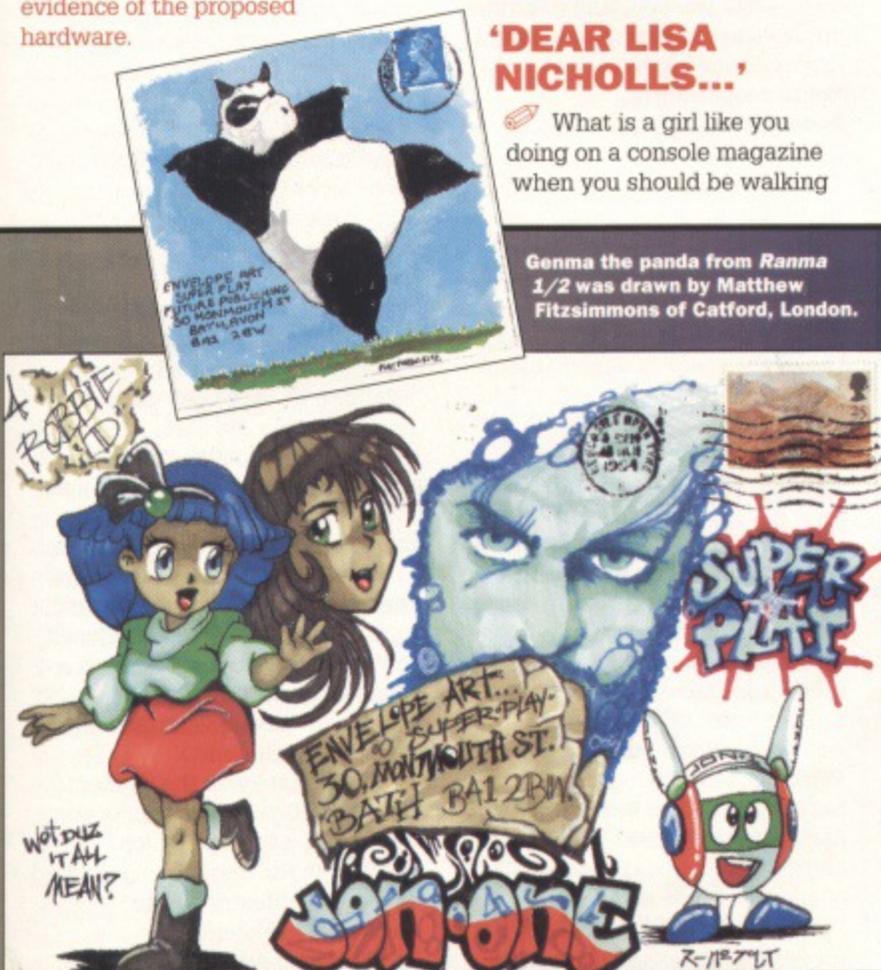

Yours sincerely,
Derek Nielsen,
Toowong, Australia.
You've certainly got a good point. Obviously, some guidelines must exist about software, but if

they're too extreme, people will stop enjoying consoles as a hobby. Australiades have a great many legal 'requirements' and they're not anti-Nintendo games, just concerned with manifold legislation. Whatever that means.

'MAY I SUGGEST'

I am writing concerning the predicament that Martin Hill had last month (issue 19). May I suggest going to the popular computer chain Future Zone. They sell extension cables for about a fiver. I hope I have solved your problem.

Yours sincerely,
Danny Hodgkiss, Leicester.

It enriches our lives to pass on such gems. After all, where one suffers audibly, many more do so in silence. Morrissey said that.

'I'M AN RPG ADDICT'

I read your article on adaptors (latest issue) with great interest. I own a UK SNES and use a Datel Universal Adaptor (expert version) for my import games. I'm an RPG addict and haven't had any problems in the past, even with *Secret Of Mana* - until *Lufia*. The game runs, but won't save, something you won't find out for 30-45 minutes, as it takes that long

for you to reach the first save position opportunity.

My importer checked the game for faults, but it worked on a US machine. They have changed the game for me, but I really would like to play this game. I wrote to Datel to see if they had an adaptor that would run the game properly - but, as yet, have had no reply.

Can you tell me which adaptor you used to review the game - or do you use a US machine? Or, if anyone out there has played *Mana* on a UK machine, please let me know which adaptor works!

Yours hopefully,
Cheryl Barnes,
Hemel Hempstead, Herts.

We do use a US SNES to play *Mana*, and we're still looking for an adaptor which lets the game run on a UK machine. Lewis Logaridis, our techy man is working on the problem right now, too. If anyone out there knows, please tell us and we'll send you a prize or something (if you're right, that is). Until then, Cheryl, er, sorry.

'I LOOKED A LITTLE CLOSER'

Having read the review for *NHL Stanley Cup*, I turned to the Chart Throb page to see if it got a mention in any of the import charts, and it had, along with the screenshot. Hold on! Something's wrong! I looked a little closer to see that *Stanley Cup* is now football and not hockey. You'd called it *NFL Stanley Cup*, twice even.

Is this a misprint or is it that you don't know your slapshot from your touchdown? Come on you lot, don't you like ice hockey or something? You've already angered ice hockey fans with your review of *Super Slap Shot*.

See you at the face-off hockey fans, Damian Jordan, Hyde, Tameside. PS Six, including goalie. Can I have Lake Michigan?

Angering ice hockey fans isn't what we set out to do. OK, we made a tiny error about *Stanley Cup*. Please forgive us, and thanks for pointing it out.

Yes. You own Lake Michigan. Now let's see you try and collect it.

'I WOULD DARE TO SAY'

I've just bought issue 18 of *Super Play* (for which we Lusus have to wait till the 20th of the month or so). In Playback, I read Steve Lee's 'I hate Nintendo' and I would dare to say that you Brits don't know what suffering is. I know waiting more than six months to buy a game isn't easy, but I'm not an expert on Japanese, so I have to wait for the English translation, and then wait for the

'HIGHLIGHTS'

Many thanks for the subscription letter - it adds a little bit of spice to the monthly read! To add yet more flavour to your near-perfect magazine, in my opinion the resurrection of the Golden Bee Awards would be a good idea. **Harry Picken, Leeds.** You're in luck, the Golden Bee Awards will appear in issue 21.

I'd also like to tell you that, roughly translated, 'Guyver' means 'out of control', so now you know.

Robert Taylor, Worthing, West Sussex. Thank you. It's always nice to learn the odd word of Japanese.

If Nintendo want to stamp out grey imports and the use of

adaptors, then why don't they release games at the same time all around the world?

Michael Cronchey, Newbury, Berks. What a good idea. Somebody really should tell Nintendo...

Why is there only one football management game on the SNES? This genre sold by the bucket-load on the old 8-bits.

Yunek Yurp, Powys. Because the lack of a keyboard makes it tricky. Of course, the mouse does simplify things.

You've all been working really hard. How about an all-expenses-paid trip to Barbados? You can relax and let the stresses of magazine work leave your system for a few weeks. **The Barbados Govt, Barbados.** Thanks very much - The Team.

Portuguese importer to bring the titles into the country.

For example, *Street Fighter II* was released after you lucky chums were playing the *Turbo* edition (which of course, hasn't arrived here yet). The choice factor is another big problem. While the Japanese can choose from a huge amount of titles, you only have about 300? But we can choose from only 30 carts. And the Portuguese average wage is around £290. A SNES with *Super Mario World* costs about £155, and each cart (old ones) costs £55-£60. And escudo are weakening against the pound (forget about the yen!).

Yours despairingly,
Pedro Pinto, Lisbon, Portugal. Didn't we just have a letter like this from Australia? Anyway, it seems that SNESing in other countries (apart from Japan and the US) is a tough prospect. If you live overseas and it's tricky/expensive getting hold of SNES carts, please let us know, and we'll do a world map thing with prices and stuff. It'll look nice, if nothing else.

'THE MEDIA HAS BLOWN UP'

I am writing to express my views on something which is really getting on my nerves. Technophobia, or as it should be called 'computerphobia'. I have a SNES which I enjoy playing, especially games such as *Street Fighter II*. However, the media have made people believe that if I don't turn into a raving psychopath and start trying to kill people, I'm going to die from an epileptic fit. I've been playing games since I was five, and I'm now 16, and I haven't had the urge to go and try and do a special move or something on anybody, nor have I ever had a

fit. The media has blown up what can only be called an epidemic of computerphobia simply because they thought they could make a bit of money out of it.

I think it's about time people knew the truth about computer games - that they are a form of ENTERTAINMENT, just like television or radio, not some child-killing machines. **Yours sincerely, Richard Murrills, Barmehurst, Kent.**

The vast majority of, er, everybody would agree with you. But, of course, if anyone decides to 'prove' a link between gaming and real violence, they can always make it sound convincing. And what if certain people really are influenced adversely by games? One in a thousand would be enough to be a worry. I don't think it's the case, because people have been exceptionally violent to each other since the dawn of time.

'IT ALL STARTED...'

I feel that I must complain about the recent outburst against violence in video games and the multi-media format in general.

It all started when the red pixels in *Mortal Kombat* splashed onto our screens. Sega introduced their rating system, which was a reasonable step, as they are much more liberal with their games than Nintendo.

Then there was the incident with two 10-year-olds supposedly murdering a toddler, which resulted in the finger being pointed at the film industry for the outbreaks in violence.

This year saw 'Monitor Man' and his ratings, which is again a reasonable step, as it gives parents a guide to the contents

of a game. Now we are hearing ridiculous talks of banning films and games for their content. You may never be able to see the likes of *Dances With Wolves* or *Schindler's List* on video, or be able to play *Mortal Kombat 2* ever again.

Now I think that this finger pointing has to stop between the video game, film and TV industry, and that it has to stop on you. Yes, you, the consumer and your parents. It is your responsibility and your parent's to control what you view, not the government.

If people continue to be irresponsible, like letting under-aged children watch adult films and creating films and video games with a high violence content, then the powers that be are going to step in and put a stop to it all. They may even take the drastic step of putting a blanket ban on violence in general.

So come on, control your own video game choice. Use the voluntary systems already available to choose your games and videos carefully, before it is made illegal, or you are unable to buy certain video games at all.

Yours faithfully,
Ben Mullinger,
Hayling Island, Hants.

We're not quite sure what your point is, Ben. Of course, we decide what to watch and what to play. But are we capable of deciding whether it's harmful for us? If not, are we happy with others deciding this for us? It would be a pity if draconian measures were enforced to prevent access to violence on film and in games, but maybe if one life were saved it would be worth it.

We would welcome more of your views on censorship, especially as new laws are being introduced at the time of writing.

'LAUGH HIS OR HER SOCKS OFF'

Humour is supposed to be the universal language, so why aren't there more humorous games available for the Super Nintendo? Obviously, there are plenty, indeed, some would say too many, cartoon licences, and you get the occasional game like *Clayfighter*, but surely there's a market for a series of games which would make every SNES owner laugh his or her socks off? What do you reckon?

Yours smilingly,
Thomas Winters,
Richmond, Surrey.

It'd probably be rubbish. Japanese people do have a different sense of humour from Westerners. Americans laugh at all manner of not-very-funny things and us refined *Super Play* folk laugh at special in-jokes which nobody else understands. And you don't mention gameplay or graphics or anything. No, your idea is poor. But thanks for raising a chortle in an otherwise miserable world.

'A GREAT MANY WEEDY FOLK'

I've noticed that *Super Play* has started carrying those 'Build Muscles Fast' advertisements. There might be a great many weedy folk around who need to build up their muscles, but I can't help feeling embarrassed when I see them. It's this kind of ad placement which gives us Super Nintendo users a bad name. By the way, I intend to join the army and I'm big and rock-hard.

Yours sincerely,
John Phelps,
Swindon, Wiltshire.

If a company wishes to advertise with us, and they are genuinely selling an honest product or service, we'll consider accepting their ads. The muscles ads aren't overtly offensive, but we can see how people may squirm when they see them. Don't worry, John. They aren't directed specifically at you.

'ARE THEY ALL GITS OR WHAT?'

When game-buyers like us write to Nintendo or the software companies, do they actually read our letters? I've written to several companies (mentioning no names) and they ignored me totally. Are they all gits or what?

Yours,
Martin Bannister,
Dorchester, Dorset.

PS. Please reply to *this* letter! We presume that many companies are like Future Publishing, in that it is not always possible to reply to everyone's letters personally. Mainly because we just don't have the time to spare. We also suggest that you never send stamped addressed envelopes or expect detailed personal responses, because it's unlikely you will get them.

Do send us your letters, though. You can be sure that even if they're not printed with our responses in *Playback*, they are *always* read.

SUPER PLAY'S GAME LIBRARY

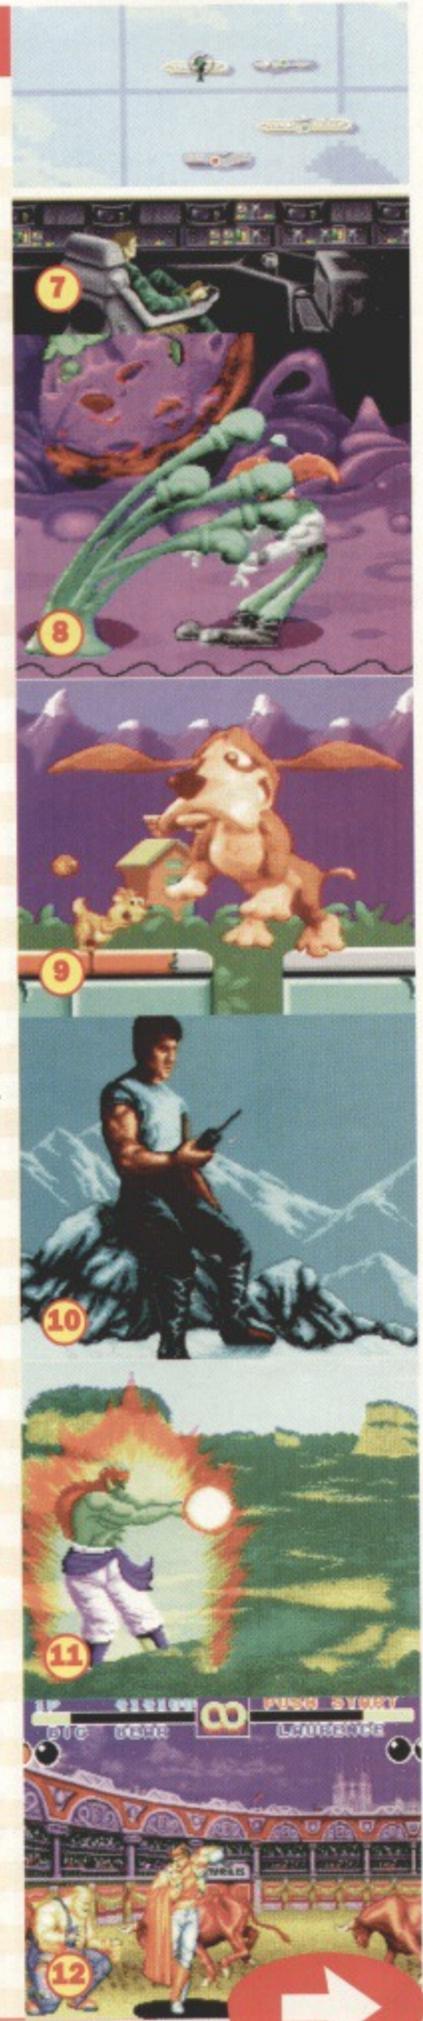

WIN! WIN! WIN! WIN! WIN! WIN!

This month, we're running a little competition. All you have to do is study all the screenshots on the seven What Cart? pages and write down which games they're from. Piece of cake. To make it even easier we've numbered every pic. Send your answers to: What Screenshot? Compo, *Super Play*, 30 Monmouth St, Bath BA1 2BW. The prize? A *Super Play* goody bag, of course. Oh, and the closing date is 15 July 1994.

SP16	ZOOL (UK) <i>Gremlin</i>	65%	Nice graphics and stomping music, but average overall.

The SUPER PLAY CLASSIC Collection

This fine month, we're looking at sports games which aren't anything to do with football.

THE IREM SKINS GAME

SCORE 83%

This is a golf game. It has nothing to do with shaven-headed, boover-booted youths. Or people called Irem. As well as the traditional behind-the-golfer view, there are some lovely map-style overhead views of your progress. And you don't have to wait for ages as the background is drawn every time the ball reaches a new position. The game uses Mode 7 to magnificent effect, scrolling the countryside around smoothly and quickly in 3D.

The controls are simple and easy to use, but of course, you'll have to master the subtleties to be any good. *Irem Skins* is addictive and tricky enough to keep you playing, bringing down your handicap.

SUPER TENNIS

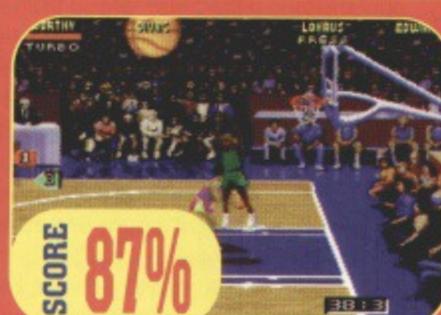

SCORE 92%

Ah, Wimbledon! The smell of willow on leather, the far-off chiming of strawberries and cream in the churchyard, and the ripple of applause as the French-Bartles arrive late in their Range-Rover.

Super Tennis is completely great and has the lot, even down to 3D spinnings as the players change ends. It's realistic, the ball animation's perfect and, oh, you've just got to play it to realise how good it is. There are loads of shots to play and the rallies are long and exciting enough to get you worked up.

Even the intro sequence takes what Jonathan Davies called at the time 'a ball's eye view of the action'. What's more, he wasn't trying to be clever.

NBA JAM

SCORE 87%

All men with brightly coloured vests and large bank accounts. That's basketball. And this incarnation of it is as yummy as a Creme Egg™ on a frosty day. Being a jam, there are only four players on court and the action is immensely fast-paced as the excellently-animated characters charge around looking cool and wearing vests.

The characters in the game are real basketball players (except Bill Clinton and Al Gore, who do something else for a living). It's very professional and slick, and if you've even the slightest interest in basketball, or you're just a high-speed thrill-seeker, you'll love the manic pace and excited commentary.

NEXT MONTH IN SUPER PLAY

98

**SUPER
PLAY**

ISSUE 21 will be placed prominently on the shelves of retailers on **Thursday, 2 JUNE**. There can be no excuse for missing it.

**EXCLUSIVE TO
SUPER PLAY!**

Next month's issue will feature three exclusive *Akira* trading cards on the cover. Manga Video are launching a wide range of such cards, all depicting scenes from *Akira* in stunningly high quality, and lucky *Super Play* fans will pick up three of them totally free.

Remember, our set of cards will NOT be available anywhere else, so make sure you get hold of a copy of the mag next month.

THE GOLDEN BEE AWARDS ARE BACK!

Hurrah! It's true! After immense public pressure, *Super Play* are again holding the awards ceremony to end all awards ceremonies. And you'll be able to make history by voting in them.

For those that can't remember the first Golden Bee Awards, there are about 20 categories to enter. You can also win top SNES-related prizes if you predict the top five best SNES games ever.

So get ready to be part of the biggest Super Nintendo Awards ever held in the UK!

TIPPED INTO TINY BITS

Yes, yes. We're well aware that the *Clayfighter* guide we forecast last month doesn't actually appear in this issue as such. That's because more people wanted a *Mega Man X* guide, and we always listen to our readers. Also, we wanted to make sure we featured every single one of the *Clayfighter* range of special moves. And boy, there are quite a few.

So, with just a tiny tremor of uncertainty, we can state that *Clayfighter* will appear in its tipped form next month. OK?

REVIEWS

Here's a little game: spot which of the following carts will actually be finished when the software folk responsible say they will – thus making them eligible for review in next month's *Super Play*.

● **HAMMERIN' HARRY** He's got a scooter which, as those who have read our news section will know, is very trendy. And he's got a large mallet. Which isn't quite so trendy. But does he care? No, he just continues along his chosen path, hitting things hard with that mallet.

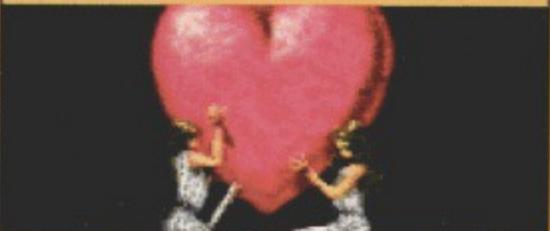

● **EMPIRE SOCCER** We couldn't review this in our footy special on page 26 because it was still being checked by Nintendo. But they'll have finished checking it now, and we should be squawking about it in a righteous fashion next month.

● **THE FLINTSTONES** The one thing we promise *not* to do is mention that daft saying of Fred Flintstone. You know, the one that everyone associates with him, and that he says both at the start and finish of the programme, and that starts with a Y and ends with an O.

● **WIZARDRY V** *Might And Magic 2* had better watch out, because *Wizardry V* is on the warpath. And we'll all be cringing behind a rock as Zy straps on his Mithril chain-mail armour and bravely strides off to do battle with it or something. Crumbs!

THE SUPER QUIZ ANSWERS

You'll find the questions for the Super Quiz on page 24. Don't phone, it's just for fun!

EASY

- 1) James. How embarrassing.
- 2) Super Nintendo Entertainment System. Of course.
- 3) Family Computer. Hence Nintendo's anti-blood stance, d'you see?

MEDIUM

- 1) No, but perhaps he should of done.
- 2) Mai Shiranui.
- 3) 25. But US ones do less or something.

HARD

- 1) Phase Alternate Line.
- 2) An Abrams M1A1 MBT.
- 3) Kid Ying, Dr Yang, The Robot or Mech Goemon, it would seem.

NEW "DEAD CODE" GENERATOR

"Dead Codes" are super cheats which effectively enable you to re-write whole sections of the game giving total control. No other product features "DEAD CODES".

NEW

MEGA CHEAT INPUT SCREEN

Now you can input up to 100 different cheats on any game at one time. This new feature allows you to customise your games with as many cheats as you like - all at once! Imagine - infinite lives, unlimited energy, special moves super high jumps, double speed, unlimited weapons, infinite re-tries, custom colours, special magic etc. etc. - all at once! Well now you can with the new Mega Cheat System.

NEW

ADVANCED CHEATFINDER

Action Replay has always allowed you to input not only the thousands of cheats found in the cheatbook supplied or from the huge number of cheats published in magazines each month - but the feature that has always put Action Replay ahead of any other cheat system is its unique game trainer (cheatfinder) feature. Now the game trainer is even better with improved game cracking routines plus new menu systems which make cracking open your games now even easier.

NEW

UNIVERSAL CHEAT SYSTEM

Only with Action Replay can you use the same cheat on UK, US, and Japanese versions of most games. So if you see a cheat in the Manual or a Magazine you can use it with even an imported version of that game. No other cheat system can do this!

NEW

UNIVERSAL ADAPTOR FEATURE

Action Replays unique adaptor feature which allows you to play even import titles on your console has also been improved. Now with the use of new custom chips you can also play so called "NTSC only" games from the US and Japan.

NEW

NEW SLO MO FEATURE

With this unique feature you have total control of the speed of the whole game. You choose from about 50% to full speed very effective with most games.
